

“Tetsu-to-Hagané”

Vol. 49, No. 2, Feb. 1963

Contents

Foreword

On Physicochemical Aspects of Siderurgy. *Koji SANBONGI*...131

Technical Papers

On the Activity of Carbon in Molten Iron.

(Studies on behaviors of the carbon in molten iron—I) *T. YAGI* and *Y. ONO*...133

Activity of the Carbon and the Oxygen in Molten Iron-Nickel

and Iron-Chromium Alloys. *K. GOTO*, *S. BAN-YA* and *S. MATOBA*...138

Behavior of Alloying Elements and Reacting Time in

Consumable-Electrode Arc-Melting.

(Basic study on consumable-electrode arc-melting method—II)

..... *M. NISHIHARA*, *Y. YAGI*, *K. NARITA* and *M. KURIHARA*...144

Effect of Addition of Ti and B on Mn-Si, Mn-Si-Cr and

Mn-Si-Mo Steels.

(Study on high-strength structural steels—III)

..... *E. ASANO*, *T. ISHIDA* and *H. TAN*...149

Vacuum-Melted Bearing Steels. *M. UENO*, *H. NAKAJIMA* and *S. IKEDA*...155

Effect of Heat Treatment on High-Temperature Strength of A286 Alloy.

..... *T. HASEGAWA* and *F. TERASAKI*...160

Effect of Manganese on High-Temperature Properties of N-155 Alloy.

..... *R. YODA*, *H. YOSHIDA* and *Y. SATO*...166

Technical Review

Current Topics on the Potential Uses of Uranium in Ferrous Metallurgy.

..... *Masayoshi HASEGAWA* and *Ichiro ONODA*...174

Report of Joint Research Society

(The Iron and Steel Institute of Japan)

Results of Research on Structure and Efficiency of Hot Stoves.

(Report of Heat Economy Technology Division).....195

Some Arguments in the Panel Discussion Meeting

Problems of Research on Nonmetallic Inclusions in Steel.225

Abstracts..... 238, Contents of the Recent Articles Published in Japan and Overseas.....241, Miscellaneous:—News.....243, Patent Section.....245, Proceedings of the Institute.....249, Program for the 65th Grand Lecture Meeting of The Iron and Steel Institute of Japan113, Notices to MembersN 3

Overseas membership: Annual charge: \$ 8.00 (incl. postage) Entry fee: \$ 1.00
