

外國最近刊行誌參考記事目次

The Journal of the Iron and Steel Institute. 1943—No. I. Vol. CXLVII

"The Influence of the Heat Treatment of Steel on the Damping Capacity at Low Stresses." By the late Leopold Prommer and A. Murray.....	45 p
"A Note on the Relationship between Preliminary Heat Treatment and Response to Nitriding of some Nitriding Steels." By C.C. Hodgson and H. O. Waring.....	55 p
"Corrosion of Steel Salt-Bath Pots by Molten Alkali Nitrates." By R. J. Box and B. A. Middleton...	71 p
"The Effect of Overheating on the Transformation Characteristics of a Nickel-Chromium-Molybdenum Steel" By K. Winterton.....	79 p
"A Note on the Physical Properties of an Austenitic Weld-Metal and its Structural Transformation on Straining" By K. Winterton.....	87 p
"Tensile Properties of Unstable Austenite and its Low-Temperature Decomposition Products." By A. H. Cottrell.....	93 p
"A Further Note on the Microstructure of High-Silicon Acid-Resisting Iron." By J. E. Hurst and R. V. Riley.....	105 p
"Emulsions of Oil in Water as Corrosion Inhibitors." By P. Hamer, L. Powell and E. W. Colbeck...	109 p
"Some Observations on the Austempering and Isothermal Transformation of Steels, with Special Reference to the Production of Martensite." By F. C. Thompson and L. R. Stanton. (Paper No. 16/1944 of the Alloy Steels Research Committee).....	133 p
"A Study of Work-Hardening and Reannealing of Iron." By M. Balicki. (Andrew Carnegie Research Report).....	181 p
"The Application of Radiography to the Improvement of Foundry Technique." By R. Jackson. (Paper No. 13/1945 of the Steel Castings Research Committee).....	225 p
"Examination of Two Ingots of Free-Cutting Steel. One Containing Lead and the Other Lead-Free." By C. S. Graham. (Paper No. 31/1945 of the Committee on the Heterogeneity of Steel Ingots) ...	273 p
"The Microscopical Examination of Samples of Lead-Bearing and Lead-Free Steels and Ingot Irons." By T. H. Schofield. (Paper No. 32/1945 of the Committee on the Heterogeneity of Steel Ingots) ...	277 p
"Mode of Occurrence of Lead in Lead-Bearing Steels and the Mechanism of the Exudation Test." By W. E. Bardgett and R. E. Lismer. (Paper No. 33/1945 of the Committee on the Heterogeneity of Steel Ingots).....	281 p
"The Influence of Centrifugal Casting upon the Structure and Properties of Steel." By L. Northcott and D. McLean.....	303 p
"First Report of the Foundry Practice Sub-Committee of the Steel Castings Research Committee." (Paper No. 12/1945 of the Steel Castings Research Committee (submitted by the Foundry Practice Sub-Committee).....	329 p
"The Constitution of Basic Steel Furnace Slags." By J. R. Rait and H. J. Goldschmidt.....	391 p
"The Phosphorus Reaction in Basic Open-Hearth Practice." By Y. K. Zea.....	459 p
"A Study of the Basic Open-Hearth Process, with Particular Reference to Slag Constitution. By A. H. Jay.....	505 p

The Journal of the Iron and Steel Institute. 1943—No. II Vol. CXLVIII

"British Resources of Steel Moulding Sands." By W. Davies and W. J. Rees. (Paper No. 4/1943 of the Steel Castings Research Committee (submitted by the Moulding Materials Sub-Committee) ...	11 p
Part 1.—The Upper Carboniferous Grits and Sandstones of the Eastern part of the Peak District...	11 p
Part 2.—The Lower Carboniferous Sandstones of Rothbury Forest and Alnwick Moor, Northumberland.....	63 p
Part 3.—The Moor Grit of North-East Yorkshire.....	80 p
Part 4.—The Rotten-Rock Moulding Sands about Wolsingham, Co. Durham.....	97 p
Part 5.—The Permian Yellow Sands of Durham and Yorkshire.....	104 p
"The Maintenance of the Furnace Linings in Large Basic Open-Hearth Tilting Furnaces by the Use of Chrome Ore, Magnesite and Serpentine." By A. Jackson.....	113 p
"Some Tensile Shock Properties of Carbon Steels." By F. V. Warnock and J. B. Brennan.....	117 p
"Tessellated Stresses.—Part II." By F. László.....	137 p
"Present Position of the Corrosion Committee's Field Tests on Atmospheric Corrosion (Unpainted Specimens)." By J. C. Hudson. (Paper No. 10/1943 of the Corrosion Committee).....	161 p
"The Brittle Constituent of the Iron-Chromium System (Sigma Phase). I.—A Survey of the Limits of the Sigma Phase in the Binary System." By A. J. Cock and F. W. Jones. (Paper No. 11/1943 of the Alloy Steels Research Committee (submitted by Dr. C. Sykes, F.R.S.).....	217 p

"Note on some Precipitation Effects observed in Mild-Steel and Wrought-Iron Pipe." By T. H. Schofield	227 p
"Fourth Report of the Oxygen Sub-Committee of the Committee on the Heterogeneity of Steel Ingots." (Paper No. 22/1943 of the Committee on the Heterogeneity of Steel Ingots (submitted by the Oxygen Sub-Committee))	231 p
Section I.— Introduction	233 p
Section II.— Methods of Analysis	235 p
Part A.—Determination of Oxygen.....	235 p
(a) The Vacuum Fusion Method. By H. A. Sloman	235 p
(b) The Fractional Vacuum Fusion Method for the Separation of Oxides and Gases in Steel. By T. Swinden, W. W. Stevenson and G. E. Speight	239 p
(c) The Aluminium Reduction Method. By N. Gray and M. C. Sanders	242 p
(d) The Chlorine Method. By E. W. Colbeck and S. W. Craven	243 p
(e) The Alcoholic Iodine Method. By T. E. Rooney	248 p
(e1) The Water Content of Methanol and its Effect on Results by the Alcoholic Iodine Method. By T. E. Rooney	252 p
(e2) Experiments on the Composition of Extracted Non-Metallic Residues from High-Carbon and -Phosphorus Steels. By G. E. Speight	257 p
(e3) The Examination and Analysis of Residues from the Alcoholic Iodine Method. By T. E. Rooney.....	273 p
(f) The Aqueous Iodine Method. By W. Westwood	278 p
Part B.—Determination of Hydrogen.....	278 p
(a) The Methods Available for the Determination of Hydrogen in Steel. By W. C. Newell... ..	278 p
(b) The Vacuum-Heating Method	287 p
(b1) The Vacuum-Heating Apparatus in Use at the Brown-Firth Research Laboratories. By W. C. Newell	287 p
(b2) The Vacuum-Heating Apparatus at the Central Research Department, The United Steel Companies, Ltd., Stocksbridge. By W. W. Stevenson and G. E. Speight.....	290 p
(b3) Apparatus Used at I. C. I. (Alkali), Ltd., for the Determination of Hydrogen by the Vacuum-Heating Method. By E. W. Colbeck and S. W. Craven	298 p
Part C.—Determination of Nitrogen	302 p
(a) General Statement of Methods Available. By T. Swinden	302 p
(b) The Vacuum Fusion Method. By T. Swinden.....	303 p
(c) The Chemical Distillation Method. By T. Swinden	306 p
Section III.—Examination of Materials	321 p
(a) The production of Oxygen-Free Iron Bar. N. P.L. Iron, Mark 2. By H. A. Sloman and A. J. Cook	321 p
(b) The Surface (Oxygen) Film on Iron and Steel and its Effect on the Determination of Oxygen. By H. A. Sloman and T. E. Rooney	327 p
(c) The Examination of Several Rimming Steels by the Alcoholic Iodine Method and the Identification of Constituents of the Residue by X-Ray Methods. By T. E. Rooney and F. W. Jones	340 p
Appendix.—The Determination of Total Oxygen by Vacuum Fusion on a Residue Prepared by the Alcoholic Iodine Method. By T. E. Rooney and H. A. Sloman	348 p
(d) The Gas Content of the Raw Materials Used in Steel-making. By W. H. Hatfield, F. R. S., and W. C. Newell	351 p
(e) The Behaviour of the Oxide Constituents of Slags in Methods of Analysis for Oxygen in Steel. By W. W. Stevenson and G. E. Speight	360 p
(f) 4% Silicon Transformer Iron	377 p
(f1) Behaviour of 4% Silicon Transformer Iron in the Aluminium Reduction Method in a Hydrogen Atmosphere. By N. Gray and M. C. Sanders	377 p
(f2) Behaviour of 4% Silicon Transformer Iron in the Aluminium Reduction Method under Reduced Pressure. By C. S. Graham and C. W. Short	378 p
(g) Oxide Inclusions in British Pig Irons. By J. G. Pearce	379 p
(h) The Examination of a Series of Alloy Steels. By T. Swinden.....	383 p
Section IV.—The Determination of Oxygen and Hydrogen in Liquid Steel. By T. Swinden.....	395 p
(a) The Determination of Oxygen in Liquid Steel. By T. Swinden and W. W. Stevenson ...	397 p
(b) The Determination of Hydrogen in Liquid Steel. By W. H. Hatfield, F. R. S., and W. C. Newell	407 p
Section V.—General Summary	417 p
"The Structure and Segregation of Two Ingots of Ingot Iron, One Containing Lead." By L. Northcott	

and D. McLean	429 p
"Leaded Manganese-Molybdenum Steel." By T. Swinden. (Paper No 13/1943 of the Alloy Steels Research Committee)	441 p
"Merwinite in the System CaO-MgO-SiO ₂ " By T. W. Parker and R. W Nurse	475 p
"The Solidification and Cooling of Steel Ingots. Notes on an Examination of Three Typical Ingots." By E. F. Law and Vernon Harbord. (Paper No. 21/1943 of the Committee on the Heterogeneity of Steel Ingots)	489 p
"A Study of Austenitic Grain Growth in Medium-Carbon Steels." By J. H. Whiteley. (Paper No. 12/1943 of the Alloy Steels Research Committee)	513 p
"The Physical Chemistry of Open-Hearth Slags." By James White.....	579 p
Reply to the Discussion and Correspondence on the paper by R. L. Knight on "A Review of Basic Open-Hearth Practice at an Australian Plant"	713 p

The Journal of the Iron and Steel Institute. 1944-No. 1 Vol. CXLIX.

"Some Notes on Slags and Slag Control in Basic Open-Hearth Tilting Furnaces Using Phosphoric Iron." By A. Jackson	49 p
"Progress in the Corrosion Research Section at Cambridge University." By U. R. Evans. (Paper No. 12/1943 of the Corrosion Committee)	67 p
"Some Measurements of Corrosion-Fatigue made with a New Feeding Arrangement." By A. U. Huddle and U. R. Evans. (Paper No. 11/1943 of the Corrosion Committee)	109 p
"Note on some Unusual Microstructures Observed in Mild and Medium-Carbon Steels." By T. H. Schofield.	119 p
"The Structure of Martensite," By H. Lipson and Audrey M. B. Parker	123 p
"The Interpretation of the Crystal Structure of Cementite." By N. J. Petch	143 p
"Factors Affecting the Strength of Soldered Joints made from Electro-Tinned Steel Sheet." By A. W. Hothersall, D. W. Hopkins and G. L. Evans	151 p
"The Use of Basic-Lined Ladles in the Desulphurisation of Cast Iron by Sodium Carbonate." By N. L. Evans	171 p
"The Iron-Nickel Phase Diagram by Magnetic Analysis and the Effects of Cold-Work." By K. Hoselitz.....	193 p
"The Occurrence of the Carbide Phase in High-Silicon Iron-Carbon Alloys." By J. E. Hurst and R. V. Riley	213 p
"A Note on the Microstructure of High-Silicon Acid-Resisting Iron." By J. E. Hurst and R. V. Riley ..	221 p
"The Apparent Microstructure Produced by Hydrofluoric Acid Etching Reagents on Pure Iron and Iron-Silicon Alloys." By W. J. Wrazej	227 p
"The Effect on the Hardenability of Small Additions of Chromium and Molybdenum to a Grain-Size-Controlled 0.9% Nickel Steel" By W. Steven	239 p
"The Scaling properties of Steels in Furnace Atmospheres at 1150° C." By A. Preece and R. V. Riley. (Paper No. 14/1943 of the Alloy Steels Research Committee)	253 p
"Cleaning and Descaling Steel by Electrolytic Picking in Molten Caustic Soda." By N. L. Evans ...	275 p
"The Determination of Sulphur and Phosphorus in Pig Iron." By the Blast-Furnace Materials Analysis Sub-Committee of the Blast-Furnace Committee	301 p
"Rimming Steel.—Experiments on Melts of Rimming-Steel Composition in the Laboratory High-Frequency Furnace." By T. Swinden, W. W. Stevenson and G. E. Speight. (Paper No. 28/1944 of the Committee on the Heterogeneity of Steel Ingots).....	321 p
"Rimming Steel.—An Examination of the Carbon and Oxygen Relationship in the Solidification of Basic Open-Hearth Steel." By T. Swinden, W. W. Stevenson, and G. E. Speight. (Paper No. 24/1943 of the Committee on the Heterogeneity of Steel Ingots).....	331 p
"A Study of a Shell-Steel Ingot." By D. Binnie. (Paper No. 25/1943 of the Committee on the Heterogeneity of Steel Ingots).....	353 p
"The Examination of a Rimming-Steel Ingot Containing 0.29% of Carbon." By T. Swinden. (Paper No. 27/1944 of the Committee on the Heterogeneity of Steel Ingots)	373 p
"The Heating of Open-Hearth Furnaces with Mixed Coke-Oven and Blast-Furnace Gas." By R. W. Evans	395 p
"The Study of the Thermal Performance of Open-Hearth Furnaces by the Correlation of Operating Data." By A. H. Leckie.....	419 p
"Survey of Liquid Steel Temperatures in Basic Open-Hearth Furnaces." By D. Manterfield. (Paper No. 23/1943 of the Committee on the Heterogeneity of Steel Ingots (submitted by the Liquid Steel Temperature Sub-Committee)).....	467 p
"Barrier-Layer Photo-Electric Cells for Temperature Measurement." By T. Land. (Paper No. 6/1943	

of the Steel Castings Research Committee (submitted by the Foundry Steel Temperature Sub-Committee))	481 p
"A Thermocouple Method for the Measurement of Liquid Steel Casting-Stream Temperatures." By D. A. Oliver and T Land. (Paper No. 5/1943 of the Steel Castings Research Committee(submitted by the Foundry Steel Temperature Sub-Committee)	513 p
"The Emissivity Characteristics of Hot Metals, with Special Reference to the Infra-Red." By D. J. Price and H. Lowery. (Paper No. 7/1943 of the steel Castings Research Committee (submitted by the Foundry Steel Temperature Sub-Committee)	523 p
"The Drift of Selenium Photo-Electric Cells in Relation to their Use in Temperature Measurement." By J. A. Hall. (Paper No. 26/1943 of the Committee on the Heterogeneity of Steel Ingots (submitted by the Liquid Steel Temperature Sub-Committee)	547 p
Further discussion on the "Fourth Report of the Oxygen Sub-Committee"	585 p
"The Training of Metallurgists"	601 p

The Journal of the Iron and Steel Institute 1944-No.II Vol.CL.

"The Side Feeding of Steel Casting. A Note on the Influence of the Mechanism of Freezing." By B. Gray. (Paper No. 10/1944 of the Steel Castings Research Committee (submitted by the Foundry Practice Sub-Committee)	5 p
"The Effect of Grain Shape on the Moulding Properties of Synthetic Moulding Sands" By W. Davies and W. J. Rees. (Paper No. 8/1944 of the Steel Castings Research Committee (submitted by the Moulding Materials Sub-Committee))	19 p
"The Bonding Properties of Mixtures of Petroleum Extracts and Linseed Oil and of the Extracts Themselves." By W. Davies and W. J. Rees. (Paper No. 9/1944 of the Steel Castings Research Committee (submitted by the Moulding Materials Sub-Committee)	49 p
"The Constitution of Some Basic Open-Hearth Slags." By Brian Mason	69 p
"A Study of the Surface Film on Chromium-Nickel (18/8) Stainless Steel." By W. H. J. Vernon, F. Wormwell and T. J. Nurse. (Paper No. 15/1944 of the Corrosion Committee)	81 p
"The Magnetisation of Polycrystalline Iron and Iron-Silicon Alloys." By G. C. Richer	93 p
"Fouling of Ships' Bottoms: Identification of Marine Growths." By the Marine Corrosion Sub-Committee. (Paper No. 14/1944 of the Corrosion Committee (submitted by the Marine Corrosion Sub-Committee)	143 p
"The Influence of Melting Conditions on the Physical Properties of Steel Castings." By H. T. Protheroe. (Paper No. 11/1944 of the Steel Castings Research Committee (submitted by Professor J. H. Andrew))	157 p
"Tessellated Stresses.—Part III." By F. László	183 p
"Variable Heat Flow in Steel." By R. Jackson, R. J. Sarjant, J. B. Wagstaff, N. R. Eyres, D.R. Hartree, F.R.S., and J. Ingham. (Paper No. 15/1944 of the Alloy Steels Research Committee (submitted by the Thermal Treatment Sub-Committee)	211 p
"The Formulation of Anti-Corrosive Compositons for Ships' Bottoms and Underwater Service on Steel. The Effect of the Pigment and of the Medium." By F. Fancutt and J. C. Hudson. (Paper No. 13/1944 of the Corrosion Committee (submitted by the Marine Corrosion Sub-Committee)	269 p
"Developments in the Design and Use of Side-Blown Converter Plants." By P. C. Fassotte	339 p
"Considerations on Blast-Furnace Practice." By T. P. Colclough	359 p
Discussion on "Blast-Furnace Operation and Problems."	375 p
Discussion on "Ironmaking at the Appleby-Frodingham Works of the United Steel Companies, Limited," by G. D. Elliot and the Staffs of the Appleby-Frodingham Ironworks, Scunthorpe, and of the Central Research Department, Stocksbridge (The United Steel Companies, Ltd.). (Special Report No. 30)	453 p
