

Contents of the Preprints for the 63rd Grand Lecture

Meeting of the Iron and Steel Institute of Japan*

C O N T E N T S

Lect. No.	T i t l e	Lecturer
1	New Equipments of Tsurumi No. 1 Blast Furnace and its Operational Results since Blowing-in.	<i>Eiichi SAKAMOTO, et alii.</i> ...329
2	Blast Furnace Operation by the Oxygen-Enriched Blast under Burdens of All Self-fluxing Sinter.	<i>Toshio NIINOMI, et alii.</i> ...331
3	Heavy-Oil Injection Test on No. 3 Blast Furnace at Kawasaki Works of Japan Steel & Tube Corp.	<i>Tadashi KOBAYASHI, et alii.</i> ...332
4	Results of Test Operation on Injection of Coke-Oven Gas into a Blast Furnace.	<i>Keisuke MORI, et alii.</i> ...335
5	Some Effects of Steam Control on Blast Furnace Conditions.	<i>Masayuki GŌNŌ, et alii.</i> ...336
6	Worn State in Lining of Kukioka No. 4 Blast Furnace.	<i>Yooichi HAYASHI, et alii.</i> ...338
7	Study on Cooling of Blast Furnace Walls.	<i>Masae ISHIBASHI, et alius.</i> ...340
8	Some Studies on Making of High-Silicon Pig Iron.	<i>Osamu SEYA, et alii.</i> ...342
9	Dust Coating on Moving and Fixed Blades of an Axial-Flow Blower for a Blast Furnace, and Changes of its Capacity.	<i>Akio KAWABE, et alii.</i> ...343
10	Studies on Hanging of a Blast Furnace.	<i>Koretaka KODAMA, et alii.</i> ...345
11	Effect of Titanium on Blast Furnace Operation.	<i>Takehiro HORIO, et alii.</i> ...347
12	Operation of an Experimental Blast Furnace with Fuel-Added Blast.	<i>Akitoshi SHIGEMI, et alii.</i> ...348
13	On a Method of Estimating the Effect of Fuel Injection into a Blast Furnace.	<i>Takao YAMAMOTO, et alii.</i> ...350
14	Characteristics of Different Size Fractions of Coke.	<i>Tamotsu KAMADA, et alii.</i> ...352
15	Desulphurization of Crude Fe-Ni by a Shaking Ladle.	<i>Yoshishige NAGOYA, et alii.</i> ...354
16	Sintering Test by Using a Bench Scale Apparatus. (Study on fuels for sintering — I).	<i>Shiro IDA, et alii.</i> ...355
17	A Neutron Moisture Guage for Raw Mixture Sinter.	<i>Itiro KURASIGE, et alii.</i> ...357
18	On Sintering of Raw Mixture Added with Heavy Oil.	<i>Masahiro MAEKAWA, et alii.</i> ...359
19	Experimental Results of Oxygen-Blown Sintering Using a Test Ladle.	<i>Sanehiko SAITŌ, et alii.</i> ...361
20	Visual Observation of Sintering Process.	<i>Sōkichi TOMURA, et alii.</i> ...362
21	Automation of D.L.-Type Sintering Plant at Hirohata Works.	<i>Michio YASUNAGA, et alii.</i> ...363
22	Analysis of Recent Operational Results of Sintering Operation. (Some considerations on the operational control at the sintering plant in Tobata Works.— I)	<i>Minoru IWATA, et alii.</i> ...365
23	Analysis of Results of Sintering Operations in Plant Experiment. (Some considerations on the operational control at the sintering plant in Tobata Works.— II)	<i>Minoru IWATA, et alii.</i> ...367
24	Measurement and Control of Moisture in Raw Mixture for Sinter by Neutron Method.	<i>Yoshio MIYASHITA, et alii.</i> ...370
25	Study on the Manufacture of Lime Sinter.	<i>Kazuo MIYAGAWA, et alius.</i> ...372

* To be held on April 3~5, 1962 at University of Tokyo.

- 26 Limits of Sintering of Fine Iron Ore by Means of Semi-Pelletizing and Fore-Pelletizing. *Kazuo MIYAGAWA, et alius.* ...373
- 27 Effects of Ore Size on Reduction Speed of Iron Ores.... *Fumitada NAKATANI, et alii.* ...375
- 28 Influence of Ore Size and Contact Time on Ore Reduction (Reduction test of the ore bed—I). *Tanekazu SŌMA.* ...377
- 29 Gas Reduction of Iron Ore under Pulsing Pressure. *Tatuo HIGASHI, et alii.* ...379
- 30 Operation Data of a Demag 60 t Electric Furnace. *Tetuhico MIYAWAKI, et alii.* ...381
- 31 Effects obtained by Induction Stirring in a Large Electric Furnace. *Tōru TODOROKI, et alii.* ...383
- 32 Construction and Operation of the Large-Sized High-Frequency Induction Furnace. *Yoshio SATOMI, et alii.* ...384
- 33 Study on the Treatment of Bearing Steel with Acidic Slag. (Study on the treatment of molten steel with synthetic slag—I). *Kōshi KATŌ.* ...386
- 34 Some Refining Problems Relating to Internal Defects of Electric Furnace Steel Blooms for Forgings. *Shigeaki MARUHASHI, et alii.* ...388
- 35 Experiment on Degassing Effects in a Laboratory-Scale Furnace. (Study on the refining process of vacuum arc melting—I). *Tetsuya WATANABE, et alii.* .. 390
- 36 Consideration on Composition-Change and Ingot Segregation. (Study on the refining process of vacuum arc melting—II). *Tetsuya WATANABE, et alii.* ...392
- 37 Ingots Melted in a Vacuum Melting Furnace with a Consumable Electrode. (Internal structure of ingots—II). *Mickimasa Suzuki, et alii.* ...394
- 38 Equilibrium of Phosphorus, Carbon and Oxygen in Liquid Iron. (Study of dephosphorization equilibrium—I). *Shiro BAN-YA, et alius.* ...397
- 39 Effect of Phosphorus on Activity Coefficients of Carbon and Oxygen in Liquid Iron (Study of dephosphorization equilibrium—II). *Shiro BAN-YA, et alius.* ...399
- 40 On Deoxidation of Molten Iron. (Kinetic study of steelmaking reactions—IV). *Rokuro SAKAGAMI.* ...401
- 41 Effects of Mo, Ti and Zr on the Solubility of Carbon in Liquid iron. *Yōichi ONO, et alius.* ...402
- 42 Form of Hydrogen Contained in Steelmaking Slags. (A study on the hydrogen in steelmaking slags—III). *Toshihiko EMI. et alii.* ...404
- 43 Effect of Arriving Velocities of C and O on the Rate of Decarbonization in Liquid Iron (Kinetics of decarbonization in molten steel—V). *Takehiko FUJII, et alius.* ...407
- 44 Gathering Property of Deoxidation Products. *Rokuo ICHIYASU.* ...409
- 45 Reducing Effect of Lead Addition on the Sandmark Defects of Case-Hardening Steel. (Study on lead free-cutting steels—XIII). *Toru ARAKI, et alii.* ...411
- 46 On the Method of Separation of Available Components such as Fe, Ti and V in Iron Sand. *Kazuo MATSUBARA, et alii.* ...413
- 47 On the Smelting of Iron-Sand. *Hiromi ASAI, et alius.* ...415
- 48 Reduction of Iron Ores on the Fluidized Bed by Natural Gas. *Minoru TANAKA, et alius.* ...418
- 49 Volume Changes of Iron Ores in Reducing Sponge Iron. *Kyoichi SATO, et alius.* ...420
- 50 On Sulphate Roasting by Compressed Air. (Studies on extraction of Ni from Ni-Cr Containing iron ores mixed with pyrrhotite by sulphate roasting method under high pressures—I). *Masakiyo MORIKAWA, et alius.* ...421

- 51 On the Measurements concerning a Rotary Kiln in Operation.
(Study on the pre-reduction of iron sand with a rotary kiln—I). *Hideo ARAKAWA, et alius.* ...423
- 52 On the Utilization of the Lean Ore Using a Rotary Kiln. (Study on the utilization of limonite ore containing high-silica—I). *Tsuneomi SAKAKIBARA, et alii.* ...425
- 53 Pilot Plant Practice of a Two-Stage Large Rotary Kiln. (Study on the utilization of limonite ore containing high-silica—II). *Tsuneomi SAKAKIBARA, et alii.* ...427
- 54 Separation of Chromium from Laterite by means of Pelletizing. (Studies on the utilization of laterite — I). *Yoshinori SHIRANE, et alius.* ...429
- 55 Separation of Nickel from Laterite with Dilute Aqueous SO₂ Solution. (Studies on the utilization of laterite — II). *Junjiro MOMOSAKI et alius.* ...431
- 56 On Selective Chlorination of Nickel-Bearing Iron Ore. *Takeo FURUI, et alii.* ...432
- 57 Research on Nickel Leaching from Laterite Ore by Sulphation Roasting. *Hiromu TANIMURA, et alii.* ...434
- 58 On the Dust Collector for an Open Hearth Furnace. (Comparison between a venturi scrubber and an electrostatic precipitator). *Tadashi YUKAWA, et alii.* ...436
- 59 Heat Balance of Open Hearth Furnaces. *Yoshio FUJIMOTO, et alii.* ...438
- 60 On Mechanism of Brick Hearth Wear in an Open Hearth Furnace. *Kiyoshi SUGITA, et alius.* ...440
- 61 Measurement for Improvement in Roof Life of a Tilting Open Hearth Furnace and Operational Result. *Ko KUMAI, et alii.* ...442
- 62 On Increase of Steel Production in the Open Hearth Furnace Shop. *Kaoru NIKAMI, et alius.* ...444
- 63 Utilization of Tonnage Oxygen to Open Hearth Furnaces in Chiba Iron & Steel Works. *Motoyoshi KATAYAMA, et alii.* ...446
- 64 The Standardization of Operations for Tapping Semikilled Steel. *Masahisa TATE, et alii.* ...447
- 65 On Handling of Slag in Steelmaking Plants..... *Etsuo NISHIMURA, et alius.* ...449
- 66 Removal of Zinc in Dust from an Open Hearth Furnace by Reducing Evaporation. (Reserach on the treatment of the iron industry dust—III). *Kazuo KUNII, et alii.* ...452
- 67 Process of Zinc Removal from Open Hearth Furnace Dust. (Research on the treatment of the iron industry dust—IV). *Kazuo KUNII, et alius.* ...453
- 68 Studies on the "Silicon-Reboiling" during Refining Process of Steel in an Acid Open Hearth. *Takehiro IWATA, et alii.* ...455
- 69 Effects of Refining Process and Deoxidation Practice on Nonmetallic Inclusions in Rimmed Steels. *Takeshi HIROMOTO, et alii.* ...456
- 70 Distribution of Nonmetallic Inclusions in Rimmed Steel Ingots. (Study on nonmetallic inclusions in steel by slime method—II). *Yukiyoshi ITOH, et alii.* ...458
- 71 Zircon-Tracing of Nonmetallic Inclusions Originated from Casting Pit Refractories. (Study of nonmetallic inclusions from casting pit refractories—II). *Keisuke HIRAGUSHI, et alius.* ...460
- 72 Segregation of the Sulphur in Rimmed Steel Ingots. ... *Kamematsu MATSUDA, et alii.* ...462
- 73 Deoxidizing Control in L.D. Process. *Masaharu ITO, et alii.* ...464
- 74 A Study on the Dephosphorization in the Oxygen Converter. *Kazuhiko FUJIWARA, et alii.* ...465

- 75 On the Bath Temperature Control at Tobata Oxygen Converter Plant. *Hachiro ARAKI, et alius.* ...467
- 76 On the Effect of Fluorspar in L. D. Process. *Itsusei FURUGAKI, et alii.* ...468
- 77 On Melting of Weldable High-Tensile Steel (WEL-TEN) by L. D. Converter Process. *Masao TAKEDA, et alius.* ...470
- 78 Results of Tar-Magnesite Bricks (Lining of an oxygen converter at Amagasaki Works— I). *Hiroharu USUI, et alii.* ...472
- 79 Outline of Construction and Operation of the Oxygen Converter Plant at Kokura Works. *Motohiko NAKATANE, et alii.* ...473
- 80 On the Efficiency of Alternate 2-Unit Operation of 3 Oxygen Converters at Tobata Plant, Yawata Works. *Isao TANAKA, et alii.* ...475
- 81 Test on Practical Use of Specially Designed Nozzles for the Stream of Molten Steel at Pouring. *Yoshijirō SUGIURA, et alii.* ...477
- 82 Studies on Rotary Casting of Stainless Steel Ingots. *Toyosuke TANOUÉ, et alius.* ...478
- 83 Model Experiment on Preventing Double Skin of Bottom-Poured Steel Ingots and Its Applications. *Noboru KAKIMI, et alii.* ...481
- 84 A Study on Crack of Bottom-Sleeves. *Katashi SAITO, et alii.* ...482
- 85 On the Temperature Drop of Molten Steel in a Ladle. *Toshio MORI, et alii.* ...483
- 86 Study on Teeming in Oxygen Atmosphere. *Kiyoyuki IGARASHI, et alii.* ...486
- 87 Examinations on Specifications of Heavy Steel Forgings Melted by Basic Electric Furnace or Acid Open Hearth Furnace as well as Investigations into Effects of Vacuum Casting. (Study on the vacuum casting— II). *Atsushi MIYAMOTTO, et alii.* ...487
- 88 Improvement in Quality of Cast Steel Rolls by Vacuum-Droplet-Degassing Process. *Hidenori MATSUOKA, et alius.* ...489
- 89 On the Cause of Failure of Recuperator Tubes in a Reheating Furnace. *Masayoshi Tanaka, et alius.* ...492
- 90 Model Experiment on Gas Flow on Soaking Pits. *Toshikuni OKUMURA, et alius.* ...493
- 91 Character of Internal Cavities in Ingots and Study on Closing of Internal Cavities by Normal Forging. (Study on closing of internal cavities in heavy forgings by hot free forging— I). *Syoiti SIKANO, et alius.* ...495
- 92 On a Special Forging Method. (Study on closing of internal cavities in heavy forgings by hot-free forging— II). ... *Mankiti TATENO, et alius.* ...496
- 93 Improvement in Forgeability of N-155 Type Alloys by Addition of Manganese. *Heitaro YOSHIDA, et alii.* ...498
- 94 Effect of Hot-Working Temperature and Cooling Rate after Hot-Working on Austenite Grain Size. (Effect of hot-working and heat treatment on austenite grain size— I). ... *Shōgo ODA, et alius.* ...500
- 95 Actual Conditions and Mechanism of Roll Wear in No. 1 and No. 2 Stands in Finishing Trains of a Hot Strip Mill. (Study on prevention of roll wear in roughing stands in finishing trains of a hot strip mill— I). *Tomomi OKA.* ...502
- 96 Simulation Study of Operation Data of a Plate Mill Plant and Actual Operation at Tsurumi Iron Works. *Masamitsu KATSUE, et alii.* ...504
- 97 Study on Power Consumption of Mannesmann Piercing Process. (Effect of Roll Angle). *Kenzo KATO, et alii.* ...506
- 98 Cross Rolling Tests of Solid Round Billets for Tubing without a Plug in the Mannesmann Piercing Mill. *Akira NAGAO, et alii.* ...508
- 99 Cold Working and Low-Temperature Properties of Si-Mn Type Al-killed Steel Tube. (Studies on low-temperature properties of steel tubes— I) *Akira KOYANAGI, et alii.* ...510
- 100 On the Fatigue Test of Seamless Steel Tubes. *Noboru SHINODA, et alius.* ...511
- 101 Ultrasonic Inspection of Resistance-Weld Steel Tubes. *Takeshi OKAMURA, et alii.* ...513

- 102 On Ultrasonic Flaw-Detection of Steel Sheets.Shozo SEKINO, *et alii.* ...515
- 103 Cold Working and Mechanical Properties of Metals. Nobuyoshi NAMBU. ...517
- 104 Comparison of Detergents for Spray Cleaning and Deposition
of Phosphate from the Solution. (Steel cleaning test using
radioisotopes— I). Hisashi MORI, *et alius.* ...519
- 105 Use of a Direct Reader for Analytical Control during
Steelmaking Process. Yoshihiko ABE, *et alius.* ...521
- 106 Analysis of W in High Alloy Tool Steel with a Quanto-
Recorder.Motokazu URANO, *et alii.* ...523
- 107 Rapid Determination of Slag Basicity by X-Ray Spectroscopy. ... Shōgo ODA, *et alii.* ...524
- 108 Quantitative Determination of CaO and SiO₂ in Slag by Industrial
Fluorescent X-Ray Spectrograph.Tomoya ARAI, *et alii.* ...526
- 109 Apparatus for Determination of the Carbon in Steel with an
Automatic Recorder.Shigeo WAKAMATSU. ...528
- 110 Error Control Experiment on Analysis of the Oxygen in Steel
by Vacuum-Fusion Gas Analysis. Masatoshi MIURA, *et alii.* ...529
- 111 Influence of some Factors on Measurement with an Oxygenmeter
Trially Manufactured. Masato NAKAMURA, *et alius.* ...531
- 112 Gas Chromatographic Examination on Compositions of
Raw Gas Produced from Coke Ovens. (Application of
gas chromatography to iron and steel works— I). Yoshiaki MIURA, *et alii.* ...533
- 113 Determination of Oxygen in Molten Steel by
Electromotive-Force Measurement.Masayasu OHTANI, *et alius.* ...534
- 114 Some Experiments on the Continuous Measurement
of the Oxygen in Molten Steel. Masayasu OHTANI, *et alius.* ...536
- 115 Some Remarks on Technique of Quick-Immersion
Pyrometry for Steel Bath in Ladles. (On the
continuous immersion pyrometry of molten steel— III)....Noboru HIRAOKA, *et alii.* ...537
- 116 Study on an Oscillating Cylindrical Viscometer.Noriyuki TANAKA, *et alii.* ...539
- 117 Mechanism of Formation of Ingot Blow Holes. Keizo ISHIZAKI. ...541
- 118 Some Causes and Practical Solution of Deflections
Observed during Heat Indication Test.Shinsaku ONODERA, *et alii.* ...543
- 119 Discrimination of Austenite Grain Sizes and Mixed Grain
Sizes by "Lineal Analysis".Atumasa OKADA. ...544
- 120 From and Composition of Oxide Inclusions in Carbon
Steel. (Study on nonmetallic inclusions in steels— I).
..... Haruo SCIMADA, *et alii.* ...546
- 121 Relation between Behaviour of Carbides and Current
Density in Electrolytic Extraction (Study of carbides
in steels— I).Haruo SCHIMADA, *et alii.* ...548
- 122 Same Experimental Results with a Scanning Electron
Probe X-Ray.Takashi KUSAKABE, *et alius.* ...549
- 123 Annealing for Spheroidization of Wire Rods for Cold Forming.
(Adequate annealing-temperature and time for
spheroidization).....Jyo YAMAMOTO, *et alii.* ...551
- 124 Heat Treatment of Ductile Iron. Yasuaki HUII, *et alii.* ...553
- 125 Effect of Annealing Atmosphere on Graphitization of
Black-Heart Cast Iron.Noboru KOMURO, *et alius.* ...556
- 126 Behavior of Atmosphere Gas in High Temperature Carburizing. Toshimi SASAKI. ...558
- 127 On the Carbon Potential of DX and NX Gas.Shiotaro YAMADA, *et alii.* ...559
- 128 Study on Corrosion Test of the Poreless Siliconized Steel.
.....Masami ONISHI, *et alius.* ...560

- 129 Effect of Addition of Ni and V on Boron-Treated Mn-Si Steel. (Study on high-strength structural steel—IV). *Tōru* ISHIDA, *et alii.* ...562
- 130 Studies on the Bar of Super-High-Strength Steel. *Tsugio* KANEDA, *et alii.* ...564
- 131 Effects of Spheroidal Cementite Size on Quenching Hardness, Crushing Value and Life of Bearing Steel. *Yoshio* MAEKAWA, *et alii.* ...566
- 132 Relation between Fiber Orientation and Life, Radial Position of Bar and Life in Bearing Steel. *Yoshio* MAEKAWA, *et alii.* ...567
- 133 Effect of Hot-Working Process and Microstructure upon Enduring Limit of 1% C-1.5% Cr Bearing Steel.... *Kuninobu* TAKAHASHI, *et alius.* ...569
- 134 T. T. T. Diagram of Spring Steels. *Akihiko* HOSHINO. ...571
- 135 Relation between Heat-Treatment and Hardness and Repeated Impact Value of Spring Materials made by 9% W-Cr-V Steel & Si-Mn Steel. (Study on the spring materials—X). *Hideji* HOTTA. ...573
- 136 Effect of Heat-Treatment on Hardness and Impact Value of Several Steels at Elevated Temperature. (Study of hot-working tool steels—I). *Kiyoshi* HORI. ...574
- 137 On the High-Chromium High-Cobalt Type Steels for Hot-Work Dies. *Tomitaka* NISHIMURA, *et alius.* ...576
- 138 Quenching Strain in 6 mm ϕ Taps. (Study on the improvement in heat treatment of SKS-2 tool steels—I). *Kynhiko* YAMANAKA, *et alii.* ...577
- 139 The Cold-Rolled 13 mm ϕ Tap. (Study on the improvement in heat treatment of SKS-2 tool steels—II). *Kyuhiko* YAMANAKA, *et alii.* ...579
- 140 Effect of Uranium Addition on Properties of Steel. (Study on the Uranium Steel—I). *Eiji* TAKAHASHI, *et alii.* ...580
- 141 Study of the Shaft Material for Electric Motors. *Tadataka* GOTŌ, *et alii.* ...582
- 142 Discontinuous Behavior of Brittle Fracture. (Study of the cold brittleness of plain carbon mild steel—VI). *Shoichi* NAKANISHI. ...584
- 143 Influence of Carbide Distribution on Impact Tensile Properties of a Carbon Steel at Low Temperature. (Measurement of tensile properties of steels with a high speed impact testing machine—V). *Masanobu* OHMORI, *et alii.* ...586
- 144 Consideration on the Flaky Internal Flaw of Forgings. *Shigeki* SAWA, *et alius.* ...588
- 145 Effect of Acid-Soluble Aluminium Content on Properties of Cold-Rolled Sheets of Mild Steels. *Satoshi* HANAI. ...590
- 146 Study on Carburizing Steels for Crankshafts of High Speed Revolution. *Shotaro* ARAKI, *et alii.* ...592
- 147 Effect of Alloying Elements on Hardenability of High-Carbon Cr-Mo-V Steel. *Turuo* SHIBASAKI. ...593
- 148 Effect of Austenitizing Temperature and Cooling Rate on Creep-Rupture Strength of a Cr-Mo-V Steel for Steam Turbine Shafts. (Studies on the high-temperature strength of a Cr-Mo-V steel for steam turbine shafts—I). *Ryōsuke* HOMMA, *et alii.* ...595
- 149 Trial Manufacture of Heat-Resisting Steel Tubes for Boiler Tubing. Use and Their Properties..... *Shoji* TERAJ, *et alii.* ...597
- 150 Impact Brittleness of Mo-V Low-Alloy Heat-Resisting Steels. (Study of Mo-V low-alloy heat-resisting steels—I). *Haruo* NAKAJIMA, *et alii.* ...599
- 151 Study on Phosphorus-Bearing Heat-Resisting Steels for Exhaust Valves..... *Kunio* KUSAKA, *et alii.* ...601

- 152 Effect of Boron and Zirconium on 15 Cr-20 Ni Austenitic Heat-Resisting Steels. (Studies on austenitic heat-resisting steels—V).*Toshihiko SASAKURA, et alius.* ...602
- 153 Effect of Melting Methods and Ti Contents on 15 Cr-25 Ni Austenitic Heat-Resisting Steels. (Studies on austenitic heat-resisting steels—VI).*Toshihiko SASAKURA, et alius.* ...604
- 154 Considerations on Tempering Process of γ -Type Heat-Resisting Alloys.*Tsuyoshi MASUMOTO, et alius.* ...606
- 155 Effect of Heat Treatment on High Temperature Strength of A 286 alloy. (Studies on the alloy A 286—VII).*Fukunaga TERASAKI, et alius.* ...607
- 156 Effect of Heat Treatments on Mechanical Properties of LCN-155 Alloy Casting.*Ei KANAZAWA, et alii.* ...609
- 157 Influence of Structural Stability and Ti/Al Ratio on High-Temperature Properties of Gamma-Prime Precipitated Heat-Resisting Alloys. (Systematic studies on gamma-prime precipitated heat-resisting alloys—III).*Shioichi Katoh.* ...611
- 158 Some Effects of Preliminary Heat Treatments and Alloying Elements on the Reheat-Treated Structure of Plain Carbon Steels. (Relations between the conditions of heat treatment and homogeneity of austenite—I).*Takayasu OKADA.* ...613
- 159 Continuous Cooling Transformation Characteristics of Some Low-Alloy Steels.*Tatsuro KUNITAKE, et alius.* ...614
- 160 Effect of Plastic Deformation and Stress on Martensite Transformation in Fe-Ni Alloy.*Yuzo Hosoi, et alius.* ...616
- 161 Effects of Other Elements on the Activity of C in Austenite.*Fumitada NAKATANI.* ...618
- 162 Effect of Heating Temperature and Time on the Solubility of a Structure with Some Different Carbides into Austenite.*Hirokichichi HIGASHIYAMA, et alii.* ...620
- 163 Quenching Ability for Spray Quenching.*Hachiro HOMMA.* ...622
- 164 Effect of Alloying Elements on Crack Sensitivity and Quenching Hardness.*Hachiro HOMMA.* ...623
- 165 Design and Performance of a Modified G. M. Type Quenching Meter.*Mitsugu TANAKA, et alii.* ...625
- 166 Effect of Cobalt on Resistance to Tempering of Steel. (Effect of special elements on resistance to tempering of steels—II).*Hiroshi ISHIZUKA.* ...626
- 167 Study on Properties of Heavy-Section Stainless-Clad Steel Plate for Reactor Pressure Vessels.*Hiroshi SUSUKIDA, et alius.* ...628
- 168 On 13 Cr Steel Containing Al.*Shushi KINOSHITA, et alii.* ...631
- 169 Effect of Surface Treatment on Fatigue Strength of 13 % Chromium Steel.*Hiroshi YOSHIDA, et alius.* ...633
- 170 Effects of Ti, B and C on Mechanical Properties of 25% Cr Steel. (Studies on the 25 % Cr steel—I).*Tsugio KANEDA, et alii.* ...635
- 171 Influence of Nitrogen on Properties of 18-7 Stainless Steels.*Rokurō FUJIMOTO, et alii.* ...636
- 172 Modification of Stainless Steels by Means of Rare Earths Addition.*Masayoshi HASEGAWA, et alii.* ...638
- 173 Effects of Chemical Composition and Structural Conditions on Properties of Cr-Ni Stainless Steels. (Effect of Cu and N addition).*Yasuo OTOGURO, et alii.* ...639

174	Carbide Precipitation and Corrosion Properties of 18-8 Stainless steel.	<i>Susumu TAKEMURA, et alii.</i>	...641
175	Some Studies on Characteristics of Dendrite Columnars in 18-8 Stainless Ingots.....	<i>Yūzō SAMIZO, et alii.</i>	...643
176	Study on Machinability of a Selenized Free-Cutting Stainless Steel.	<i>Tetsuro ITO.</i>	...644
177	Some Observations on Corrosion Behavior of Steels by in Contact with Hydrogen Sulfide.	<i>Ryuichi CHIBA, et alius.</i>	...645
178	Occurrence by Eye-Holes in Lacquering on Tinplate.	<i>Hidejiro ASANO, et alii.</i>	...647
179	Experiment on Acceleration of Pickling. (Study on the acid pickling—II).	<i>Rikichi KAWABATA, et alii.</i>	...649
180	Columbium-Bearing Steel for Glass Lining. (Study on Columbium in Steel—II).	<i>Koshi MIYAZAKI, et alii.</i>	...650
