

**Preprints for the 61st Grand Lecture Meeting of
The Iron and Steel Institute of Japan***

C O N T E N T S

Lect. No.	T i t l e	Lecturer
1	On Operation Results of Tobata No.1 Blast Furnace for a Year after Blowing-in.	<i>Kozi YASUDA, et alii</i>215
2	New Equipments of No.3 Blast Furnace in Hirohata Works.	<i>Akira HASEGAWA</i>217
3	On the Effect of Blast Temperature on Productivity and Coke Ratio in Blast Furnace Operation.	<i>Yooichi HAYASHI, et alii</i>219
4	On the Temperature Difference between Tuyeres of Kamaishi No.1. Blast Furnace.	<i>Takeo YASTUZUKA, et alii</i>221
5	Studies on Blowing-in of Blast Furnaces.....	<i>Yukihiro ABE, et alii</i>223
6	On the Foundry Pig Iron Making Performance after 2nd Rebuilding in No.1 Blast Furnace at Amagasaki Works. ...	<i>Sigeo KAMATANI, et alii</i>225
7	Blast Distribution into Blast Furnace Tuyeres.	<i>Takehiro HORIO, et alii</i>227
8	On the Influences of Theoretical Combustion Temperature upon Operating Conditions.	<i>Shin HASHIMOTO, et alii</i>229
9	Outline of Equipments in No.1 Blast Furnace of Osaka Steel Mfg. Co. (On the equipment and operation data in No.1 blast furnace of Osaka Steel Mfg. Co.— I)	<i>Jituzo HIRABAYASHI, et alii</i>232
10	Operation Data of No.1 Blast Furnace of Osaka Steel Mfg. Co. (On the equipment and operation data in No.1 blast furnace of Osaka Steel Mfg. Co.— I).....	<i>Toshio NIINOMI, et alius</i>234
11	On Preparation of All Self-Fluxing Sinter of Osaka Steel Mfg. Co. (On the equipment and operation data in No.1 blast furnace of Osaka Steel Mfg. Co.— II)	<i>Toshio HIRAI, et alius</i>236
12	Manufacture of Foundry Pig Iron by Acidic Operation.	<i>Seiji HORI, et alii</i>238
13	Construction of Tobata No.1 D.L.-Type Sinter Plant.	<i>Haruhisa NAGASHIMA, et alii</i>240
14	Testing for D.L.-Type Sinter Plant Assessment at Hirohata Works.	<i>Michio YASUNAGA, et alii</i>241
15	Studies on the Self-Fluxing Sinter Prepared from Hematite Ores. ...	<i>Akio CHIDA, et alii</i>243
16	Effect of Coarse Grains on the Productivity of Iron Ore Sintering.	<i>Kazuo MIYAGAWA</i>246
17	On the Suitable Size of Raw Materials for Sinter.	<i>Kazuo MIYAGAWA</i>247
18	On the Sintering Test of Manganese Ore. (Study on preparation of burdens for an electric arc-furnace for ferro-alloy smelting— I)	<i>Katsumi KAKIUCHI, et alii</i>249
19	Fundamental Factors and Testing Methods for Production of Pellets.	<i>Shiro MIYAZAKI, et alius</i>251
20	On the Experiments for Industrial Production of Iron Ore Pellets. (Study on iron ore pellets— I)	<i>Wataru IWAHASHI, et alii</i>253
21	On Industrial Production of Iron Ore Pellets. (Study on iron ore pellets— II)	<i>Hachiro TSUKAMOTO, et alii</i>255
22	Study on the Use of Sand Iron for an Experimental Blast Furnace.	<i>Koretaka KODAMA</i>257
23	Study on Direct Reduction of Titaniferous Iron by a Rotor.	<i>Atsumi FUKUDA, et alius</i>261

* To be held on Apr. 3~4, 1961, at Waseda University, Tokyo.

24	Characteristics of Volatile Matter of Coke.	<i>Shiro</i> IDA, <i>et alii</i>	263
25	Sulphur in Coking Coals.	<i>Yoshiaki</i> MIURA, <i>et alius</i>	265
26	Production of Lower-Sulphur Coke and the Result of Blast Furnace Operation in Using it.	<i>Minoru</i> NAKAHARA, <i>et alii</i>	268
27	Reducing Velocity of Massive Iron Ore.	<i>Akitoshi</i> SHIGEMI, <i>et alii</i>	270
28	The Mechanism of Reduction of Iron Ore. (Fundamental studies on iron ore reduction—Ⅵ)	<i>Akira</i> KONDŌ, <i>et alius</i>	272
29	Rate of SiO ₂ Reduction by Molten Iron.	<i>Yoshinobu</i> KATSUFUJI, <i>et alius</i>	274
30	Fluidized-Bed Reduction of Sand Iron by Water Gas.	<i>Minoru</i> TANAKA, <i>et alii</i>	275
31	Partial Pre-Reduction of Iron Ore (Pellets of Pyrite Cinder) by Blast Furnace Gas.	<i>Seiichi</i> YASUI, <i>et alii</i>	277
32	Some Experience on Reduction of Manganese Ore.	<i>Fumitada</i> NAKATANI, <i>et alii</i>	279
33	The Activity of Lime in Blast Furnace Type Slags.	<i>Kiyoshi</i> SAWAMURA....	282
34	On the Relation between Desulphurizing Power and Activity of Lime in Slags.	<i>Kiyoshi</i> SAWAMURA....	283
35	Interaction Parameters of N and H in Liquid Iron.	<i>Masayasu</i> OHTANI, <i>et alius</i>	284
36	On the Removal of Zinc in Dust from an Open Hearth Furnace by Chlorinating Roasting. (Research on the treatment of iron industry dust—Ⅱ)	<i>Katsumi</i> KAKIUCHI, <i>et alii</i>	286
37	On the Microscopic Structure of Luppe and Sponge Iron.....	<i>Kyoichi</i> SATO, <i>et alii</i>	288
38	On the Activity of Carbon in Molten Iron and Effects of Various Elements on it. (Studies on the behavior of various elements in molten iron—Ⅰ)	<i>Yôichi</i> ONO, <i>et alius</i>	290
39	Rapid Analysis of Molten Steel in L. D. Converter Steelmaking....	<i>Mutsumi</i> IHIDA, <i>et alii</i>	293
40	Rapid Determination of Carbon in Steel by a Conductometric Method.	<i>Hideo</i> IWATA, <i>et alii</i>	294
41	Quantovac Analysis of Iron and Steel (Carbon Steels)	<i>Yutaka</i> MANABA, <i>et alius</i>	296
42	Determination of SiO ₂ , Fe ₂ O ₃ , Al ₂ O ₃ , MnO, CaO and MgO in Limestone, Dolomite, etc.	<i>Shigeo</i> WAKAMATSU....	298
43	On the Determination of Oxygen in Stainless Steels by Vacuum-Fusion Method.	<i>Waro</i> SEKIMOTO, <i>et alii</i>	300
44	Outline of a Trially Manufactured Oxygenmeter and its Some Applications. (Studies on an oxygenmeter for molten steel—Ⅰ).....	<i>Masato</i> NAKAMURA, <i>et alius</i>	302
45	Rapid Determination of Slag Basicity by Centrifugal Analysis.	<i>Kiichi</i> SAKANOUÉ, <i>et alius</i>	304
46	On the Luppe as Steelmaking Material.	<i>Eidô</i> NAKAZATO, <i>et alius</i>	306
47	On Adaptability of Open Hearth Oxygen Steelmaking to a Change of Pig Ratio.	<i>Gengo</i> MONMA, <i>et alii</i>	308
48	Study on an Optimum Allotment of Oxygen in Open Hearth Furnace Plants.	<i>Etuo</i> NISHIMURA, <i>et alius</i>	310
49	A Model Experiment on a Roof-Oxygen-Lance of an Open Hearth Furnace.	<i>Junichi</i> MATSUNO, <i>et alii</i>	313
50	On Enlargement of Capacity of an Open Hearth Furnace and its Construction.	<i>Motoji</i> ÔTA, <i>et alius</i>	315
51	Construction and Operation of an Open Hearth Furnace with a Roof of All-Basic Suspended Block Type.	<i>Kichinosuke</i> MATSUNAGA, <i>et alii</i>	317

52	On Control and Maintenance of the Bottom an Open Hearth Furnace.	<i>Shigetoshi SAKAI, et alii</i>319
53	On the Chromium Balance in an All-Basic Open Hearth Furnace.	<i>Hideo MATSUOKA, et alii</i>320
54	On the Desulphurization and Dephosphorization in Basic Open Hearth Steelmaking. (Studies on the basic open hearth steel production— I)	<i>Takao SASABE</i>322
55	On the Mechanism of Decarbonization in Basic Open Hearth Steelmaking. (Studies on the basic open hearth steel production— II)	<i>Takao SASABE</i>324
56	Influence of Some Refining Processes of Basic Open Hearth Steelmaking on Oxygen Content of Liquid Steel.	<i>Masato NAKAMURA, et alius</i>326
57	On the Oxygen in Molten Steel in a Basic Open Hearth. ...	<i>Takashi MATSUKURA, et alius</i>328
58	On the Behavior of Phosphorus in the 150t Tilting Open Hearth Furnace.	<i>Yasuhisa ABE, et alii</i>330
59	Studies on the Behavior of Nonmetallic Inclusions in Molten Steel during the Refining Process with Basic Open Hearth Furnaces.	<i>Takehiro IWATA, et alius</i>331
60	On the Behavior of Nitrogen in Low-Carbon Rimmed Steel.	<i>Yo ITO, et alii</i>333
61	On the Layout of the New Oxygen-Converter Plant at Hirohata Works.	<i>Eiji HIRAO, et alii</i>335
62	Erection of the Oxygen-Converter Works at Amagasaki.	<i>Yoshimasa AOYAMA, et alius</i>337
63	Extension of the Oxygen-Converter Plant at Tobata, Yawata Works.	<i>Minoru NISHIWAKI, et alius</i>339
64	Some Problem in Mechanical Running at an Oxygen-Converter Plant.	<i>Matasaburo SATO, et alius</i>341
65	On the Wearing Mechanism of L.D. Converter Linings.	<i>Kiyoshi SUGITA, et alius</i>343
66	Production of Superior Low Phosphorous High-Carbon Steel with an Oxygen-Converter.	<i>Kazuo WAKABAYASHI, et alii</i>345
67	Production of Ship Plates with an Oxygen-Converter.	<i>Toyoaki YAMAGUCHI, et alii</i>348
68	Determination of the End Point in L.D. Process.	<i>Masaharu ITO, et alii</i>350
69	Study of the Profile and Blowing Conditions of the L.D. Converter.	<i>Masae ISHIBASHI, et alii</i>352
70	Aerodynamic Study on the Top-Blowing Converter.	<i>Hidefumi HASHIMOTO, et alii</i>353
71	A Study on Dephosphorization of an L.D. Converter. (In relation to the change of physical conditions in blowing)	<i>Shiro YAMAMOTO, et alii</i>355
72	A Consideration on Deoxidation Equilibrium Caused by Carbon in Vacuum Induction Melting.	<i>Tetsuya WATANABE, et alii</i>357
73	On the Rate of Deoxidation by Silicon and Manganese. (Kinetic study on the deoxidation of steel— I).....	<i>Nobuo SANO, et alii</i>358
74	On the Lag of the Decarbonization Rate. (Kinetic studies of the steelmaking reaction— III)	<i>Rokuro SAKAGAMI</i>360
75	Residual Hydrogen in Steel.	<i>Tasuku FUWA, et alius</i>362
76	On the Equilibria of Hydrogen between Water Vapor and Molten Slags. (A study on hydrogen in steelmaking slags— I)	<i>Hiroshi OOI, et alii</i>364

- 77 Effect of Basicity on the Solubility of Hydrogen in Molten Slags. (A study on hydrogen in steelmaking slags—II) *Toshihiko EMI, et alii*....366
- 78 Fundamental Experiment of Oxidation of Slag. (Study of steelmaking process by acid open hearth furnaces—I) *Yoshitaka NAKAGAWA, et alius*....368
- 79 On the Equipment and Operation of the New 50t Electric Arc Furnace. *Shigeto ETO, et alii*....369
- 80 Result of Operation on Use of the Basic Roof in Electric Arc Furnaces. *Takao YAMAMOTO, et alii*....371
- 81 Dephosphorization and Desulphurization in a Basic Electric Arc Furnace by Injection of Powdered Materials. *Kanji EMOTO, et alii*....373
- 82 On Steelmaking Process with a Basic Electric Arc Furnace. (Influence of water-vapor pressure in air on gas contents in molten steel—III) *Yoshihiko ABE*....376
- 83 Variation of Hydrogen Content in Molten Steel during Casting Process. (Influence of water-vapor pressure in air on gas contents in molten steel—IV) *Yoshihiko ABE*....377
- 84 Influence of the Melting Process in the Basic Electric-Furnace on Nonmetallic Inclusions. *Sitiro FUKUSIMA, et alius*....379
- 85 On the Exothermic Hot-Top Sleeves Molded by Shell Molding Process. (Study on exothermic hot-top—IV) *Tetsuo TAKAHASHI, et alii*....381
- 86 Internal Structure of the Vacuum-Cast Ingot of Large-Size....*Shinsaku ONODERA, et alii*....383
- 87 Study of Vacuum Arc Melting with a Consumable Electrode (On the nature of ingots). *Yoshitaka NAKAGAWA, et alii*....384
- 88 An Application of Vacuum Casting Process to the Steel (2¹/₄Cr-1Mo) for Main Steam Pipes of a Heat Power Station. *Yoshio KOTANI, et alii*....387
- 89 Effect of Some Factors on Primary Cooling. (Study on continuous casting of steel—V)..... *Kiyoto USHIJIMA*....390
- 90 On the Air Gap between Billets and Molds. (Study on continuous casting of steel—VI) *Kiyoto USHIJIMA*....391
- 91 On the Positive Way to Prevent the Defect of Billets. (Study on continuous casting of steel—VII) *Kiyoto USHIJIMA*....393
- 92 On the Truck Time of Mechanical Capped Steel Ingots. *Masaru TOKUSHIGE, et alii*....394
- 93 Study on the Mold Design. *Kunihisa SATO, et alii*....396
- 94 Control of Rimming Action by Aluminum in Low-Carbon Rimming Steel. *Masatoki NAKAYAMA, et alii*....398
- 95 Influence of Mo, Si, Cu on Mechanical Properties and Corrosion Resistance of 30Ni-20Cr Stainless Steel. (Study of 20Ni-30Cr stainless steel—I) *Shigehiro INOUE, et alii*....400
- 96 Study on Forgeability of Heat-Resisting G-18B Steel. *Sodai KITA, et alii*....402
- 97 Effect of P-Addition on Properties of Some Heat-Resisting Steel Containing Ti. (Effect of P-addition on properties of heat-resisting steel—III) *Kunio KUSAKA, et alius*....404
- 98 On High-Temperature Properties of 4% Mn-N-155 Type Alloy Melted under Various Atmospheric Pressures of Nitrogen. (Study of heat-resisting high-manganese steel—I) *Heitaro YOSHIDA, et alii*....406
- 99 Some Observations on the Relation of Precipitates to the Crack Propagations of A286 Alloy. (Studies on the alloy A286—V) *Fukunaga TERASAKI, et alius*....407

- 100 Some Remarks on the Notch Effect of A286 Alloy.
(Studies on the alloy A286—Ⅵ) *Fukunaga TERASAKI, et alius*....409
- 101 Influence of Matrix Compositions on High-Temperature
Properties of the Gamma-Prime Precipitated Heat-Resisting
Alloys. (Systematic studies on gamma-prime precipitated
heat-resisting alloys— I) *Shyoichi KATOH, et alii*....411
- 102 Effect of Elements and Heat-Treatment on Precipitation
of Ni-Base Heat-Resisting Alloys. *Shin KIMURA, et alii*....413
- 103 Study on a Phosphorus-Bearing Nonmagnetic Steel of High
Yield Strength. *Kunio KUSAKA, et alii*....415
- 104 Metallurgical Study on the Ancient Iron Ware. *Kazuo HORIKAWA, et alius*....418
- 105 On the Fracture of 5 Gallon Cans during Transportation. *Shinichi SERA, et alii*....420
- 106 Effect of Zirconium on the Austenitic Grain Size in Iron
and Steel. *Kiyoshi MIZUKAWA, et alius*....422
- 107 Velocity Dependence of the Cohesive Strength of
Steels at Elevated Temperature. (Measurement of
tensile properties of metals with a high-speed impact
testing machine—Ⅲ) *Sigetomo NUNOMURA, et alii*....424
- 108 On Temper-Brittleness of Steel. (Studies of
load-time relations under Charpy impact test—Ⅴ)..... *Masanobu OHMORI, et alii*....426
- 109 Effects of Size of Steel Specimens in Charpy Impact Tests.
(Studies of load-time relations under Charpy impact
test—Ⅵ)..... *Tadahisa NAKAMURA, et alii*....428
- 110 Abrasion Loss of Steel Plates against Soil and Sand.
(Studies on abrasion-resisting steel— I) *Yoshiyuki ENDO, et alii*....431
- 111 On the Annealing for Spheroidization of Cold-Forming Wires. ... *Kinji YOKOYAMA, et alii*....433
- 112 On the Mechanical Properties and Residual Stress of Case-
Hardened Steel. (Mechanical properties
of case hardened steel— I) *Shigeru YONETANI, et alii*....435
- 113 Effects of Heat-Treatment Conditions on Mechanical Properties of
High-Carbon Low-Alloy Steels. (Studies of high-carbon low-
alloy steels—Ⅱ) *Sodai KITA, et alii*....436
- 114 Some Effects of Preliminary Heat Treatments on Reheat-
Treated Structure of a Plain Carbon steel.
(Relations between the conditions of heat treatments
and homogeneity of austenite— I) *Takayasu OKADA*....438
- 115 Combined Effect of Alloying Elements upon Behaviors of
Continuous Cooling Transformation with 0.6% C-Ni-Cr-Mo
Steel. *Tatsuro KUNITAKE*....440
- 116 On Mass Effects of Tool Steels for Hot Working. *Shushi KINOSHITA, et alii*....442
- 117 Effect of Chemical Compositions on Mechanical Properties
and Thermal-Shock Resistance of Ductile Cast Iron. *Takashi OTA, et alii*....444
- 118 Effect of Deformation in the Metastable Austenite Condition
on the Secondary Hardening of 13 Cr Stainless Steel.
(Study on ausforming of 13 Cr stainless steel—Ⅱ) *Yuzo Hosoi*....446
- 119 Effect of Deformation in the Metastable Austenite Condition
on the Corrosion of 13 Cr Stainless Steel.
(Study on ausforming of 13 Cr stainless steel—Ⅲ) *Yuzo Hosoi*....448

- 120 Relation between the Heat-Treatment and Hardness Torsional, Tests
of Spring Materials Made of Si-Mn Steel and 9% W-
Cr-V Steel. (Study on the spring materials—K) *Hideji Hotta*....449
- 121 Relation between as Slack-Quenched Structure and Mechanical
Properties of Spring Steel. *Michira Uchiyama, et alii*....451
- 122 Temperability of Mn-Cr Spring Steel. *Akihiko Hoshino, et alii*....453
- 123 Effect of Small Quantities of Titanium on Medium-
Carbon Steel. *Naohiko Mizuno, et alius*....455
- 124 Study of Hot-Rolling. *Nobuyoshi Nambu*....457
- 125 On Measurement of Rolling Load and Torque of a
Continuous Billet Mill. *Shozen Kumagai, et alii*....460
- 126 Three Dimensional Photoelastic Experiment of the Breaker Box.... *Kenzo Kato, et alius*....462
- 127 Cold Working of Ring Specimens.
(Study of nonmagnetic steel for turbo-generators—II)..... *Tadataka Goto, et alii*....464
- 128 Effect of Heat Treatment for Bend-Workability of 17% Cr
Stainless Cold-Rolled Sheets. (Study on bend-workability of
17% Cr stainless sheets—I) *Keinosuke Tsuji, et alius*....466
- 129 Strain Hardening Exponent and Plastic Strain Ratio of
Cold-Reduced Mild Steel Sheets. (Formability of
cold-reduced sheets—I) *Kazuo Matsudo, et alius*....470
- 130 On the Plastic Anisotropy. *Minoru Kawaharada, et alius*....472
- 131 (Suspended)
- 132 Nonscale Heating of Steel without a Gas Generator. *Takashi Banno, et alii*....474
- 133 On the Seasoning of Bricks for Atmosphere Furnace
by Use of RX Gas. *Yoshiyasu Terasaka, et alii*....476
- 134 Study on the Effect of Annealing Atmosphere on
Tin Plate. *Hidejiro Asano, et alii*....478
- 135 Effect of Inhibitors on the Surface Quality of Pickled
Steel Sheets. (Study on acid pickling of steel.—II) *Rikichi Kawabata, et alii*....480
- 136 Weldability of High-Strength Steels Evaluated by
Ductility Test on Synthetic Heat-Affected Zone. *Hiroshi Tamura, et alius*....482
- 137 Mechanical Properties and Metallurgical Study of Flash-
Butt Weld Zone. (Study of flash-butt welding of a large
shaft of forged steel—I) *Shushi Kinoshita, et alii*....485
- 138 Wear-Resisting Ductile Cast Iron. *Akira Yoshida, et alii*....488
- 139 Influence of Impurity and Vanadium Addition on the
Isothermal Transformation of High-Carbon Steel. *Kazuo Nakazawa*....491
- 140 Fatigue Properties of Cons-el Arc Melted Bearing Steel.
(Properties of Cons-el arc melted bearing steel—II) *Yoshiro Yagi, et alii*....492
- 141 Vacuum-Melted Bearing Steels. *Hirooki Nakajima, et alii*....494
- 142 Effect of Raw Materials on Ball-Bearing Steels. *Hiroshi Suyama, et alii*....496
- 143 Spheroidizing of Carbide. (Behavior of globular carbide
of high-carbon chromium-molybdenum steel—I)..... *Masato Takeshita, et alii*....499
- 144 Influence of Heat Treatment on Distribution of Globular Carbide.
(Behavior of globular carbide of high-carbon
chromium-molybdenum steel—II)..... *Masato Takeshita, et alii*....502
- 145 Machinability of the Leaded Free-Cutting Steel after Various
Heat Treatments. (Study on leaded free-cutting steels—VIII)..... *Teturo Ito*....504
- 146 Nonmetallic Inclusions in Rimmed Steels. *Takashi Matsukura, et alii*....506
- 147 Aluminium Addition in Production of Killed Steel Ingots..... *Toyosuke Tanoue*....508
- 148 Metamorphosis of Aluminum Nitride Precipitated
in Steel due to Cooling Rate and Its High-Temperature Ductility.
(Study of aluminum nitride in steel—IV) *Shigeo Hasebe*....510
- 149 Morphology of Titanium, Zirconium, Vanadium and Boron Nitride in Steel.
(Study of aluminum nitride in steel—V)..... *Shigeo Hasebe*....512
- 150 Study on the Origin of Nonmetallic Inclusions in Steel
by Radioactive Tracer Method. *Michihiko Shimada, et alii*....515

- 151 Nonmetallic Inclusions in Semikilled Steel Ingots. *Junichi IMAI, et alii*....517
- 152 Extraction of Nonmetallic Inclusions in Steels by
an Ultrasonic Jack Hammer. (Study on nonmetallic
inclusions in steel—III) *Iku UCHIYAMA, et alii*....519
- 153 On the Relation between the Sand Marks and Top- and
Bottom-Teeming Procedures. (Studies on the non-
metallic inclusions, especially sand marks in steel—IV) *Kiichi NARITA, et alii*....521
- 154 Consideration on the Origin of Sand Marks.
(Studies on the nonmetallic inclusions, especially
sand marks in steel—V) *Kiichi NARITA, et alii*....523
- 155 Microscopic Examination of Sand Marks Detected in
Rolled Steel Products. (Studies on the formation of sand
marks in steel—I) *Tarō SUGIYAMA, et alii*....527
- 156 Internal Defects of Killed Heavy Plates and their Prevention.
(On the internal defects of heavy plates—I) *Suehiro HIYOSHI, et alii*....529
- 157 Study of Fatigue Strength of the Ghost Zone in Large Forgings
Made by Vacuum Casting. *Tadataka GOTO, et alii*....530
- 158 Low-Temperature Properties of Al-Killed Steel.
(Studies on the steel for low-temperature uses—II) *Tsugio KANEDA, et alii*....533
- 159 Study on Trial Manufacture and Properties of 9% Ni
Steel Plates. (Study on 9% Ni steel for
low-temperature service—IV) *Kiyohiko KIZUKI, et alii*....534
- 160 On Low-Temperature Properties of Cr-Cu-Ni-Al Steel.
(Studies on the steel for low-temperature service—I) *Yuzura SHINDO, et alius*....537
- 161 Study on Creep Properties of Various Steels for Steel
Tubes at Elevated Temperatures. *Noboru SHINODA*....540
- 162 Transition Temperature of High-Cr Ferritic Steels.
(Study on high-Cr ferritic steels—I) *Hiroshi YAGASAKI, et alius*....542
- 163 Hot-Ductility of High-Cr Ferritic Steels.
(Study on high-Cr ferritic steels—II) *Takashi SUZUKI, et alii*....544
- 164 Effects of C and N upon Mechanical Properties of 25 Cr Steel. *Tsugio KANEDA, et alii*....546
- 165 On the Nitrogen-Removal of High-Cr-Fe Alloys Containing
Nitrogen by Heating at High Temperatures. *Ōmi MIYAKAWA, et alii*....548
- 166 On the Anomaly of Cold-Worked 18-8 Stainless Steel
in Heating Process. *Toshio SAITŌ, et alius*....550
- 167 Effects of Solution Treatment on High-Temperature
Properties of 18 Cr-8 Ni-Ti Steel. *Ryoichi SASAKI, et alii*....552
- 168 Effect of δ Ferrite on Properties of Ni-Cr Stainless
Steel. (The effect of Ni and Mo) *Yasuo OTOGURO, et alius*....554
- 169 Embrittlement by Aging with High Cr-Ni Austenitic Steels.
(Study on high Cr-Ni austenitic steels—I) *Kenkichi HOSOE, et alii*....556
- 170 Hot Ductility of High Cr-Ni Steels.
(Study on high Cr-Ni austenitic steels—II) *Fujio TSUKAMOTO, et alius*....558
- 171 Fatigue Strength of High Cr-Ni Austenitic Steels at
Elevated Temperatures. (Study on high Cr-Ni austenitic
steels—III) *Fujio TSUKAMOTO, et alii*....561
- 172 On Heat-Resisting Properties of 316L Type Steels
Melted in High-Pressure Nitrogen Atmosphere.
(On the function of nitrogen as an alloying element
in heat-resisting materials—II)..... *Ryōhei TANAKA, et alii*....563
- 173 Influence of C and Si on Properties of 35Ni-15Cr
Heat-Resisting Steel. *Masanobu KITAHARA, et alii*....565
- 174 Effect of Alloying Elements on 14Cr-15Ni Austenitic
Heat-Resisting Steels. (Studies on austenitic heat-
resisting steels—I) *Toshio FUJITA et alius*....567
- 175 Effect of Alloying Elements on 15Cr-25Ni Austenitic Heat-Resisting
Steels. (Studies on austenitic heat-resisting steels—III) *Toshiko SASAKURA, et alii*....569
