Journal of the Iron and Steel Institute 200(1962)

Part 11

Review: Productivity in the iron and steel industry. H. DOUGLASS. p. 889

Continuous method of refining molten iron with oxygen. T. C. CHURCHER. p. 891

Refractories for L D converters.

M. CHBA et alii. p. 900

Sinter plant assessment trials.

G. DOUGLASS. p. 905

Laminar jet system for cooling hot steel strip.

J. N. ADCOCK. p. 909

Analysis of slag inclusions in plain C steels.

R. KIESSLING et alii. p. 914

Austenite grain size and temper brittleness.

J. M. CAPUS. p. 922

Effects of cooling rate, cathodic impregnation, and ultrasonic bombardment on the hardness of steels. E. C. RAMACHANDRAN et alius. p. 928

Occurrence of ϵ and α' martensites in Cr-Mn austenitic steels. G. P. SANDERSON et alius. p. 934

Composition of precipitates in modified 12% Cr steels. J. KOUTSKY et alius. p. 938

Observations on Nb content required for stabilization of 18-8 Nb steels.

E. J. HEELEY et alii. p. 943

Response of Canyon Diablo meteorite to heat treatment. W. D. BRETNALL et alius. p. 947

Iron nails from the Roman fortress at Inchtuthil. N. S. ANGUS et alii. p. 956

Review: A history of the British steel industry. ASA BRIGGS. p. 968

Blast Furnace and Steel Plant 50 (1962) No. 11

Main features of Bhilai Steel Works.

R. MUTHUSWAMY. p. 1071

Natural gas injected into four furnaces at Sparrows Point. p. 1083

Electrical equipment for metal rolling mills.

(Part I) H. N. SNIVELY. p. 1086

Sheffield Steel Company to control power to furnaces and mill. p. 1093

Vertical tower pickler now in service. p. 1095

Review of Iron and Steel Literature for 1961.

(Part IV) E. CHESIRE. p. 1096

Stahl und Eisen 82 (1962) Heft 21

The shift of economic aspects by new develop-

ments in engineering elucidated by the example of iron and steel production.

H. SCHENCK. p. 1405

Effect of chemical composition and pretreatment on the force required for straightening, on the change of bar diameter and behaviour of the mechanical properties in straightening bright steel bars. O. PAWELSKI. p. 1410

Investigations on the surface finish of drawn steel bars. K. MIETZNER. p. 1423

Effect of copper and tin contaminations on the workability of soft plain carbon steel.

M. PELLER-KNIEPMEIER et alius. p. 1432

Characteristic values for the quality of shot and their change during the process of shot descaling. K. WELLINGER et alii. p. 1436

Ion exchangers for regenerating pickling solutions with high contents of sulphuric acid.

F. STRICKER. p. 1445

Stahl und Eisen 82 (1962) Heft 22

Prospects of the process of continuous casting slabs for use in wide strip and plate rolling mills. P. DESFOSSEZ. p. 1469

Injecting heavy oil into a blast furnace at high blast temperatures and with an entirely prepared burden. P. ISCHEBECK et alii. p. 1476

Possibilities of the various processes of degassing and treating molten steel in the vacuum. A. MUND. p. 1485

Ways to reduce inclusion of oxides during the teeming and solidifying periods of rimming steels. R. D. BAARE et alii. p. 1500

Experiences with a reducing mill for hot rolling wire. H. JUNCK et alius. p. 1512

Effect of hot-dip galvanizing on the toughness of plain carbon structural steels.

W. RÄDEKER. p. 1520

Fifty years of stainless steel.

H. KRÄINER. p. 1527

Mechanical properties and brittle fracture tendency of pure iron with 0.001 to 0.144% O and 0.001 to 0.028% C.

W. A. FISCHER et alius. p. 1541

Integrated quality control, a new way to solve old problems. H. KNÜPPEL et alius. p. 1552

Comparison of sampling methods used in operation to determine the hydrogen content of molten steel. H. TAXHET et alii. p. 1561

Stahl und Eisen 82 (1962) Heft 23

Blowing basic pig iron in the basic Bessemer steel converter. R. GRAEF et alii. p. 1629

- Substitutions of pellets for sinter in a blast furnace using a fully prepared burden.
G. HEYNERT et alii. p. 1641
- Wide strip rolled from continuously cast slabs.
E. PLÖCKINGER et alius. p. 1647
- Manipulators and conveying installations working on the floor as means for mechanizing the operation of hammer forges.
H. KIRMSE. p. 1655
- Metallographic investigations on the formation of endurance fractures in plain carbon structural steels. D. POHL. p. 1662
- The introduction of the steam engine in the iron and steel industry of the Rhinish-Westphalian industrial area.
I. LANGE-KOTHE. p. 1669
- Archiv für das Eisenhüttenwesen 33 (1962) Heft 10**
- Recent developments in emission and absorption flame photometry.
R. HERRMANN et alius. p. 643
- Combined effect of deformation conditions, segregations and inclusions on properties of longitudinal and transverse samples of heavy plate. H. A. VOGELS et alii. p. 649
- Zone melting tests on iron alloys and commercial steels. W. A. FISCHER et alius. p. 661
- Magnetic measurement of nitrogen induced ageing in iron. F. ERDMANN-JESNITZER et alius. p. 669
- Volume change and structure formation during crystallisation of cast iron.
H. MÜHLBERGER. p. 681
- Testings of medium and thin plate by ultrasonic longitudinal waves. P. HÖLLER et alius. p. 699
- Metallographic indication of ferrite formation in austenitic chromiumnickel steels.
W. PEPPERHOFF et alius. p. 711
- Internal friction of iron-molybdenum alloys as a function of test temperature, cold work and heat treatment.
E. SCHMIDTMANN et alii. p. 715
- The segregation effect of chromium in the iron-nickel sulphur system. R. VOGEL. p. 723
- Revue de Métallurgie 59 (1962) No. 10**
- Blast furnace injections.
J. CORDIER et alii. p. 791
- Design problems for continuous casting machines. G. NAMY. p. 817
- Study of the embrittlement of manganese-molybdenum welding steels during stress-relief annealing after welding.
P. F. Martin et alii. p. 829
- The problem of flakes in rolled billets. Study

of the variable metallurgical factors.

M. Ferrero et alius. p. 845

Study of certain relationships, established from simple tests, between friction, wear and surface condition. L. PONS. p. 863
