

外国最近刊行誌参考目次

J. Iron & Steel Inst. 178 (1954), part. 2, Oct.

(I) The Iron & Steel Inst.

Subcritical Decomposition of Carbide Phase in Some Low C-Si Steels. *E. D. Harry*. pp. 109-112.

Measurement and Influence of Preheat in the O.H.F. *W. P. Cashmore*. pp. 112~121.

(II) Discuss on Papers.

Discuss at the Annual General Meeting, 1954.

Soaking Pit Practice. pp.147~150.

Wear of Graphite Electrodes. pp. 150~153.

Structure of Cast Iron. pp. 153~161.

Swedish Rolling-Mill Design. pp. 161~164.

(III) Affiliated Local Soc.

Flame Radiation & O.H. Productivity. *M. W. Thring*. pp. 165~169.

(IV) Brit Iron & Steel Research Assoc.

Radioactive Measurement of Valve Leakage, Infiltration, and Blowout in O. H. F. *E. B. Bell & D. Thomas*. pp. 122~127.

Elimination of 'Stretcher Strains' in Mild-Steel Pressing. *B. B. Hundy*. pp. 127~138.

Investigations on Taphole Clays & Taphole Practice. *W. Banks & H. M. Richardson*. pp. 138~146.

(V) Iron & Steel Eng. Group.

Report of 25th Meeting —

Discuss on Treatment of Water for Iron & Steel Industry. pp. 170~177.

Discuss on Modern Industrial Boiler Plant. pp. 177~182.

Metal Progress: No. 4, Oct. 1954, Vol. 66.

Rare Earths in Stainless Steels. *Howard O. Beaver*. pp. 115~119.

Brittle Failure of Steel Structures—Factors of Importances. *M.E. Shank*. pp. 120~126.

Hydrogen Embrittlements of a Titanium Alloy. *Major R. J. Kotfila & Lt. E.F. Erbin*. pp. 128~131.

Nickle Plating From Sulphamate Baths. *Myron B. Diggin*. pp. 132~137.

Research in Canada. *Harold J. Roast*. pp. 138

~140.

Skin Milling by Chemical Solution. *Manuel C. Sanz*. pp. 141~144.

Nitrogen-Arc Welding of Copper Promises Economics. *British Welding Journal*. pp. 256-262.

— No. 5, Nov. 1954, Vol. 66.

Theory of Gas Atmospheres. *A. G. Hotchkiss*, pp. 81~86.

Exothermic Atmospheres—Their Generation and Application. *W.H. Boyd*, pp. 86~89.

Endothermic Atmosphere: *Ralph J. Perrine*, pp. 89~93.

Dry Nitrogen as a Base for prepared Atmospheres. *Donald Beggs*, pp. 94~98.

Dissociated Ammonia. *M. Robert Ogle*, pp. 99~101.

Atmosphere Analysis and Control. *Wayne L. Besselman*, pp. 102~105.

Steel Processing: Vol. 40 No. 8, August 1954.

Forging of Aircraft Gas Turbine Blades. *L. M. Raring*, p.487.

New 14,000 Ton Extrusion Press in Operation p. 495.

Stainless Steels in Brief. Part I—Roles of the Common Alloys. *Richard E. Paret*, p. 500

The Metallographic View (I) Annealed Carbon Steels. *Howard E. Boyer*, p. 505.

Refrigeration Fabrication, A Complex Process. p. 506

New Instrument Separates Metal Parts. p. 510.

Fire Protection in a Stamping Plant' Polishing System. p. 511.

Improved Carbide Cuts Machining Costs of Jet Forging. pp. 514.

Drop Hammer Forming of Aluminum Sheet. *H. Hinzman*, p. 514.

Controlled Agitation Advantageous in Hot Salt Quenching. *R. F. Harvey* p. 519.

— Vol. 40 No. 9, September 1954.

Counterblow Hammer vs. Drop Hammer, a Comparison. *J. L. Lebach and Eli Sammett*, Sammett, p. 557.

- The Metallographic View (II) Which Magnification? *Howard E. Boyer*. p. 554.
- What Do You Know about Power Brushing? Part I. *James H. Heroy, Jr.* p. 565.
- Porosity in Low Carbon Steel Tungsten Inert Arc Welds. *A. J. Rosenberg and B. Townsend*, p. 569.
- A Century of Shipbuilding at Mare Island. p. 572.
- Stainless Steels in Brief. Part II—Grade Characteristics and Common Applications. *Richard E. Paret*, p. 575.
- Contour Forming. *L. F. Spencer*, p. 579.
- Heat Treatment of Aircraft Gears in Continuous Furnaces. *C. A. Payntor*, p. 585.
- Vol. 40, No. 10, October 1954.
- National Metal Congress and Exposition Meets in Chicago. pp. 629.
- Metal Congress Technical Programs. p. 635.
- List of Exhibitors. p. 637.
- What Do You Know about Power Brushing? —Part II. *James H. Heroy, Jr.* p. 639.
- The Metallurgical View—Part III—Recrystallization and Grain Growth After Cold Working. *Howard E. Boyer*. p. 644.
- Management Considerations In Production Quality Control. *C. A. Bicking*. p. 645.
- Contribution to the Study of Heterogeneity of Forging Ingots. *M. Nepper*. p. 647.
- Fabrication Study Points to Increased Titanium Applications. *W. P. Brotherton*. p. 650.
- Gas vs. Oil vs. Gas-Oil Mixtures for Forging. *R. J. Reed*. p. 653.
- Vol. 40, No. 11, November 1954.
- Billet Separation by the Shear-Fracture Method. *W. C. Tucker*. p. 695.
- Restoration of America's First Ironworks Completed. p. 699.
- Lubricants for Press and Forge Equipment. *A. A. Paul*. p. 703.
- The Metallographic View—IV—Rearlite. *Howard E. Boyer*. p. 705.
- ABC's of Ultrasonic Inspection. *E. F. Weller, Jr.* p. 706.
- Industrial Applications of Atomic Energy. *Alfonso Tammaro*. p. 715.
- Automatic Furnace Line Highly Versatile in Forge Shop Heat Treating. *W. F. Herdrich*. p. 723.
- Iron and Steel Engineer Vol. 31, No. 5, May 1954
- A New Theory of Hot Rolling. *George S. Mican*. p. 55.
- The Electric Furnace West of the Rockies. *W. B. Wallis*. p. 80.
- Estimating Motor Room Installation Costs. *Wray Dudley*. p. 87.
- Application of Bronze Bearing Alloys. *James L. Duchene*. p. 92.
- Crane Power Limit Switches. *R. W. Graham*. p. 98.
- Current AISE District Section Meeting Notices. pp. 108.
- New Soaking Pit Facilities at Steel Division of Ford Motor Co. *B. D. Barns*. p. 109.
- Problems in Developing Alloy Steels for Aircraft Gas Turbines. *F. L. Ver Snyder*. p. 115.
- AISE Spring Conference Pictorial Review—1954 p. 124.
- Adjustable Voltage Coal Bridge Installed at Steel Co. of Canada. *W. G. Wright and D. C. McGrady*. p. 126.
- Power Generation Expansion. *Harold I. Howell*. p. 132.
- New Process Developed to Form Metals. p. 137.
- Pittsburgh Steel Completes Cold Mill Facilities. p. 141.
- U. S. Steel Unveils New Coal Mining Machine. p. 145.
- Tips on Battery Room Layout. *K. A. Vaughan*. p. 148.
- Vol. 31, No. 7, July 1954.
- Control and Drive Equipment on D-C Electric Traveling Crane Bridges. *D. C. McGrady*. p. 55.
- Coke Plant and Blast Furnace Expansion at Fontana. *Clarence R. Lohrey*. p. 67.

Combination Fuel Firing of Boiler Plant.
Clarence J. Webster. p. 70.

Combination Bar and Rod Mill—Los Angeles Plant. *C. C. Brandt.* p. 72.

Trends in Blast Furnace Linings. *Hobart M. Kraner.* p. 79.

Electric Systems for Main Drives. *E. E. Miller.* p. 83.

Cleaning of Open Hearth Checkers and Sewers During Operation. *R. M. Jordan.* p. 98.

Preliminary program—1954 AISE Annual Convention and Exposition. p. 103.

Trends in Recent Cold Mill Installations. *R. E. Noble.* p. 105.

Power from Atomic Energy. *Charles H. Weaver.* p. 119.

National Bureau of Standards Studies Refractory Castables. p. 135.

Isotopes Use Increased in Metals Studies. p. 130.

— Vol. 31, No. 8, August 1954.

Metallurgical Recuperators in the Steel Industry. *E. A. Vierow.* p. 57.

Tension Regulator on Kaiser Temper Mill. *W. R. Harris.* p. 71.

Improved Cleaning Techniques for Open Hearth Checkers. *J. J. Enochs.* p. 79.

Import Ore Handling—Machines and Practices. *Erle M. Hays.* p. 84.

Program, 1954 AISE Annual Convention. p. 95.

Air Pollution Control in the Bethlehem Steel Co. *Allen D. Brandt.* p. 103.

Recent Advancements in Continuous Butt and Induction Weld Pipe Mills. *William Rodder.* p. 108.

Transformers for the Steel Industry—Transformer Materials. *D. C. Graham and L. R. Bronlund.* p. 118.

The Application of Transformers in the Steel Industry. *L. G. Levoy.* p. 124.

Power Transformer Preventive Maintenance in the Steel Industry. *E. A. Elge.* p. 128.

Program of the American Iron and Steel In-

stitute. pp. 136.

Modernization of Skelp Mill at Wheeling Steel's Benwood Works. *S. W. Crisman.* p. 148.

The Electric Ingot Process. p. 154.

Japanese Steel Stages Comeback. p. 161.

— Vol. 31, No. 9, September 1954.

Patent Reviews. *Melvia Nord,* Patent Attorney, Detroit, Mich. p. 29.

Crops and Shorts. p. 71.

Ultrasonics in Maintenance Planning and Product Quality Control. *R. L. Rectenwald.* p. 77.

Economy Realized Through Strain Gage Checks. *R. P. Gibson.* p. 88.

Metallurgical Aspects of Plant Maintenance. *T. G. Bradbury.* p. 90.

Productive Maintenance. *A. K. King.* p. 98.

Transformer Maintenance. *B. L. Britt.* p. 101.

Field Repair of Large Rotating Machinery. *M. J. Wohlgemuth.* p. 106.

Rebuilding Steel Mill Rolls. *Robert Hall.* p. 109.

Economical Roll Reclamation. *J. Goldstein.* p. 112.

Maintenance Aspects of Corrosion Program at Fairless Works. *K. L. Johannsen.* p. 115.

Daily Maintenance Cost Control—the Foreman's Tool. *W. B. Carter.* p. 123.

Program—1954 AISE Annual Convention and Iron and Steel Exposition. p. 128.

Abstracts of Technical Papers at AISE Annual Convention p. 13.

Use of Models for Layout and Planning. *J. C. Montoro.* p. 154.

Applications for Laminated Fabric Bearings. *R. L. Berry.* p. 161.

Factors Affecting Performance of High Temperature Greases. *Eldon L. Armstrong.* p. 167.

Steel Mill Lubrication Problems. *A. C. Keiser, Jr.* p. 177.

Oilless Bearing—Their Place in Industry. *Charles D. Spadone.* p. 185.

Helper Drives Help Steel Processing Lines.

E. E. Vonada. p. 192.

Two-high/Four-high Combination Mill Aids Rolling Research. *A. I. Mussbaum*. p. 199.

Electrical Equipment for New planetary Rolling Mill. p. 207.

New Combination Rod Mill will Develop High Speed. *A. F. Kenyon*. p. 210.

Newport Steel Completes Reversing Hot Mill. p. 215.

Hose Check List. *J. A. Muller*. p. 218.

— Vol. 31, No. 10, October 1954.

Patent Reviews: *Meivin Ford*, Patent Attorney. p. 23.

The Economics of Replacement in the Steel Industry. *G. G. Beard*. p. 55.

Pumpability of Steel Mill Greases—Part I. *J. S. Aarons*. p. 67.

Part II. *R. G. Warren* p. 71.

Activated Alumina for the Maintenance of Gas Engine Crankcase Oils. *Dr. L. B. Sargent, Jr.* p. 73.

Atomization of Liquid Fuels by High Pressure Natural Gases. *George Grosvenor*. p. 77.

Temper Mill Control. *George P. Dirth*. p. 81.

AISE Annual Convention—Pictorial Review. p. 94.

Processing and Drawing of Steel Wire. *P. A. Beaman*. p. 96.

Application of Magnetic Amplifiers. *Robert J. Weesner*. p. 101.

Use of Low Pressure Carbon Dioxide for Fire Control. *H. V. Williamson*. p. 107.

Use of High Velocity Burners for Edge Heating Skelp. *G. J. Campbell*. p. 111.

Design and Application of Conveyor Belts for the Steel Industry. *Donald T. Scheu*. p. 117.

Current AISE District Section Meeting Notices. p. 123.

AISE Kelly Award Winners. p. 124.

U.S. Steel Expands Continuous Annealing Facilities. *G. J. Hay*. p. 127.

Inland Steel Solves Firebrick Handling Problem. p. 128.

Restriction Completed on First Ironworks in U. S. p. 133.

Vertical Tin Plate Annealing Furnace Line to go to Wales. p. 137.

A Continuous Billet and Slab Grinding Line. *James MacGregor*. pp. 138.

Tandem Cold Mill Completes Rebuilding Program at Allegheny Ludlum. p. 141.

— Vol. 31, No. 11, November 1954.

Uses of Resistance Wire Type Strain Gages in Steel Plants. *W. A. Black*. p. 57.

A Mechanical Extrusion Press for Producing Tubes and Bars. *Astor L. Thurman*. p. 64.

Jones & Laughlin—Pittsburgh Works. *T. J. Ess*. p. 75.

Mechanical Features of Bar and Rod Mills. *E. C. Peterson* p. 103.

Effect of Secondary Checkers on Open Hearth Furnaces. *H. S. Hall*. p. 112.

Modern Methods of Communication at Lukens Steel Co. *Gilbert P. Cardwell*. p. 127.

Extensions to Electrical Generating and Distribution Systems at Bethlehem's Sparrows Point Plant. *H. D. Ruger*. p. 133.

Lubrication Practices at Alan Wood Steel Co. *R. G. Leister*. p. 138.

Current AISE District Section Meeting Notices. p. 143.

AISE District Chairmen 1954~1955. p. 144.

Multiple-Package Power and Control for Processing Lines. *E. E. Vonada*. p. 147.

Atlas Steel Incorporates Many New Developments in Expansion Program. p. 153.

Plate Heat Treating Line to be Installed at Lukens Steel. p. 164.

Rod Coil Handling at Continental Steel Co. *Walter Boehm*. p. 164.

Lubricant Aids in Maintenance of Steel Plant Railroads. *Joseph A. Rigby*. p. 171.

Stahl u. Eisen: Heft 23 (1954) 4. Nov.

Der neue Großhochofen der Westfalenhütte Dortmund AG. *W. Wolf, F. Heppner, W. Güldner u. P. Wolf*. p. 1456~1464.

Verhütten von Erz-Kohle-Mischbriketts im

- Niederschachtofen. *E. E. Hofmann* .pp. 1464
1468.
- Die Bedeutung von Schwefelkiesabränden für
die Eisenindustrie. *H. Schackmann*. pp. 1468
~1473.
- Verflasen von Stahleisen mit sauerstoffanger-
eicherten Wind im bodenblasenden Konver-
ter. *H. Kosmider, H. Neuhaus u. A. Weyel*.
pp. 1473~1485.
- Vom Thomasroheisen bis zum Stahlroheisen
im basischen Konverter. *E. Eickworth u. T.
Kootz*. pp. 1486~1492.
- Herstellungsverfahren von warm gewalztem
Breitwand, unter besonderer Berücksichti-
gung der Steckelstraße. *H. Winterkamp*. pp.
1492~1502.
- Strömungsverhältnisse und Wärmebilanz neu-
zeitlicher Tieföfen. *A. Schack*. pp. 1502~1509
- Versuche zum Erschmelzen von reinen Eisen
im Hochvakuum. *F. Wever, W. A. Fischer u.
H. Engelbrecht*. pp. 1515~1521.
- Der Einfluß von Sauerstoff auf Gefüge und
Alterung von reinem Eisen. *F. Wever, W. A.
Fischer u. H. Engelbrecht*. pp. 1521~1526.
- Zusammenhang zwischen Bruchaussehen und
Steilabfall der Kerbschlagzähigkeits-Tempe-
ratur-Kurve bei weichen Stählen. *H. Kornfeld*
pp. 1526~1536.
- Heft 24 (1954) 18. Nov.
- Die Gas- und Oxydgehalte von Eisenguß aus
dem Kupolofen und ihre Beeinflussung durch
die Schmelzstoffe. *P. Bardenheuer u. Peter von
der Forst*. pp. 1577~1582.
- Die bisherige Entwicklung ölgeuerter Siemens-
Martin-Öfen in Osterreich. *F. Hönig*. pp. 1583
~1591.
- Zur Tiefziehprüfung an dünnen Bandern. *A.
Krisch*. pp. 1591~1594.
- Stoffwirtschaftliche Überwachungen mit der
"Chargen-Evidenzführung" (Stoffbilanzje Sch-
melze.) *G. Strohmeier*. pp. 1594~1602.
- Revue de Metallurgie (Sommaire des Memoires)**
51 Annee No. 8, Aout 1954.
- La fin du Néolithique et l'apparition des mé-
taux. *A. A. Sanfourche*. p. 517.
- Alliages de tifane et de silicium. *D. A. Sutcl-
iffe*. p. 524.
- Détections des discontinuités dans les tubes
métalliques par courants électriques induits
G. Gauthier. p. 537.
- Sur le durcissement secondaire dans un acier
au chromemolybdène (avec discussion).
L. Habraken. p. 541.
- Observations sur le palier élastique des aciers
(avec discussion). *Robert de Strycker*. pp. 551.
- Quelques applications du sondage ultrasono-
scopique *L. Beahjard*. p. 558.
- Sur la viscosité des laitiers de hauts fourne-
aux. *Paul Kozakevitch*. p. 569.
- Informations scientifiques. pp. 588.
- 51 Annee No. 9, Septembre 1954.
- Recristallisation de l'uranium après passage
des points de transformation. *M. Pruna, P.
Lehr et G. Chaudron*. pp. 589.
- Sur l'orientation des cristaux dans l'uranium
lamine (avec discussion). *A. Winogradski*. p.
597.
- Etude du recuit de l'uranium laminé (avec
discussion). *G. Cabane et J. Petit*. p. 603.
- Etude métallographique de la transformation
 β - α de l'uranium dans les alliages stabilisés
uranium-chrome. *B. W. Mott et H. R. Haines*.
p. 614.
- Etude métallographique des inclusions d'hy-
drure d'uranium dans l'uranium métallique.
H. Mogard et G. Cabane. pp. 617.
- Remarques sur la solidification et l'efferves-
cence de lingots d'acier Thomas pesant 4,6 T
(avec discussion). *J. Duflot et A. Richard*.
p. 623.
- Développement actuel des travaux sur la struc-
ture des silicates fondus. *J. O'M. Bockris
et J. D. Mackenzie*. pp. 658.
