

国外最近刊行誌参考記事目次

Journal of the Iron and Steel Institute, 196 (1960) Part 3

- New processes in an integrated iron and steel-works layout. W. F. CARTWRIGHT. p. 249
- Dynamics of the blowing process.
T. KOOTZ. p. 253
- Use of models for investigations of oxygen steelmaking processes. B. S. HOLMES et alius. p. 259
- Model experiment to study rate of gas evolution from the bath of an LD converter.
J. M. van LANGEN p. 262
- Aerodynamics of open-hearth furnace regenerators. C. HULSE. p. 264
- Model study of splashing. KUN LI. p. 275
- Influence of alloying elements on the first stage of tempering in high-carbon steels.
H. W. KING, et alius. p. 281
- Protection of open-hearth roofs by an auxiliary jet. J. V. EDWARDS. p. 289
- Examination of samples of iron containing aluminous inclusions. G. R. BOOKER et alii. p. 294
- Toughness of tempered martensite.
D. HARDWICK et alius. p. 301
- Sulphide capacities of silicate melts.
K. P. ABRAHAM et alii. p. 309
- The physics of oxygen steelmaking.
C. HOLDEN et alius. p. 318

Journal of the Iron and Steel Institute, 196 (1960) Part 4

- Rupture of silicon-iron sheets and related creep phenomena. C. W. CHEN. p. 385
- X-ray high-temperature oxidation study on iron-copper. H. J. GOLDSCHMIDT. p. 390
- Kinetics of sulphur transfer from iron to slag.
R. G. WARD et alius. p. 393
- Liquidus-solidus relations in iron-rich iron-carbon alloys. R. A. BUCKLEY et alius. p. 403
- Estimation of hydrogen in pickled steel.
K. SACHS et alius. p. 406
- Bearing properties of 1% C Cr steel as influenced by steelmaking practice. R. F. JOHNSON et alius. p. 414
- Marker movements in the oxidation of iron and some other metals. R. F. TYLECOTE et alius. p. 445
- Thermal and magnetic analysis of an Fe-Ni alloy by an electron beam technique.
S. YAMAGUCHI. p. 462

Journal of Metals, (1961), Jan.

- Blast furnace enrichment investigations.
E. J. OSTROWSKI et alii p. 25

- Blast furnace injections. J. A. CORDIER. p. 31
- Injection technique investigated on low-shaft furnace. E. P. BONNAURE et alius. p. 37
- Thermal aspects of blast furnace fuel injection.
A. M. DECKER. p. 41
- Ferromanganese production with oxygen enrichment. J. M. STAPLETON et alii. p. 45
- Coke-oven gas injection into the blast furnace.
E. R. DEAN et alius. p. 49
- Blast Furnace and Steel Plant**, 48 (1960) No. 11
- Cia. Fundidora De Fierro Y Acero De Monterrey, S. A., Mexico. C. LONGENECKER. p. 1139
- Cost effects of the chemical qualities of sinter fuels. J. GRIFFEN. p. 1164
- Blast Furnace and Steel Plant** 48 (1960) No. 12
- Factors affecting the drawability of sheet steel.
R. L. WHITELEY p. 1245
- Cable stranding and induction stress relieving.
S. V. STICKLER, JR, et alius p. 1251
- Cost effects of the chemical qualities of sinter fuels. Part II. J. GRIFFEN. p. 1255
- Data processing as related to the steel plant.
H. R. BERKE. p. 1262
- Smelting unfired iron ore pellets in an experimental blast furnace. N. B. MELCHER et alius. p. 1265
- Stahl und Eisen** 81, (1961) Heft 1
- Preparation of the burden and its effect on blast furnace operation. G. HEYNERT et alius. p. 1
- Production of high-basicity sinters in the blast furnace. L. VON BOGDANDY p. 12
- Experiences with hot tops made of combustible plates and exothermic feeder heads for ingot moulds. A. SCHÖBERL et alius. p. 22
- Experiences made with natural gas firing of open-hearth furnaces. Part I. H. TIEMEYER Part II. M. PETZ p. 30
- Removing the dust from fumes of electric arc melting furnaces. W. MUHLRAD p. 41
- Accelerated test of the machinability of free-cutting steels according to the balance weight feed method. H. BECKER p. 46
- Stahl und Eisen** 81, (1961) Heft 2
- Application of digital measuring to metallurgical engineering and research. H. KNÜPPEL et alius. p. 73
- Effect of a heterogeneous distribution of grain on the progression of temperature in strand sintering. O. STEINHÄUER et alius. p. 88
- Influence of return sinter in the suction sintering process for iron ores. H. RAUSCH et alius. p. 96
- Possibilities of influencing upon the slag content of effervescent soft open-hearth steels.

- Part II. W. HESS. p. 103
Experiences in operation with thin-walled, seamless moulds for continuous casting.
B. TARMANN et alius. p. 111
- Revue de Métallurgie 57, (1960) No. 11
New prospects for metallurgy owing to the reactions obtained by injection of powders into molten metals. M. ALLARD. p. 985
The determination of oxygen in molten basic Bessemer steel. Techniques used for liquid sampling and gas analysis. J. MAROT, et alius. p. 991
The influence of the distribution and the nature of small inclusions of slag on the strength of cast steel. B. MATUSCHKA. p. 999
The elastic deformation of 4-high rolling mill rolls. B. FAZAN. p. 1003
Structural processes in the hot rolling of rimming steel sheet. V. BERRUTI, et alii p. 1019
Refractories in iron and steel works.
A. LIBON. p. 1033
Facilities offered by research in the use of refractories in ferrous metallurgy.
P. PAQUIN. p. 1039
- Stal, No. 1 (1961)
Reductibility of sinter, produced by various iron and steel works in the USSR.
K. K. SHKODIN, p. 5
Slag formation in blast furnace, operated with high pressure. B. N. STARSHINOV, et alii. p. 12
Open-hearth furnace or oxygen converter?
A. F. MYRTSYMOV. p. 21
Crystallization and improvement of quality of 18-30XFT steel. M. I. KOLOSsov, et alii. p. 25
Study of metal temperature in basic converter.
I. S. ROGUINSKY. p. 31
Improvement of process of melting of construction alloy steel. S. G. VOINOV, et alius. p. 34
Pouring of electric steel, when using wooden frames. N. V. KEIS, et alii p. 38
Decarbonization of ferrochrome in converter by blowing oxygen. P. A. SAKHARUK, et alius. p. 40
Heating of finishing stand rolls of wide strip mill. A. P. CHEKMAREV, et alii. p. 43
Influence of heat treatment on conversions in X17H7O type steel. E. G. FEL'DGANDLER, et alius. p. 58
Use of 20XTP cementing boron steel for manufacture of car parts. A. M. TARASSOV. p. 64
Mechanical properties of low-alloy steels (plates). G. V. UZHNIK, et alii. p. 68
Comparative efficiency of melting killed carbon steel in open-hearth and electric furnaces of

- large capacity. V. M. TSITVER, et alius. p. 74
Condition for drawing of acid Bessemer steel.
A. M. BITCHUTCH, p. 84
