

Contents of the Technical Papers for the 67th Grand Lecture
Meeting of The Iron and Steel Institute of Japan.

CONTENTS

Lect. No.	T i t l e	Lecturer
1	Manufacture of Metallurgical Briquette Coke by Retort Type Coke Oven.	<i>Dr. Shiro</i> IDA, <i>et alii.</i> ...297
2	The Relation between Coking Temperature and Characteristics of Coke.	<i>Masatoshi</i> KOBAYASHI, <i>et alius.</i> ...299
3	Petrographic Constituents of Coking Coals.	<i>Toshiaki</i> KANAMORI, <i>et alii.</i> ...302
4	Selective Sulphation of Lateritic Iron Ore by Herreshoff Type Furnace.	<i>Akira</i> SUWA, <i>et alii.</i> ...305
5	On Sulphate Roasting by Oxygen-Enriched Air. (Studies on extraction of Ni from Ni-Cr-containing iron ores mixed with pyrrhotite by sulphate roasting method under high pressures—Ⅱ)	<i>Masakiyo</i> MORIKAWA, <i>et alii.</i> ...307
6	Study on Sticky Iron Ores.	<i>Keiki</i> FUJITA, <i>et alii.</i> ...309
7	The Investigation on the Quasi-Decrepiation of Itabirite Ore by Heating.	<i>Masao</i> HIRADO, <i>et alii.</i> ...313
8	Study on Agglomeration of Iron Sand.	<i>Takehiko</i> SAKATA, <i>et alii.</i> ...315
9	On the Process of Oxidation or Reduction of Iron Sand. (Study on the separation of titan in iron sand—Ⅰ) ...	<i>Noboru</i> TAGUCHI, <i>et alii.</i> ...317
10	Material and Heat Balances on Reducing Kiln. (Study on the pre-reduction of iron sand with rotary kiln—Ⅵ)	<i>Hideo</i> ARAKAWA, <i>et alii.</i> ...319
11	A Study on the Semi-Pelletizing of Pyrite Cinder.	<i>Yoshikazu</i> NAGAO, <i>et alii.</i> ...322
12	Influence of Firing Condition on Qualities of Iron Ore Pellets.	<i>Takeji</i> OGASAWARA, <i>et alii.</i> ...325
13	On Properties of Pellet.	<i>Takehiro</i> HORIO, <i>et alii.</i> ...327
14	Effects of the Silica Sand on the Iron Ore Fluxed Sintering.	<i>Dr. Kazuo</i> MIYAGAWA, <i>et alii.</i> ...330
15	Studies on the Production of Lime Sinter Using a High Basicity Sinter.	<i>Kōsei</i> OKIGAWA, <i>et alii.</i> ...333
16	On the Wear of Runner Blade of Sintering Fan.	<i>Tadashi</i> MURAKAMI, <i>et alii.</i> ...335
17	Heat Transfer in Sinter Bed. (Physical analysis of sintering process)	<i>Masatake</i> TATEOKA, <i>et alii.</i> ...338
18	The Investigation on the Strength of Sintered Ores.	<i>Katsuhiko</i> SATŌ, <i>et alii.</i> ...341
19	Effects of the Size of Return Ore on Sintering Properties. (Effects of the size and mixing rate of return ore on sintering properties—Ⅲ)	<i>Shigezi</i> ŌBUCHI, <i>et alii.</i> ...343
20	Effect of Size and Chemical Composition of Iron Ores on the Sintering. (Study of the sinter of iron ores—Ⅰ)	<i>Yoshihiro</i> IZEKI, <i>et alii.</i> ...345
21	On the Flux Control of Lime Sinter.	<i>Hiroshi</i> NAGANUMA, <i>et alii.</i> ...348
22	On the Degradation of Sinter during Simultaneous Abrasion and Chemical Reaction.	<i>Yasumoto</i> ŌTAKE, <i>et alii.</i> ...349
23	High Top Pressure Operation of Higashida No. 1 Blast Furnace.	<i>Keisuke</i> MORI, <i>et alii.</i> ...353
24	Low Slag Volume Operation of Blast Furnace.	<i>Yasuyoshi</i> MIZUNO, <i>et alii.</i> ...355

* To be held on April 4~6, 1964 at University of Tokyo.

- 25 About Iron Flushing from Cinder Notch of Blast Furnace. Ken KANAMORI, *et alii.* ...357
- 26 Effect of Atmosphere on the Viscosity of Ti Bearing Slag. Yoshio OKUNO, *et alii.* ...359
- 27 On Vaporization of Some Slag Components. (Studies on hanging in a blast furnace—Ⅲ) ... Dr. Koretaka KODAMA, *et alii.* ...362
- 28 Study on a Large Quantity of Fuel Oil Injection into a Blast Furnace. (Fundamental study on fuel oil injection into a blast furnace—Ⅰ) Toshimitsu OGATA, *et alii.* ...364
- 29 Heavy Oil Injection with Coke Oven Gas of Higashida No. 5 Blast Furnace. Takehiro YAMADA, *et alii.* ...366
- 30 Tar Injection into Blast Furnace. Seiji MATSUI, *et alii.* ...369
- 31 On the Behavior of Sulphur under the Heavy Oil Injection. Satoru OGURA, *et alii.* ...371
- 32 Consideration on an Oil per Coke Replacement in Oil Injection Blast Furnace Practice. (Studies for the improvement in blast furnace practice—Ⅲ) Dr. Fumitada NAKATANI, *et alii.* ...373
- 33 Consideration on Actual Data of No. 1 and No. 2 Blast Furnace Operation at Kokura Works. (Studies for the improvement in blast furnace practice—Ⅳ) Dr. Fumitada NAKATANI, *et alii.* ...376
- 34 A Study on the Gas Utilization Curve of Ore Reduction. (Reduction test of ore bed—Ⅲ) Tanekazu SŌMA, *et alii.* ...379
- 35 The Repair of Blast Furnace with Castable Gunning. Haruo MORITA, *et alii.* ...382
- 36 Properties of Used Bricks and Jointing Mortars of Kukioka No. 1 Blast Furnace Linings. (Study of wearing mechanism of blast furnace linings—Ⅳ) Masayoshi TANAKA, *et alii.* ...384
- 37 Repairing of the Kokura No. 1 Blast Furnace and its Operation since Blowing-in. Shigeyoshi YABE, *et alii.* ...387
- 38 On γ -ray Stock Gauge of Higashida No. 1 Blast Furnace. Masashi MITSUTSUKA, *et alii.* ...390
- 39 Equipment and Operation of the Oxygen Converter Plant at Wakayama Steel Works. Shigeru TAMAMOTO, *et alii.* ...393
- 40 A Study on the Tap Hole Construction of LD Converter. Kazushi TSUCHIYA, *et alii.* ...396
- 41 Study on Hot Metal for L D Converter. Issei FURUGAKI, *et alii.* ...398
- 42 Use of Oil Injection in Oxygen Converters. (Use of fuel in oxygen converters—Ⅲ) Kyōichirō SATŌ, *et alii.* ...400
- 43 On Lowering of Hot Metal Ratio in LD Process. Motohiko NAKATANI, *et alii.* ...403
- 44 On the Control of Manganese Content in Steel. (Computer control of an LD converter operation—Ⅱ) Kiyomi TAGUCHI, *et alii.* ...406
- 45 On the Dephosphorization Rate in Oxygen Top Blowing Process. Taiji ARAKI, *et alii.* ...409
- 46 On the Influences of the Slag Volume in LD Process. Narito KIMURA, *et alii.* ...412
- 47 On Some Problems of Nitrogen in Oxygen Converter Steelmaking. Toshihiro SEKINE, *et alii.* ...414
- 48 Alloy Steels Produced by Oxygen Converter..... Akira MATSUNAGA, *et alii.* ...417
- 49 On the Manufacture of Weldable High-Tensile Steel of 60 kg/mm² Class (Wel-ten) by LD. Converter Process. Yasushi KUROIWA, *et alii.* ...420

- 50 On the Furnace Deoxidation in the Basic Open Hearth Process. (Studies on sand seam in low carbon killed steel—IV) *Yōji KITAMURA, et alii.* ...423
- 51 Deoxidation Control Based on [C] and [Mn] before Blocking in Open Hearth Furnace. *Hajime NASHIWA, et alii.* ...425
- 52 Control of Melt Down Carbon in Open Hearth Furnace. *Fumio SERINO, et alii.* ...428
- 53 Some Attempts to Improve out of Specification in Open Hearth Steel. *Akiji CHŌ, et alii.* ...430
- 54 Roof-Coke Oven Gas Burner Operation on Open Hearth Furnace. *Hajime NASHIWA, et alii.* ...433
- 55 Ingot Mould Temperature Measurements. *Youichi UMEDA, et alii.* ...435
- 56 Studies on Vacuum Casting of Rolling Ingot by Bottom Pouring Practice. *Yoshio SETTAI, et alii.* ...437
- 57 On the Capped Steel Ingots. *Dr. Susumu SATŌ, et alii.* ...439
- 58 Dissolution of Ferroalloy and Mixing of Metal in Ladles. (Tracer application of RI to steel works—III) *Yoshikuni NAWATA, et alii.* ...442
- 59 Effectiveness of Additional Filling Practice Using a Runner Combined with Water Cooled Ingot Top. (Tracer application of RI to steel works—IV) *Midori MATSUO, et alii.* ...445
- 60 On Continuous Casting Conditions and Qualities of Continuous Casting Ingots of Various Steels. (Study on continuous casting of steel—I) *Akira SUZUKI, et alii.* ...447
- 61 On the Degassing Process of Various Carbon Steels by 100kg Vacuum Induction Melting Furnace. (Study on vacuum induction melting of steel—I) ...*Kazuyoshi UKIHASHI, et alii.* ...451
- 62 Vacuum Arc Melting of Extra Low Carbon Stainless Steel. *Hiroshi ICHIKAWA, et alii.* ...453
- 63 Erection and Operation of R-H Vacuum Degassing Equipment. *Koichi ASANO, et alii.* ...456
- 64 Improvement in Roof Life of Open Hearth Furnaces with Hot Gunning Material. *Yoshiyuki KASUYA, et alii.* ...458
- 65 Results of Tar Magnesite Brick and Tar Dolomite Brick. (Lining of LD converter at Kobe Steel Works). *Shōzou MITUSIMA, et alii.* ...460
- 66 Effects of Ni-Cr, Cr-Mn and Co-Ni on the Solubility of Carbon in Liquid Iron. *Katsumi MORI, et alii.* ...462
- 67 Effects of Fluorides on Removal of Hydrogen from Molten Slags. (A study on hydrogen in steelmaking slags—V) *Toshihiko EMI, et alii.* ...465
- 68 Effect of Cobalt, Chromium, Molybdenum and Tungsten on the Solubility of Hydrogen in Liquid Iron. (The solubility of hydrogen in liquid iron alloys—I) *Dr. Shiro BAN-YA, et alii.* ...468
- 69 Measurement of Oxygen Pressure in Liquid PbO-SiO₂ System. (Study on oxygen concentration cells at high temperature—IV) *Dr. Kazuhiro GOTŌ, et alii.* ...470
- 70 Measurement of the Density of Molten FeO-SiO₂ Slags by the Archimedean Method. *Dr. Kazumi OGINO, et alii.* ...473
- 71 On the Distribution of Alumina-Grouping Inclusions in Aluminium Killed Steel Ingots. *Hideo ITOH, et alii.* ...475
- 72 Oxide Inclusions in Mn-Si Steel. *Shigeaki MARUHASHI, et alii.* ...478

- 73 Relation between Sand Seam and Nonmetallic Inclusions. (Studies on sand seam in low carbon killed steel—III) *Masuta ŌKUBO, et alii.* ...480
- 74 Some of the Considerations on Formation of Alumina Type Inclusions. *Dr. Kazuteru SENDA, et alii.* ...483
- 75 Relations between Chemical Compositions of Inclusions and That of Molten Steel. *Akira Masui, et alii.* ...485
- 76 Change of Composition of Iron Oxide in Pure Iron by Heat-Treatment. (Study on isolation of inclusions in iron and steel—I) *Dr. Mutsumi IHIDA, et alii.* ...488
- 77 Influence of After-Heat-Treatment on the Oxide Inclusions. (Fundamental studies on the nonmetallic inclusions in steels of the Fe-Cr-O system—II) *Nobuya IWAMOTO, et alii.* ...491
- 78 Study on Nonmetallic Inclusions in Steels by the Method of the Polished Thin Section of Metals. *Minoru SASAKI, et alii.* ...494
- 79 On Behaviour of (Fe·Mn)O Inclusions. (Deformation of nonmetallic inclusions in steel during rolling of steel—I) *Dr. Iku UCHIKAMA, et alius.* ...496
- 80 The Effect of Manganese on the Equilibrium between Silicon and Oxygen in the Liquid Iron Alloy. *Yasushi KOJIMA, et alius.* ...499
- 81 On the Manganese Transfer Rate between Molten Iron and Basic Slag. (Kinetic study on the deoxidation of steel—VII) *Nobuo SANO, et alii.* ...501
- 82 Effect of Al, Si, Mn and V on the Ladle Deoxidation of Pure Iron. (Study of pure iron—III) *Toshikatsu ŌTANI, et alius.* ...504
- 83 Method for Determining Dissolved Oxygen after Addition of Silicon for Deoxidization. (Study on dissolved oxygen after addition of deoxidizer—I) *Yoshio MIYASHITA.* ...507
- 84 Behavior of Dissolved Oxygen after Addition of Silicon for Deoxidization. (Study on dissolved oxygen after addition of deoxidizer—II) *Yoshio MIYASHITA.* ...509
- 85 Lining Maintenance of Large Teeming Ladle in Tobata Converter Plant. *Jyuichiro FUKUTOMI, et alius.* ...511
- 86 Determination of the Most Suitable Number of Ladles. (System simulation of a steelmaking plant—III) *Tamotsu ISHIDA, et alii.* ...513
- 87 The Dynamic Simulation of Shaking Ladle. *Toshihiko ARIYOSHI, et alii.* ...515
- 88 On the Temperature Distribution of Steel Bath in Furnaces and Ladles. (On the continuous immersion pyrometry of molten steel—V) *Noboru HIRAOKA, et alii.* ...518
- 89 Disposable Immersion Thermocouple. *Hideyuki NARUWA, et alii.* ...520
- 90 Effects of Ni and Cr on Properties of Constructional Carbon Steel. (Studies on effects of metallic impurities on properties of steel—II) *Shiro YOSHIMATSU, et alii.* ...559
- 91 Characteristics of Gas Carburized Low Carbon Construction Steel Containing Small Amount of Nickel and Chromium. *Hyojiro KURABE, et alii.* ...562
- 92 Effect of Surface Condition. (Study of pitting corrosion for stainless steel—I) *Yutaka ADACHI.* ...565

- 93 On 26Cr-20Ni-5Mo-1.4Cu Acid and Wear Resisting Alloy Steels. (Studies on acid resisting alloy steels— I) *Toshio MORI, et alius.* ...567
- 94 On the Iron Base Cr-Ni-Mo-Cu Acid Resisting Alloy Steels. (Studies on acid resisting alloy steels— I) *Dr. Shigeki SAWA, et alius.* ...571
- 95 Determination of Cr and Fe in Low-Carbon Ferro-Chromium by X-Ray Fluorescence Analysis. *Ryoichi YOSHIMURA, et alii.* ...574
- 96 Effects of Coexisting Elements and Treatment of Samples on the Analysis of Carbon Steel and Low Alloy Steel by Using Vacuum Type Quantorecorder. *Yasuteru TAKAHASHI, et alii.* ...576
- 97 Some Trial for Structure Analysis of Slag by Spectroscopic Technique. *Dr. Yoshihiko Abe, et alius.* ...580
- 98 On the Determination of Oxide Inclusion in Leadloy Steel by Alcoholic Iodine Method. *Minoru YANAGIDA, et alii.* ...582
- 99 The Effect of Nonmetallic Inclusions on the Drawability of Various Cold Rolled Steel Sheets. *Tamio SANTO, et alii.* ...586
- 100 Influence of the Crystallographic Orientation and Grain Shape upon the Deep Drawability of the Cold-Rolled Steel Sheets. (Studies on the deep-drawability of the cold rolled steel sheet— I) *Yō ITO, et alii.* ...588
- 101 Effects of the Rolling and Annealing Conditions on the Crystallographic Orientation of the Cold-Rolled Steel Sheets. (Studies on the deep-drawability of the cold-rolled steel sheets— I) *Yoshio NAKAZATO, et alii.* ...591
- 102 A New High Speed Torsion Testing Machine. *Dr. Tadahisa NAKAMURA, et alius.* ...593
- 103 Explosive Forming of Large End Plate. *Yoshikazu ONOUCHI, et alii.* ...595
- 104 Wear and Fire Cracks of Slabbing Mill Rolls. (Study on the surface defects of slabbing mill rolls— I) *Akitaka YOSHIMUCHI, et alii.* ...598
- 105 Surface Temperature of Slabbing Mill Rolls. (Study on the surface defects of slabbing mill rolls— I) *Eisuke NIYAMA, et alii.* ...599
- 106 Skin Spalling of Cast Steel Work Rolls in the Finishing Stand of Hot Strip Mill. *Takeomi OKUMOTO, et alius.* ...601
- 107 Wrinkle Defects Occured during Hot Working. (On the relation between the heating conditions and the hot workabilities of some commercial steels— II) *Naoki EGUCHI, et alii.* ...603
- 108 On the Automatic Gauge Control of the Tail End of Hot Strip Coil. *Toshio SHIGESAWA, et alii.* ...606
- 109 Effect of the Deformation of the Roll, the Mill Housing, the Pressure Screw and the Remainder on the Mill Spring. *Tadao HIRASAWA, et alii.* ...607
- 110 Design and Operation of High Quality Rod Rolling Mill for Alloy Steel. *Tohru KATO, et alii.* ...609
- 111 On the Quality of Capped Steel in Steel Wire. *Kiyoshi NAKAZAWA, et alius.* ...612
- 112 On the Relation between Welding Condition and Heat-Affected Zone. (Some consideration of welding condition on producing E. R. W. pipe— I) *Tsuyoshi OHUCHI, et alii.* ...614

- 113 Effect of the Shape of Heat-Affected Zone in E. R. W. Pipe on the Strength of Weld.
(Some considerations of welding condition on producing E. R. W. pipe—Ⅰ) *Takeshi NISHI, et alii.* ...617
- 114 Effect of the Shape of HAZ by Flash and Upset-Butt Welding on the Strength of the Weld.
(Some consideration of welding condition on producing E.R.W. pipe—Ⅲ) *Takeshi OKAMURA, et alii.* ...619
- 115 Effects of Several Factors on the Occurrence of Flaking in Tube Expanding Process. *Keizou TAKAHASHI, et alius.* ...621
- 116 On the Carbon Potential Decrease by Adding Air.
(Atmosphere control in the batch type hardening furnace—Ⅲ) *Shigeru MASUMOTO, et alius.* ...623
- 117 Characteristics of Quenched and Tempered 100 kg/mm² Ultra-High Strength Steel.
(Study on ultra-high strength steel—Ⅰ) *Yuzuru SHINDŌ, et alius.* ...626
- 118 Effects of Artificial Defect, Lamination, on Fatigue Properties for High Strength Steel Plate.
(Studies of defects with steel plate—Ⅰ) *Takayoshi ISHIGURO, et alii.* ...628
- 119 Relation between Nonmetallic Inclusion to the Fatigue Life of Ball-bearing Steel. *Shōichi FUKUI, et alius.* ...630
- 120 Effects of Carbon and Chromium on Mechanical Properties of Bearing Steels. *Toshirō YAMAMOTO, et alii.* ...632
- 121 On the Heat Treatment Characteristics of 14Cr-4Mo Stainless Bearing Steel. *Kousuke MURAI, et alius.* ...635
- 122 Structure of Mill (Secondary) Scale.
(Study on iron oxide film—Ⅰ) *Kineo TAKAGI.* ...637
- 123 Pickling and Red-Rust Resistability of Mill Scale.
(Study on iron oxide film—Ⅱ) *Kineo TAKAGI.* ...639
- 124 On the Relation between the Rate of Decarburization and the Adhesion of Ceramic Coating on Steel. *Makoto KATO, et alius.* ...641
- 125 On the Rate of Dissolution of Steel in the Molten Metals *Mineo KOSAKA, et alii.* ...644
- 126 Influence Microstructure on the Dissolved Carbon Content in Low Carbon Steel Sheets. *Takenobu KOGA, et alii.* ...647
- 127 The Influence of Alloying Elements and of Heat-Treatment on the Elevated Temperature Mechanical Properties of Cr-Mn Spring Steel. *Akihiko HOSHINO.* ...649
- 128 Study on the Temper Hardness Distribution after Jominy Test, Bending Test, Crushing Test and Impact Test at High Temperatures of Spring Materials Made of 9% W-Cr-V Steel and Si-Mn Steel.
(Study on the spring materials—Ⅲ) *Dr. Hideji HOTTA.* ...652
- 129 On the Spring Properties of Inconel X Type Alloy at Room Temperature.
(Studies on super alloys for spring—Ⅴ) *Fujio SEKI, et alii.* ...654
- 130 Effect of Pretreatment on the S Curve of 3% Cr-Mo Steel. *Hiroshi SHIMIZU, et alius.* ...656
- 131 Effect of Nickel and Aluminium on Ni-Al Age Hardening Steels. *Masao KANAŌ, et alius.* ...658
- 132 Internal Temperature of Large Steel Forgings during Quenching.
(Fitting calculated results to measured temperature) *Shun-ichi TOMIZUKA, et alius.* ...660

- 133 On the Embrittlement of Tempered Bainitic Structure of Si-Cr-Mo-V Steel. *Dr. Tatsuro KUNITAKE, et alius.* ...662
- 134 The Effects of Test Conditions on Thermal Fatigue Characteristics of Si-Cr-Mo-V Steel. (Studies on the Si-Cr-Mo-V steels for forging dies—W) *Tadashi KATOU, et alii.* ...664
- 135 Effect of Various Alloying Elements on Si-Cr-Mo-V Steel. (Studies on the Si-Cr-Mo-V steels for forging dies—V) *Dr. Tatsuro KUNITAKE, et alius.* ...666
- 136 On the Tempering Behavior of 5Cr-Mo-V 5Cr-Mo-W-V and 5Cr-Mo-W Steels. (Study on hot work tool steels—W) *Tomitaka NISHIMURA, et alius.* ...668
- 137 Study on Austenitizing Treatment of 5% Cr Hot Work Die Steel. *Satoshi WATANABE.* ...671
- 138 Effect of Carbon on Cast Structure and High-Temperature Ductility of Die Steels Containing 8% Chromium. (Study on the cold working tool steels containing 8% chromium— I) *Michihiko SUZUKI, et alii.* ...673
- 139 Study on High-C, High-V, Co-Mo High Speed Steels. *Takeshi ITŌ, et alii.* ...676
- 140 On the Toughness of High Speed Steels by Static Bending Test. (Studies on the toughness of high speed steels— I) *Kingo KIYONAGA, et alii.* ...678
- 141 Effect of Carbon on the Molybdenum High Speed Steels. *Kingo KIYONAGA, et alii.* ...680
- 142 Effect of Tantalum on Properties of Steel. (Study on special elements in steel—W) *Atsushi MIYAMOTO, et alius.* ...684
- 143 Effect of Si Content on Hot Rolling of Stainless Steel. (Technique for production of stainless steel wire rod— I) *Seiichi AIHARA, et alius.* ...686
- 144 Effect of Lead on Some Mechanical Properties of Low Carbon Steel, Cold or Warm Strained. *Akira KOYANAGI, et alius.* ...689
- 145 Effect of Lead on the Impact Characteristics of Low Carbon Steel. *Akira KOYANAGI, et alius.* ...692
- 146 On the Rolling Fatigue Characteristics of Case Hardened Alloy Steels with and without Lead Addition. *Dr. Tōru ARAKI, et alii.* ...695
- 147 On the Spring Type Multi-Creep Rupture Testing Machine. *Dr. Toshio FUJITA.* ...698
- 148 Study on the Creep Rupture Properties of Tubular Specimens. *Dr. Noboru SHINODA, et alii.* ...701
- 149 Rupture Strength of Thick-Walled Cylinders Subjected to Internal Pressure at Elevated Temperature. *Masamichi TAKAHASHI, et alius.* ...703
- 150 The Influence of Alloying Elements on the Hardenability and Creep Rupture Strength of Cr-Mo-V Steel. *Ryoichi SASAKI.* ...706
- 151 The Creep Rupture Properties of $1\frac{1}{4}\text{Cr}-1\frac{1}{2}\text{Mo}-\frac{3}{4}\text{Si}$ Steel and $2\frac{1}{4}\text{Cr}-1\text{Mo}$ Steel. *Humio HATAYA, et alius.* ...709
- 152 Effect of Grain Size of Austenite on the Creep Rupture Strength of Cr-Mo-V Steel. *Dr. Yūkō KUMADA.* ...711
- 153 Study of 12% Cr Heat Resisting Steels. *Seikichi YAMADA, et alii.* ...713
- 154 Effect of Co and Ni on the Properties of 12%Cr-Mo-V-Nb Heat Resisting Steels. *Haruo NAKAJIMA, et alii.* ...716

- 155 Study on the Improvement of Ductility in 25Cr Ferritic Steel.
(Study on 25Cr ferritic steel—III) *Tsugio KANEDA, et alii.* ...719
- 156 On the Effect of Uranium Additions upon Behaviors of Nitrogen in Austenitic Stainless Steels.
(Studies on behavior of uranium in austenitic stainless steel—II) *Kazuo EBATO, et alii.* ...722
- 157 On the High-Temperature Strength and Structural Change of Type 316 Austenite Stainless Steel Castings. (Study on austenite stainless steel castings—I) *Nobuhiro ŌKUBO, et alii.* ...724
- 158 Effect of Solution Temperature to Creep Rupture Properties of 17-10 Ti Stainless Steel. *Noboru TAKAHASHI, et alius.* ...728
- 159 Effect of Multiple Additions of Boron, Molybdenum, Niobium and Titanium on High Temperature Properties of 18Cr-12Ni Heat Resisting Steels.
(Studies on austenitic heat resisting steels—II) *Yoshikuni KAWABE, et alii.* ...729
- 160 Effect of Ti, Ti+B and Nb+N on Creep Rupture Strength of 15Cr-15Ni Austenitic Heat Resisting Steels.
..... *Dr. Toshio FUJITA, et alius.* ...733
- 161 Effect of Ni, B and Mo+W on 15Cr-25Ni Austenitic Heat Resisting Steels. (Studies on austenitic heat resisting steels—IX) *Dr. Toshio FUJITA, et alii.* ...735
- 162 Study on the Phosphorus Modified Heat Resisting Steels for Exhaust Valves. *Mitsuo YAMAZAKI, et alius.* ...737
