

外国最近刊行誌参考記事目次

Journal of the Iron and Steel Institute Vol. 190
(1958) Part 3

Continuous Casting of High-speed Steel.

H. C. Waters, et ali. pp. 233~248

Contents of Some Commercial Grades.

N. Christensen, et ali. pp. 248~254

Open-hearth Furnace Regenerators: A Survey of Theoretical and Experimental Work with Recommendations for the Calculation of Pre-heat. *B.I.S.R.A. Regenerator Group*, pp. 254~271

A Study of the Compatibility of Some Creep-resistant Steels with Liquid Bismuth in Non-isothermal Systems, *D. W. Dawe, et ali.* pp. 271~276

Variation on Fatigue Properties over Individual Casts of Steel: Part II (Investigation of a Cast of Steel to B.S.S. 970 En 24) *E. Ineson, et ali.* pp. 277~283

Iron & Steel Vol. 31 (1958) No. 12

High Speed Steel: Development of a New Type with 5%W and 5%V. *P. Kövesi*, pp. 529~533

Blast Furnace and Steel Plant Vol. 46 (1958)
No. 12

Report on "E" Blast Furnace, Tenth Lining. *J. W. Carlson, et ali.* pp. 1279~1286

Continuous Annealing of Tin Plate. *R. A. McClure*, pp. 1287~1291

Metal Progress Vol. 74 (1958) No. 4

Preview of Space Metals. *Staff Report*, pp. 96~113

What's New in Everyday Uses for Metals. *J. A. Nock and others*, pp. 114~129

Detroit Revisited-Appraisal of Recent Metallurgical Advances in American Automobile Manufacturing. *J. L. McCloud*, pp. 130~133

Potential of Higher Temperature Carburizing. *Staff Report*, pp. 134~139

Metallography of Disturbed Uranium Surface. *H. P. Roth and R. B. Russell*, pp. 140~141

Polishing Hard Metals Electromechanically. *J. M. Dickinson*, pp. 142~144

Polishing by Vibration. *E. L. Long and R. J. Gray*, pp. 145~148

— 74 (1958) No. 5

Forming Metals at High Velocities.

T. C. DuMond, pp. 68~76

High-Temperature Metallurgy Today.

L. P. Jahnke and R. G. Frank, pp. 77~82

Two New 1800°F Alloys for Cast Turbine Blades-Nicrotung and DCM Alloys. *J. T. Brown and J. E. Wilson*, pp. 83~87

Tempering Type 410 Stainless Steel. *C. F. Lewis*, pp. 88~89

Babbitting Bearings by Centrifugal Force.

W. B. Keyser, pp. 90~91

Producing Martensite by impact. *H. O. McIntire and G. K. Manning*, pp. 94~95

How to Make More Steel. *Staff Report*, pp. 97~99

Quality Control in Specialty Steel Production. *J. S. Pendleton and H. O. Beaver*, pp. 100~103

Edge Welding Small Containers. *D. W. Grobcher*, pp. 104~107

Heat Program Timer Improves Resistance Welds. *B. B. Stuart*, pp. 109~110

Where Do We Stand in Ceramic Coatings? *N. I. Cannistraro*, pp. 111~113, 189, 190

Metallurgical Reviews 3 (1958) No. 11

Fatigue of Metals Caused by a Relatively Few Cycles of High Load or Strain Amplitude. *P. P. Benham*, pp. 203~234

The Mechanism of Diffusion in the Solid State. *C. E. Birchenall*, pp. 235~277

Design from the Viewpoint of Corrosion. *W. D. Clark*, pp. 279~325

La Métallurgie 90 (1958) No. 11

Practical Organization of Statistical Control of Steel Founding. *P. Destable*, pp. 849~855

Ascertainment of the Decisive Factors in the Sensitivity of Alloys to Oxidation. *A. Roos*, pp. 857~861

The Physiology of Man at Work. *B. Hedde D'entremont*, pp. 865~866

Stahl und Eisen 78 (1958) Heft 23

- Verwertung von Gasschlamm. *Bernhard Weilandt, et ali.* s. 1657~1662
- Die chlorierende Behandlung von Feinerzen beim Sinterverfahren. *Herbert Neuhaus, et ali.* s. 1662~1670
- Automatische Überwachung der Thomasschmelzen. *Karl Ernst Mayer, et ali.* s. 1670~1676
- Betriebserfahrungen mit Ölbeheizten Stossöfen. *Rudolf Müller, et ali.* s. 1676~1678
- Neuere Untersuchungen Über den Zusammenhang zwischen der Spanentstehung und dem Standzeitverhalten beim Drehen von Stahl mit Hartmetall-Legierungen. *Günter Weber,* s. 1678~1690
- Versuchs Schmelze in einem vorgeschichtlichen Rennofen. *Josef Wilhelm Gilles,* s. 1690~1695
- 78 (1958) Heft 24
- Aus der Arbeit des Vereins Deutscher Eisenhüttenleute. *Kurt Thomas,* s. 1730~1773
- Die Endgehalte von Bad und Schlacke beim Thomasverfahren. *Franz Weber,* s. 1734~1745
- Einsatzhärtung von Automatenstählen. *Alexander Schepers, et ali.* s. 1745~1748
- Die Ergebnisse neuer Ausgrabungen an vor- und frühgeschichtlichen Eisenhüttenplätzen in Böhmen und Mähren. *Radomir Pleiner,* s. 1748~1754
- Archiv für das Eisenhüttenwesen 29 (1958)
- Heft 10
- Über die Geschwindigkeit der Reduktion von Eisenoxyd mit Wasserstoff. *Ludwing von Bogdandy und Hans-Günter Riecke,* s. 603~609
- Gleichgewichtsuntersuchungen zwischen Dolomit, Eisen(II)-oxydschlacken und Eisenschmelzen. *Wilhelm Anton Fischer und Horst Spitzer,* s. 611~617
- Übergroße Spektralgeräte und ihre Anwendung bei der Untersuchung von Eisen und Stahl. *Georg Graue, Siegfried Eckhard und Robert Marotz,* s. 619~626
- Untersuchung an durch Warmwalzen verformbaren Oxydeinschlüssen in unberuhigten Weichstählen. *Heinz Lessing und Hanns Malissa,* s. 627~629
- Zur Entschwefelung und Desoxydation von Reinst Eisen beim Vakuumschmelzverfahren. *Walter Jäniche und Herbert Beck,* s. 643~651
- Einfluß der Temperatur bis 1000°C auf die Mikrohärtigkeit von Eisen und Eisenlegierungen. *Hermann Schenck, Eugen Schmidtmann, Helmut Brandis und Karl Winkler,* s. 653~660
- Temperaturabhängigkeit der Hysteresisschleife einer Eisen-Chrom-Legierung mit 24% Cr. *Albrecht v. Kienlin,* s. 661~662
- Zur Thermodynamischen Analyse. X. Kalorimetrie und Thermodynamik der Blei-Wismut-Legierungen. *Willy Oelsen und Ruth Bennewitz,* s. 663~672
- Stali (1958) No. 11
- An Experience in Operation of a Blast Furnace at 1.5 atm Gage Top Pressure. *L. Ja. Levina, et ali.* pp. 964~968
- The Experience in Smelting Ferrosilicon from the Krivoy Rog Iron Ores. *B. M. Nosovitsky, et ali.* pp. 969~976
- About the Expediency of Smelting Ferrosilicon in Blast Furnace. *Ju. S. Maksimov, et ali.* pp. 976~978
- Production of Various Grade Steels in Basic Converters when Blowing Oxygen from the Top. *S. I. Lifshits,* pp. 979~983
- Semicontinuous Casting of Stainless Steel. *M. S. Boichenko, et ali.* pp. 983~987
- The Balance Sheet of an Experimental Melt in an Oxygen Blown Converter. *P. Ja. Sorokin,* pp. 987~992
- Investigation of a Metal Stream by Means of Rapid Filming. *A. G. Il'in et ali.* pp. 994~995
- Stirring of an Open-Hearth Furnace Bath by Means of Rotating Magnetic Field. *G. A. Ostroumov,* pp. 999~1002
- The Main Trends in Development of Steel Rolling and Tube Production in the Nearest Years. *A. I. Tselikov,* pp. 1005~1011
- Tube-Billet Mill of the Dzerzhinsky Iron and

- Steel Works. *G. E. Tsukanov*, pp. 1012~1017
- Production of Tubes with Internal Plating Coating. *S. A. Grinberg*, pp. 1018~1020
- Conditions for Successful Application of Open Type Passes when Rolling Angles. *V. K. Latsura*, pp. 1020~1022
- Low-Texture Cold-Rolled Electrotechnical Steel. *A. A. Rastorguev, et ali.* pp. 1023~1029
- Heat Treatment of Cold-Rolled Dynamo Steel in Coils. *M. I. Kolov, et ali.* pp. 1029~1035
- Hutnickè Listy XIII (1958) Císlo 4
- A Study upon Crystallization of Dendrites from Aqueous Solutions. *V. Koselev*, pp. 299~308
- Transformation Diagrams of Continuous Cooling for 9 Czechoslovak Steels. *J. Vána*, pp. 308~313
- Geleji Formula for the Determination of Average Specific Pressure on Hot Rolling. *L. Helebrand*, pp. 313~315
- Thermogravimetric Analysis on Isolating Structural Constituents of Steels and Alloys and Pyrolytic Curves of Carbides. *H. Tūma*, pp. 315~319
- XIII (1958) Císlo 5
- 50 Years of Steel Production in Induction Electric Furnaces in Czechoslovakia. *R. Stefec*, pp. 389~397
- Deoxidation of Open-Hearth Steel during Duplex Process. *R. Stefec, et ali.* pp. 397~402
- Reduction of Hydrogen Content in Electric Steel. *N. Chvorinov*, pp. 402~406
- Effect of Ni, Cu and Mn on the Spheroidization of Cementite in Ball-Bearing Steels. *R. Stefec, et ali.* pp. 407~412
- Contribution to the Problem of Fissure Tendency on Rolling Semiferritic Chromium Steel. *M. Zezulová, et ali.* pp. 412~418
- Alloying of Steel with Boron by Means of Reduction from its Oxide Compounds. *J. Skála, et ali.* pp. 418~421
- XIII (1958) Císlo 6
- Automatic Control and Regulation in Coke Works. *M. Gottwald*, pp. 481~490
- Oxidation of Fe-Al-C Alloys. *M. Vyklicky, et*

- ali.* pp. 490~495
- Potentiostat in Metallography. *V. Cihal, et ali.* pp. 496~502
- Mechanical Properties of the Hardened Layer of Chilled Rolls. *R. Kamensky*, pp. 502~505
- The Morphology of a Brittle Structural Component Formed During Resistance Welding of Low-Carbon Steels. *D. and I. Hrivnák*, pp. 512~517
- Contribution to the Problem of the Longitudinal Cracks Formation in Rail Foot after Straightening. *S. Horejs*, pp. 517~526
- Electron Microscopic Structural Analysis. *I. Hrivnák*. pp. 526~533

国内最近刊行誌参考記事目次

—学協会誌—

日本金属学会誌 vol. 22 (1958) No. 12

- ¹⁸²Ta および ⁹⁵Nb を利用した鉄鋼中の Ta および Nb の定量法の影響. 矢野 恕...625~628
- 焼入油の冷却能におよぼす水分の影響. 多賀谷正義, 他...629~631
- 焼入液の冷却能におよぼす流動速度の影響. 多賀谷正義, 他...631~640
- 鋼材の加熱条件と tramp elements の表面富化. 大竹 正, 他...640~644
- 高温, 真空中における炭素鋼の摩耗. 三好栄次...644~648
- 熔融鋼滓の平衡理論 (I) 熔融珪酸塩系の平衡. 吉田秋登...656~660

鑄物 vol. 30 (1958) No. 12

- ガス吹き込みによる鑄鉄の研究 (I) 佐藤 薫... 935~947
- 鑄鉄のセリウム処理に関する若干の観察. 本間正雄... 947~953
- 格子型鑄物の湯流れと凝固について. 大平五郎... 967~973

熔接学会誌 vol. 27 (1958) No. 12

- 鋼材の熔接諸条件と冷却時間 (I) 稲垣道夫... 716~722
- 熔接熱サイクル再現装置による鋼の熱影響部の冶金的研究 (IV) 鈴木春義, 他...723~729
- 高張力鋼熔接変質部の冷却状況と顕微鏡組織および硬度 (V) 関口春次郎, 他...730~736
