

## 国外最近刊行誌参考記事目次

**Journal of the Iron and Steel Institute, 197**

(1961) Part 3

Production of stainless slabs at the Schoeller-Bleckmann continuous casting plant.

B. MATUSCHKA. p. 189

The morphology of martensite.

P. M. KELLY, et alius. p. 199

Internal friction effects in Fe-Si-N alloys.

R. RAWLINGS, et alius. p. 211

Notes on gas-flow pattern through the regenerative chambers of O H furnaces.

J. G. SEPTIER. p. 215

Resistance to thermal stress fatigue of some steels, heat-resisting alloys, and cast irons.

H. G. BARON, et alius. p. 223

Spread of molten tin on mild steel reduced in hydrogen or treated with molten fluxes.

E. T. TURKDOGAN, et alius. p. 233

Effect of up-quenching on the kinetics of bainite formation. J. S. WHITE, et alius. p. 241

**Journal of Metals, (1961) Mar.**

Pressure vessels for space, aerospace, and hydrospace, A symposium.

I. Evaluating fracture toughness.

W. S. PELLINI, et alius. p. 195

II. Materials for space pressure vessels.

V. W. COOKE, et alius. p. 198

III. Structural significance of ductility.

G. GERARD. p. 201

Extrusion theory and calculations.

W. A. BACKOFEN. p. 206

Extrusion of steel. p. 211

**Journal of Metals, (1961) Apr.**

History of the coking industry in the United States. C. S. FINNEY, et alius. p. 285

Analysis of open hearth oxygen injection.

J. E. HOWKINS, et alii. p. 292

Oxy-fuel increases open hearth potential.

G. A. FERRIS. p. 298

Operating experience with open-hearth lances.

D. F. BRION, et alii. p. 300

Future of the open hearth. A. K. MOORE. p. 303

Methods of reducing iron ores.

J. ASTIER. p. 305

Taconite pellets in the blast furnace.

W. E. MARSHALL. p. 308

Pre-reduced iron-ore pellets.

J. P. HANSEN, et alii. p. 314

**Blast Furnace and Steel Plant, 49 (1961) No. 3**

The potential and limitations of high blast temperatures. T. L. JOSEPH p. 239

Innovation and automation for the iron and

steel industry. W. E. MILLER. p. 247

Ore preparation plant in England serves two blast furnaces. J. GRINDROD. p. 252

Conversion of a single-stand four-high temper mill to a two-stand four-high tandem temper mill. H. BIRCHOF. p. 225

Jones and Laughlin starts sintering machine at Aliquippa.

**Stahl und Eisen, 81 (1961) Heft 5**

The development of the South African Iron and Steel Corporation and its place within South African economics. C. M. KRÜGER. p. 277

The production of blooming mill trains and their characteristics. P. STOKER. p. 284

Production of calcareous sinter and its use in blast furnaces paying regard to the desulphurisation of sinter and pig iron.

B. WEILANDT, et alius. p. 295

Testing sinter strength. A. SEND. et alius. p. 303

Progress of reactions when refining steel by top-blowing oxygen in rotating vessels.

P. E. HARDT, et alii. p. 311

**Stahl und Eisen, 81 (1961) Heft 6**

Resistance butt-welding of steel wires, particularly of wires having a high content of carbon. H. J. BÖCKENHOFF. p. 337

Influence of back pull in drawing steel wire on the drawing operation and properties of drawn wire. M. MARTIN, et alii. p. 349

Effect of gripping length and pickling on the results of the torsion test of steel wire.

F. BLEILÖB, et alius. p. 356

Study of the exchange of matter being possible between furnace atmosphere and product annealing cold worked steels in a protective gas atmosphere. T. SCHMIDT, et alius. p. 361

**Archiv für das Eisenhüttenwesen, 32 (1961)**

Heft 1

Die Manganverteilung zwischen Eisenschmelzen und Eisen (II)-oxyd-schlacken im MnO-Tiegel bei 1520 bis 1770°C. W. A. FISCHER, et alius. s. 1

Untersuchungen zur Spektralanalyse hochlegierter Stähle. W. DIEHL. s. 11

Zur Anwendung der Röntgenfluoreszenz-Spektralanalyse in der Eisenhüttenindustrie.

H. J. KOPINECK, et alius. s. 19

Kalorimetrie und Thermodynamik der Kupfer-Wismut-Legierungen. W. OELSEN, et alii. s. 39

Das System Eisen-Molybdän-Silizium.

R. VOGEL, et alius. s. 47

Die Verbrennungsgeschwindigkeit von Eisen-drähten in Sauerstoff hohen Druckes.

- L. KIRSCHFELD. s. 57  
**Revue de Métallurgie**, 58 (1961) No. 1  
 Chicago congress on the reduction of iron ores  
 (3-5 1960) J. ASTIER. p. 3  
 Back pressure and various injections. Expe-  
 rience with the international low furnace at  
 Liège. E. BONNAURE. p. 13  
 Observations on the wear of refractory linings  
 of stacks in sinter consuming blast  
 furnaces. Ch. PASTOR, et alius. p. 25  
 The Kaldo process at SOLLAC. R. COLMANT,  
 et alius. p. 39  
 The installation of finish rolling mills at the  
 Saint-Etienne works of C. A. F. L. G. NAMY.  
 p. 45  
 The determination of oxygen and hydrogen in  
 steel by carrier gas techniques.  
 C. E. A. SHANAHAN. p. 55  
 The metallurgy of 5% chromium ultra high  
 strength steels. G. A. ROBERTS. p. 65  
**Stal**, (1961) No. 3  
 Conditions for removal of sulfur in sintering  
 process. D. T. KHOKHLOV. p. 193  
 Temperature and composition of iron in de-  
 stroyed section of blast-furnace hearth bottom.  
 N. N. BABARYKIN, et alii. p. 198  
 Analysis of heat-exchange processes in blast  
 furnaces. B. L. LAZAREV, et alii. p. 200  
 Utilization of nickel when melting pig iron  
 from natural alloy ores. A. B. GLOVATSKY, et  
 alius. p. 207  
 Mastering operation of 500-ton open-hearth  
 furnace, fired by cokeoven gas and fuel oil.  
 I. E. I. DIKSHTEIN, et alii. p. 210  
 Investigation of melting of charge in open-  
 hearth furnaces when using various methods  
 of oxygen injection. K. M. TRUBETSKOV, et  
 alii. p. 214  
 Use of high-grade ferroaluminum for deoxidation  
 of killed steel. I. N. LAD'IANOV. p. 222  
 Temperature conditions of heats when conver-  
 ting phosphorus iron. I. Iu. KOZHEVNIKOV, et  
 alii. p. 228  
 Improvement of process of ferro-boron-alumi-  
 nium production. P. F. SNEZKO, et alii. p. 239  
 About reasons for bulging of ingots and slabs.  
 I. P. ZABALUIEV, et alius. p. 249  
 High-chromium steels with titanium and nitro-  
 gen instead of 1X18H9 and 1X18H9T steels.  
 D. A. ODESSKY, et alius. p. 262  
 Influence of slaty structure on properties of  
 of carbon steel. M. A. BALTER, et alius.  
 p. 271  
 Reasons for formation of blisters on cold-rolled

sheets of 08kn Steel. F. A. KSENUK, et alius.  
 p. 274

Influence of austenite-forming constituents on  
 properties of X28 steel. A. A. BABAKOV, et  
 alius. p. 276

Supplying soaking pits with hot ingots.  
 V. M. SOBOKEV. p. 280

Cleaning of gases from top-blown oxygen  
 converters. L. V. SUDOPLATOV, et alius. p. 286

## 国内最近刊行誌参考記事目次

### —学協会誌—

**日本金属学会誌** 25 (1961) 4

18-8 Ti 型ステンレス鋼管材のクリープ破断特性につ  
 いて. 織田貞四郎, 他...238

18-8 Ti 型ステンレス鋼のクリープ破断特性について  
 織田貞四郎, 他...241

50% Ni-Fe 合金の真空溶解による特性の改善.  
 小倉忠利, 他...248

可逆変形を示した大型タービン軸材の冶金的考察につ  
 いて. 徳田 昭...258

モデル軸による可逆変形の再現について.  
 徳田 昭...262

EDTA滴定法による鉛快削鋼中の鉛の定量.  
 若松茂雄...265

Fe-Al-Ni-Co-Cu 焼結磁石の二. 三の性質に対する  
 Nb添加の影響について. 梶山正孝, 他...273

軟鋼面上の酒石酸塩浴からの W-Co メッキの構造に  
 ついて. 山本 久...292

**鑄物** 33 (1961) 5

鑄鉄の脱酸, 脱硫処理と黒鉛球状化の関係.  
 谷村 照, 他...327

鑄鉄制輪子の季節別の摩耗差について.  
 中井 実...336

白銑内でのチタンの挙動とその黒鉛化促進作用.  
 岡本 平, 他...340

鑄鋼品に発生するセンターライン・シュリンケージと  
 これを含む素材の機械的性質に関する研究.  
 岡添 覚, 他...355

**材料試験** 10 (1961) 93

鋼線の疲労に関する研究(第5報) 上田太郎, 他...464
