Vol. 49, No. 7, July, 1963

## Contents

### Foreword

Appreciation of Researches. .... *Tomoyoshi KAWADA*...969

### Technical Papers

Manganese Ores Used for Production of High Carbon Ferromanganese.

(Studies on properties and reduction of manganese ores—I)

..... *T. YAGIHASHI, K. ASADA, K. ATARASHIYA, S. ICHINOHE and H. HANADA*...971

On Effects of Acceleration of Carbon Deposition of Hanging.

(Studies of hanging of a blast furnace—III)

..... *K. KODAMA, A. SHIGEMI, T. HORIO and R. TAKAHASHI*...976

On the Gas Decarburization of White Pig Iron Used for

White Heart Malleable Cast Iron. .... *K. NAGASAKI and N. KOMURO*...982

Partition of Alloying Elements between Phases and the Relation

between the Amount of  $\delta$  Ferrite and Magnetic Property for

Cr-Ni Stainless Steels. .... *Y. OTOGURO, Y. KAWABE and R. NAKAGAWA*...989

The Effects of Grain Size and Deformation Rate on the Tensile

Properties of Mild Steel at Low Temperature.

(Studies of tensile properties of steels under high-speed impulsive Loading—IV)

..... *S. SAKUI, T. NAKAMURA and M. OHMORI*...996

On the Hydrogen Embrittlement of a Quenched Plain Carbon Steel.

..... *T. YAMANE*...1003

The Composition of Quenching Oil and the Quenching Effects

of Fatty Oil and Fatty Acid Ester.

(A study on the quenching effects of oil for steel—I)

..... *Y. FUJIMURA and T. SATO*...1008

### Special Lecture

On Iron-Steel Technology Joint Research in Postwar Japan.

..... *Takeshi YAMAOKA*...1016

Continuous Casting of Wide-Slabs. .... *Kichiro SAIGO*...1022
