ELECTRODES

**25
YEARS
AGO**

the advertisement here re-
produced appeared in the
first issue of "Chem. & Met."
then published as "Electro-
chemical Industry."

TODAY, as
twenty-five years ago,
we supply both the electro-
lytic and electrometallurgical in-
dustries with the highest quality, most
economical and convenient electrodes
procurable.

Today ACHESON ELECTRODES are manu-
factured in sizes not deemed possible in 1902,
but never has there been any departure from the
ideals which have always made them of outstand-
ing value.
