

Contents of the Technical Papers for the 70th Grand Lecture Meeting
of The Iron and Steel Institute of Japan.*

CONTENTS

Lect. No.	T i t l e	Lecturer
1	Investigation of the Residue on Dissecting of Muroran No. 2 Blast Furnace Hearth.	<i>Yoshio OKUNO, et alii.</i> ...1713
2	On the Construction of No. 5 Blast Furnace at Chiba Works.	<i>Takao YAMADA, et alii.</i> ...1715
3	Automatic Weighing and Charging System of No. 5 Blast Furnace at Chiba.	<i>Tamotsu NAGAI, et alii.</i> ...1717
4	The Influence to the Blast Furnace Operation by Fixing the Charging Equipment.	<i>Seisaku SUZUKI, et alii.</i> ...1719
5	Blast Furnace Practice with Imported Pellet vs Sinter at Tobata No. 2 Blast Furnace.	<i>Tetsuzō SAKAMI, et alii.</i> ...1722
6	High Productivity Operations of the No. 1 Blast Furnace of Mizue Iron Works.	<i>Motohiko IZUKA, et alii.</i> ...1725
7	High Top Pressure Operation of Chiba No. 2 Blast Furnace.	<i>Toru KADOWAKI, et alii.</i> ...1728
8	Operation with Oxygen Enriched Blast at Tobata No. 3 Blast Furnace.	<i>Akitsugu HANABUSA, et alii.</i> ...1730
9	Study on the Fuel Injection into the Blast Furnace.	<i>Jun SAWAMURA, et alii.</i> ...1733
10	The Effect of Dolomite Addition to the Burden on the Disulfurization of Pig Iron in Blast Furnace.	<i>Nobuo TSUCHIYA, et alii.</i> ...1736
11	On Vaporization of Potassium, Sodium and Zinc in the Blast Furnace. (Studies on hanging in a blast furnace—IV)	<i>Takehiro HORIO, et alii.</i> ...1739
12	Use of R. I. Tracer in Blast Furnace Operations.	<i>Isamu MISHIMA, et alii.</i> ...1742
13	Introduction of Computer Control to the Blast Furnace.	<i>Kazuo FUKAYA, et alii.</i> ...1745
14	Study on Relation between Melting Point, Wettability and Sinter Characteristic of Iron Ore.	<i>Shōzō WAKAYAMA, et alii.</i> ...1747
15	On the Classification of Sintering Materials.	<i>Tomorō HAGIWARA, et alii.</i> ...1750
16	Influence of Temperature on Ore Reduction. (Reduction test of ore bed—IV)	<i>Dr. Tanekazu SŌMA</i> ...1753
17	The Effect of Properties of Iron Ores during Reduction on Blast Furnace Process. (Estimation of properties of iron ores— I)	<i>Nobuo TSUCHIYA, et alii.</i> ...1756
18	The Effect of Properties of Iron Ores during Reduction on Blast Furnace Process. (The effect of properties on the productivity— I).....	<i>Nobuo TSUCHIYA, et alii.</i> ...1758
19	Study on Degradation of Iron Ore by Heating.	<i>Katsuhiko SATŌ, et alii.</i> ...1760
20	Application of Reduction Test of Iron Ore to Blast Furnace Operation.	<i>Hideo KANOSHIMA, et alii.</i> ...1763
21	On the Effect of Reduction Rate of Iron Ore on Coke Rate.	<i>Yukihiro ABE, et alius.</i> ...1765
22	Investigations of Ore Reduction Processes. (Basic study on iron making by a miniature blast furnace— I)	<i>Akimitsu ŌKURA, et alii.</i> ...1769

* To be held on Oct. 13~15, 1965 at Kyūshū Institute of Technology.

23	Effect of Various Oxide in Iron Oxide on the Carbon Deposition.	Jirō HIRAO ...1771
24	Studies on the Reaction of Carbon Deposition in a Gas-Circulating System.	Tadakuni MORI, et alii. ...1773
25	On the Characteristics of Open Hearth Furnace Dust and Various Zinc Removal Processes. (The study of zinc removal from open hearth furnace dust— I)	Kyōichi NAGANO, et alii. ...1777
26	Detinning of Iron Ores by Volatilization Roasting with Chlorides.	Dr. Keizō OKAMOTO, et alius. ...1779
27	On Separation of Chromium from Laterite and Mineralogical Properties of Chromite.	Hisashi KAHATA, et alii. 1782
28	On the Extraction of Nickel as Nickelcarbonyl from Lateritic Ore.	Masakazu NAKAMURA, et alii. ...1784
29	On the Reduction of Laterite by Water Gas in a Fluidized Bed.	Yoshihisa HAMADA, et alii. ...1786
30	Studies for Sandy Iron Ore from Tanegashima. (Studies on thermo-magnetic separation for iron sand— I)	Taizō NAKATA, et alii. ...1789
31	On the Condition of Phosphor Contained in Undersea Iron Sand.	Takehiko SAKATA, et alius. ...1792
32	On the Permeability of Pellet in the Blast Furnace.	Yukihiko HIDA, et alii. ...1794
33	Charge Distribution in Blast Furnace: A Model Experiment and its Application.....	Koji SATOMI, et alii. ...1797
34	The Properties of Blast Furnace Tap-hole Refractories.....	Ichirō TAKATA, et alius. ...1800
35	On the Design and Fundamental Tests of Hot Stove Made of Special Steel Tubes.	Dr. Takahiro MORIMUNE, et alii. ...1803
36	Supplementary Combustion of Heavy Oil at the Blast Furnace Hot Stove.	Iwatarō MIMA, et alii. ...1805
37	Effect of the Size Distribution of Bedding Ore on Sintering Characteristics.	Shūji KAJIKAWA, et alii. ...1808
38	Investigation of Magnetite Fines in the Sintering Mixture.	Shirō SHŌNO, et alii. ...1810
39	Effect of Grain Size of Lime Stone on Sintering.	Hiroaki HIRAHARA, et alii. ...1812
40	A Study on the Control of Sinter Productivity.	Mitsuteru MATSUBARA, et alii. ...1814
41	On Measurement of Fine-Ores' Stickiness.	Kinichi SUGAWARA, et alius. ...1816
42	On Desulphurization of Solid Powdered Iron.	Dr. Kiyoshi SAWAMURA, et alius. ...1818
43	Desulphurization Test of Partly Reduced Sponge Iron.	Kazuichi MIZOGUCHI, et alius. ...1820
44	The Silica Reduction between $\text{CaO-Al}_2\text{O}_3\text{-SiO}_2$ and Carbon-Saturated Iron.	Tōru TANIMURA, et alius. ...1823
45	On Measurement of Deoxidation Rate of Liquid Steel by EMF Method. (Study on oxygen concentration cells at high temperature— VII).....	Ph., D. Kazuhiro GOTŌ, et alius. ...1825
46	On the Reactions of the Desulphurization of Liquid Iron by Using a Rocking Furnace. (Kinetic study on the steelmaking reactions— I)	Sumio SHIOMI, et alii. ...1828
47	The Solubility of Hydrogen in Liquid Iron Alloys and the Adsorption on Graphite. (Pure Fe, Fe-C, Fe-Si alloys, Fe-C-Si alloys, graphite)	Shigeyoshi FUKUDA, et alii. ...1830
48	The Rate of Absorption of Nitrogen in Liquid Iron Alloys of Fe-C-Cr System. (Studies on the rate of absorption of nitrogen in liquid iron— IV).....	Takao CHŌ, et alius. ...1832
49	Effect of Oxygen, Sulfur, Selenium and Tellurium on the Solubility of Nitrogen in Liquid Iron.	Fujio ISHII, et alii. ...1834

- 50 The Solubility of Water in Liquid Slag. (Water solubility in SiO_2 -CaO-Acid oxide (P_2O_5 , B_2O_3 , GeO_2) and SiO_2 -CaO-Amphoteric oxide (Al_2O_3 , TiO_2) system— I)*Dr. Shiro BAN-YA, et alii.* ...1837
- 51 A Study on the Conclusion of the Slag Viscosity Near the Neutrality. *Mineo KOSAKA, et alius.* ...1840
- 52 Determination of Cell Constant at High Temperature for the Electrical Conductivity Measurement of Molten Slags. (Research on the molten slag refyning— I) *Makoto KATŌ, et alius.* ...1844
- 53 Effect of Na_2O and Na_2SiF_6 Addition on the Viscosity and the Electrical Conductivity of Molten $\text{CaO}(41)$ - $\text{SiO}_2(48)$ - $\text{Al}_2\text{O}_3(11)$ Slag. (Research on the molten slag refyning— II) *Makoto KATŌ, et alius.* ...1846
- 54 Viscosity Measurement of Molten $\text{CaO-SiO}_2\text{-Al}_2\text{O}_3$ Slag by Counterbalanced Sphere Method. (Research on the molten slag refyning— III) *Makoto KATŌ, et alius.* ...1849
- 55 Viscosity of $\text{CaO-SiO}_2\text{-Cr}_2\text{O}_3$ Ternary Slags. (Study on the viscosity of slags containing Cr_2O_3 — I) *Dr. Tsunetzō SAITŌ, et alius.* ...1851
- 56 Viscosity of $\text{CaO-SiO}_2\text{-Cr}_2\text{O}_3\text{-FeO}$ Slags and the Effect of Addition of CaF_2 and TiO_2 . (Study on the viscosity of slags containing Cr_2O_3 — II) *Dr. Tsunetzō SAITŌ, et alius.* ...1855
- 57 Effect of Slag Composition on Interfacial Tension between Molten Steel and Slag. (Fundamental study on interfacial phenomena in iron-and steel-making processes— III) *Tetsurō SUETAKI, et alii.* ...1857
- 58 Hydrogen Deoxidation of Molten Iron under Reduced Pressure.*Toshiharu MITSUO, et alii.* ...1860
- 59 Evaporating Rate of Several Elements in Molten Iron under Reduced Pressure. (Fundamental study on the vacuum melting— III) *Yoshirō KATASE, et alii.* ...1863
- 60 Effect of Vanadium on the Deoxidation with Silicon in Liquid Iron.*Hiroataka CHINO, et alii.* ...1866
- 61 Study on the Si-Deoxidation of the Molten Iron. *Rokuro SAKAGAMI, et alii.* ...1869
- 62 Mechanism of Formation of CO Bubble in Ingot under Solidification. (Study on solidification structures of semi-killed steel ingot— I)*Tetsurō ŌHASHI, et alius.* ...1871
- 63 On Number of Elongated Blowholes and its Distance from Ingot Surface. (Study on solidification structures of semi-killed steel ingot— I) *Tetsurō ŌHASHI, et alius.* ...1874
- 64 On Radius and Length of Elongated Blowhole. (Study on solidification structures of semi-killed steel ingot— III) *Tetsurō ŌHASHI, et alius.* ...1877
- 65 Duration of Rimming Action in Ingot Solidification of Rimming Steel. (Tracer application of RI to steel works— X)*Dr. Hisashi MORI, et alii.* ...1879
- 66 Assessment of Skin Thickness of Rimming Ingots.*Mitsuo KANDA, et alii.* ...1881
- 67 Investigations Comparing Hot-Tops with 2 and 4 Faces Sleeves for Larges Killed Ingot. *Akihiro MARUOKA, et alii.* ...1884
- 68 Relation between Internal Quality of Ingots and Mold Dimensions. *Kōji ISHIHARA, et alii.* ...1885
- 69 On the Solidification of Feeder Head of Ingot. (Study on the solidification and segregation of large steel ingot for forging— I) *Tōru TODOROKI, et alii.* ...1888

- 70 The Model Experiment Connected the Formation of Λ -Segregation. (Study on the solidification and segregation of large steel ingot for forging—III) ...*Michio HAGA, et alii.* ... 1890
- 71 On the Formation of Λ -Segregation. (Study on the solidification and segregation of large Steel ingot for forging—IV).....*Michio HAGA, et alii.* ...1893
- 72 On the Seamy Defects of Capped Steel Hot Coil. *Dr. Susumu, SATŌ, et alii.* ...1895
- 73 Mixing of Molten Steel and Dissolution of Ferroalloy during DH Treatment. (Tracer application of RI to steel works—V)*Fusao TANAKA, et alii.* ...1898
- 74 Effect of the Continuous Casting Conditions on the Qualities of Continuously Cast Ingot and Rolled Products of Pure Nickel. (Study on the continuous casting of steel—IV) *Takeshi SUZUKI, et alii.* ...1901
- 75 Continuous Casting at North Japan Special Steel.*Dr. Shinkichi KOIKE, et alius.* ...1904
- 76 Factorial Analysis for Changes of Bath Condition in the Refining Period of O.H.F., and it's Application. (Standardization of O.H.F. practice— I) *Hiroaki SUGIHARA, et alii.* ...1907
- 77 The Influence of Spouting by Bath Motion. (The study of several phenomena in LD converter by cold models— I) *Kazuo SANO et alius.* ...1909
- 78 Operation by Multi-hole Lance Nozzle Compared with Single-hole Lance Nozzle. (Study on lance nozzle at LD converter— I)*Syūjirō ONO, et alii.* ...1911
- 79 Some Theoretical Aspects on Lance Nozzle. (Study on lance nozzle at LD converter— III) *Syūjirō ONO, et alii.* ...1914
- 80 On the Kinetics of the Blowing Reaction with Multi Nozzle in Basic Oxygen Converter. (On the kinetics of the blowing reaction in basic oxygen converter— V) *Takashi FUJII, et alii.* ...1917
- 81 Effect of Fluxes as Coolants on Blowing Time and Metallic Yield. (Study on iron contents of slag of low carbon steel by LD process— I)*Masayuki HANMIYŌ, et alii.* ...1920
- 82 Refining Process of LD Steelmaking. *Jun-ichi MATSUNO, et alii.* ...1922
- 83 On the Melting Rate of Scrap and Cold Pig Iron in the LD Process. *Tadao TOMINAGA, et alii.* ...1925
- 84 On the Temperature Drop between and Point of Blowing and Tapping at LD Process. (On the temperature drop between point of blowing and teeming at LD process— I) ...*Hiroshi HIRAHARA, et alii.* ...1928
- 85 Separation of Slag Emulsion from Molten Steel in LD Converter. (Tracer application of RI to steel works— VIII) *Kiyohito TANIZAWA, et alii.* ...1930
- 86 Some Attempts to Improve the Mathematical Model of LD process. *Hirotooshi NOKAWA, et alii.* ...1933
- 87 Hot Repairs of Converter Lining. *Yoshichika MIZUNO, et alii.* ...1935
- 88 Outline of LD-AC Facility and Operation Result. (On the LD-AC process in N.K.K. Kawasaki Iron Work) *Katashi SAITŌ, et alii.* ...1937
- 89 Effects of Electro-Slag Remelting on the Properties of Steel.*Rokuo ICHIASU, et alii.* ...1940
- 90 Model Consideration Concerning the Electric Resistance and Electrode Diameter at the Electro-Slag Remelting. *Rokuo ICHIASU, et alii.* ...1942

- 91 Consideration of Some Phenomena at Electro-Slag Remelting. *Rokuo ICHIYASU, et alii.* ...1946
- 92 Slag-Metal Reaction in the Electro-Slag Remelting Process. (Fundamental studies on electro-slag remelting— I) ... *Takamichi ITŌ, et alii.* ...1948
- 93 About the Formation and Decomposition Behavior of Inclusions. (Fundamental studies on the nonmetallic inclusions in steels of Fe-Cr-O system—Ⅵ) *Nobuya IWAMOTO, et alii.* ...1951
- 94 About the Deoxidation Products Formed in Steels by Silicon Addition. (Studies of deoxidation products— I)..... *Nobuya IWAMOTO, et alii.* ...1953
- 95 Behaviour of Deoxidation Products in Al Deoxidation. (Study on behaviour of deoxidation products in iron and steel— I) *Dr. Iku UCHIYAMA, et alius.* ...1956
- 96 Behaviour of Inclusions in Steels Deoxidized with Combination of Mn-Al and Si-Al. (Deformation of nonmetallic inclusions in steels during rolling— V) *Masae SUMITA, et alius.* ...1959
- 97 Some Consideration on the Mechanism of Deoxidation Reaction of Molten Steel. *Dr. Kazuteru SENDA* ...1962
- 98 Mechanism of Formation of Macroscopic Inclusions Produced by Air Oxidation of Molten Steel. *Dr. Kazuteru SENDA* ...1965
- 99 On the Variations of the Concentrations of Inclusions in Liquid Iron at the Lowering Temperature. *Yasushi KOJIMA, et alius.* ...1967
- 100 Cerium Deoxidation and Non-metallic Inclusions in Fe-C Alloy. *Yasuo WATANABE, et alius.* ...1970
- 101 Tracing Distribution of Primary Deoxidation Product in Ingot with ¹⁴⁰La. (Tracer application of RI to steel works— X) *Dr. Hisashi MORI, et alii.* ...1973
- 102 On the Distribution of Inclusion from Graphite-Silicon Molding Board. *Etuo NOMURA, et alii.* ...1976
- 103 On Slivers in Aluminum Killed Low Carbon Steel Sheet. *Hideo ITOH, et alii.* ...1978
- 104 On Seamy Crack at the Welded Part of Semi-Killed Steel Hoop. *Yukiyoshi ITOH, et alii.* ...1981
- 105 On Behavior of Non-metallic Inclusions by Air Oxidation during Teeming of Stainless Steels. (Study of defects by non-metallic inclusions in stainless cold sheet— I)..... *Masayuki KINUGASA, et alii.* ...1983
- 106 The Role of Misch Metal as Deoxidizing and Desulfurizing Agents in Pure Iron. (Study of pure iron—Ⅶ) *Toshikatsu ŌTANI, et alius.* ...1987
- 107 Metallurgical Improvements of the Quality of Cold Rolled Deep Drawing Quality Rimmed Steel Sheet.... *Takao HINO, et alii.* ...1990
- 108 Nitrogen Absorption of Pure Iron and Fe-La Alloys. *Kaname WADA, et alii.* ...1992
- 109 On the Variation of Composition Occured on the Surface of Steel with Heating. (Characteristics of surface layer formed on hot-worked steel products— I) *Dr. Yoshihiko ABE, et alius.* ...1995
- 110 Some Delayed Failure Phenomena on the Cold Strip Mill Rolls. (Study on the working rolls of cold strip mills—Ⅳ) *Kiyozō SAKABE, et alii.* ...1998

- 111 On the Residual Stresses of Cylindrical Steel Pieces with Unhardened Core. (Study on the working rolls of cold strip mills—V) *Kiyozō SAKABE, et alii.* ...2001
- 112 The Thermal Shock Cracking on the Surface of the Forged-Hardened Steel Roll. (Observation on damaged zones of the roll surface and thermal shock test—I) *Hirosuke TABE, et alii.* ...2004
- 113 The Relation of Chemical Composition to the Critical Temperatures of Low-Carbon Low-Alloy Steels. *Dr. Taturō KUNITAKE, et alii.* ...2006
- 114 The Effect of Small Amounts of Ni and Cr on Hardenability and Properties of Slack Quenched Zone of 0.5% C Constructional Steel. (Studies on effects of metallic impurities on properties of steel—IV) *Shirō YOSHIMATSU, et alii.* ...2008
- 115 On the Warm Bending of Low Carbon Steel Sheets. *Ichirō ONODA, et alius.* ...2011
- 116 Study of the Standard Steel Contained Zirconium. (The material properties and continuous cooling transformation curves—I) *Dr. Haruhiko FUJITA, et alii.* ...2014
- 117 Some Experimental Factors Affecting the Tearing Strength of Soldered Joints in Tinplate. *Keiji ARIGA, et alius.* ...2017
- 118 On the Ultrasonic Testing of Heavy Plate by Transmission Method. *Yukito SASAKI, et alii.* ...2019
- 119 Relation between Ultrasonic Flaw Echoes of the Billets of Low Carbon Rimmed Steels and the Inside Defects of Seamless Tubes. (Studies on the qualities of steel tube billets and the defects of finished tubes—I) *Shigeru MATSUKUMA, et alii.* ...2021
- 120 The Effects of Alloying Elements on the Mechanical Properties and Cold Formabilities of Hot Rolled Steel Sheets. (High strength steel sheet for cold forming quality—I) *Shigeaki MARUHASHI, et alii.* ...2025
- 121 The Effects of Microstructures on the Mechanical Properties and Cold Formabilities of Hot Rolled Steel Sheets. (High strength steel sheet for cold forming quality—I) *Shigeaki MARUHASHI, et alii.* ...2028
- 122 Thermodynamic Behaviors of Niobium-Carbide, -Nitride and Sulfide in Steel. *Masaharu TOKIZANE, et alii.* ...2031
- 123 Effect of Niobium on Mechanical Strength of Low Carbon Steel. (Fundamental study on niobium-added steel—IV) *Masaharu TOKIZANE, et alii.* ...2034
- 124 Studies on Tempering Characteristic of A-302B. (Studies on a reactor vessel steel, ASTM A-302B—I) *Dr. Shin'ichi NAGASHIMA, et alii.* ...2037
- 125 On the Mechanical Properties of Heavy Plate. (Studies on a reactor vessel steel, ASTM A-302B—II) *Mizuo SAKAKIHARA, et alii.* ...2040
- 126 A Study on the Wires and Fluxes for Submerged Arc Welding. (Studies on a reactor vessel steel, ASTM A-302B—III) *Kō MORIYAMA, et alii.* ...2041
- 127 Neutron Irradiation Effects on Mechanical Properties. (Studies on a reactor vessel steel, ASTM A-302B—IV) *Keiji SHIMOKAWA, et alii.* ...2044

- 128 Transmission Electron Microscopy of the Neutron Irradiated A-302B Steel. (Studies on a reactor vessel steel, ASTM A-302B-V) *Dr. Shin'ichi NAGASHIMA, et alii.* ...2047
- 129 Studies on the Impact and Static Characteristics for Tensile Specimen. (Relations of heat-treated temperature and impact properties for both notched and unnotched specimen of the steels— I) *Yung-Ha YUM* ...2049
- 130 Studies on the Mechanical Properties of Tensile Impact Specimen. (Relations of heat-treated temperature and impact properties for both notched and unnotched specimen of the steels— I) *Yung-Ha YUM* ...2052
- 131 Studies on the Impact and Static Characteristics for Charpy Specimen. (Relations of heat-treated temperature and impact properties for both notched and unnotched specimen of steels— II) *Yung-Ha YUN* ...2056
- 132 On the Tempering Behavior of 3Mo, 3Ni-1Mo, 3Ni-3Mo and 3Ni-5Mo Steels. (Study on hot-working tool steel— VII) *Tomitaka NISHIMURA, et alius.* ...2059
- 133 Study on Nishihara's Wear Test, the Tortion Test at High Temperature and the Quenching Effect in Several Media of Spring Materials Mode of 9% W-Cr-V Steel Mn-Cr Steel and Si-Mn Steel. (Study on the spring materials— VIII) *Dr. Hideji HOTTA* ...2062
- 134 Some Experiments on Decarburization and Denitritization of Steel Sheet by Iron Oxide and Al Powder Coating Method. *Takehiko SHIBAI, et alius.* ...2063
- 135 Wear Resistance of Steel Tube Materials. *Nobuyuki KAWAUCHI, et alii.* ...2066
- 136 Diffusion of Massive Carbides in Bearing Steels by Soaking. *Dr. Sadao NAKAMURA, et alii.* ...2069
- 137 On the Fatigue Life of Vacuum Degassed Bearing Steel. *Dr. Susumu YŪKI, et alii.* ...2071
- 138 The Effect of Electron Beam Melting on the Fracture Toughness of Some Ultra-high Strength Steels. *Takashi YASUNAKA, et alii.* ...2074
- 139 On the Heat Treatment and Mechanical Properties of Maraging Stainless Steel Containing Cobalt. (Study on maraging stainless steel— I) *Kazuo EBATO, et alius.* ...2076
- 140 On the Spring Properties of 18Ni and 15Ni Maraging Steels at Room Temperature. (Studies on super alloys for spring— VIII) *Yoshiaki KANAI, et alii.* ...2079
- 141 On the Spring Properties of 18Ni and 15Ni Maraging Steels at High Temperature. (Studies on super alloys for spring— IX) *Yoshiaki KANAI, et alii.* ...2082
- 142 On the Mechanical Properties and Heat-Treating Behavior of Zirconium, Tungsten or Vanadium-Bearing Rapid Nitriding Steel. (Study of rapid nitriding steel— I) *Hiroshi SASAKI, et alii.* ...2084
- 143 Effect of Working on the Hardness and the Micro-Structure of Precipitation Hardening Steels. (On the precipitation hardening high speed steels— I) *Dr. Etsujirō YAJIMA, et alii.* ...2087
- 144 Toughness and Other Properties of High Speed Steel in Low-Temperature Quenching. (Studies on the toughness of high speed steels— I) ... *Rikizō WATANABE, et alii.* ...2089

145	Study on Some Properties of Nonheat-Treated Type High Yield Strength Steel.	<i>Tōru</i> ISHIDA, <i>et alii.</i> ...2092
146	On the Properties of the Forged High Strength Steel. (Study of weldable forged high strength steel— I)	<i>Ryūzō</i> YANAGIMOTO, <i>et alius.</i> ...2094
147	On the High Temperature Characteristics and the Transverse Ductilities of Forgings. (Study of weldable forged high strength steel— II)	<i>Ryūzō</i> YANAGIMOTO, <i>et alius.</i> ...2096
148	The Test Method of Delayed Failure and Some Test Results. (Delayed failure properties of high strength steels— I)	<i>Tatsu</i> FUJITA, <i>et alius.</i> ...2098
149	On the Quality of 18-8 Stainless Steel Wire Rod from Continuously Cast Bloom.	<i>Takafumi</i> YOSHIMURA, <i>et alii.</i> ...2101
150	Stainless Composite Steel Pipes Manufactured by the Cold-Drawing Process and their Sinking Tests. (Study of composite materials— III)	<i>Shōhei</i> FUJITSU. ...2103
151	On the Rotating Bending Fatigue Strength of a Cold Worked 18Mn-Cr Austenitic Steel.	<i>Toshio</i> ICHIOKA, <i>et alii.</i> ...2105
152	On the Effect of Aluminium Concerning High Temperature Strength of Cr-Mo Boiler Tube.	<i>Kazuo</i> KAZIKAWA, <i>et alii.</i> ...2107
153	Some Effects of Heat-Treatments on Creep Rupture Strength of Low C-Cr-Mo-V Steel.	<i>Takayasu</i> OKADA, <i>et alii.</i> ...2110
154	High-Temperature Strength of Low Carbon Steel for Boiler Melted by Converter.	<i>Teruo</i> YUKITOSHI, <i>et alii.</i> ...2112
155	On the Qualities of Cr-Mo Steels for Boiler Tube Produced by Oxygen Converter. (On the production of alloy steels by oxygen converter— V)	<i>Kōhei</i> KAWAI, <i>et alii.</i> ...2114
156	Effect of Solution Heat-Treatment on the 15Cr-12Ni Austenitic Heat Resisting Steel. (Studies on the weak precipitation hardening austenitic heat resisting steel— IV)	<i>Hidekatsu</i> KUKI, <i>et alius.</i> ...2117
157	The Effect of Mo, Nb, Ti, and B on High Temperature Properties of 18Cr-12Ni Heat Resisting Steel Containing Nitrogen. (Study on austenitic heat resisting steel— V)	<i>Yoshikuni</i> KAWABE, <i>et alius.</i> ...2120
158	Structural Changes Due to High-Temperature Ageing of High-Nitrogen 25%Cr-28%Ni Heat-Resisting Steels. (Studies on high-nitrogen 25%Cr austenitic heat-resisting steels— IV)	<i>Takayuki</i> SHINODA, <i>et alius.</i> ...2123
159	Effect of Molybdenum and Nitrogen on High-Temperature Strength of High-Nitrogen 25%Cr-28%Ni Heat-Resisting Steels. (Studies on high-nitrogen 25%Cr austenitic heat-resisting steels— V)	<i>Takayuki</i> SHINODA, <i>et alius.</i> ...2125
160	The Influence of Small Niobium Addition on the Mechanical Properties of JIS SCM3 Steel.	<i>Haruo</i> KAJI, <i>et alii.</i> ...2127
161	Bainite Transformation of Cr-Mo Steel in Temperature Range near Ms.	<i>Hirooki</i> NAKAJIMA, <i>et alius.</i> ...2130
162	Tempering a 9% Nickel Steel.	<i>Junzō</i> TAKAHASHI, <i>et alii.</i> ...2133
163	On Cold Roll Forming Forces. (Study on cold roll forming— I)	<i>Toshitaka</i> TAMANO, <i>et alii.</i> ...2135

164	Study on the Fabrication of Embossed Sheet.	Mikio TAUMI, et alii.	2137
165	Effect of the Crystallographic Orientation on the Deep- Drawability and Mechanical Properties of Extra-Low Carbon Rimmed Steel Sheets. (Study on the press formability in extra-low carbon steel sheets— I)	Yō ITŌ, et alius.	2140
166	Effect of the Crystallographic Orientation and Grain Size on the Stretchability of Extra-Low Carbon Rimmed Steel Sheets. (Study on the press formability in extra-low carbon steel sheets— I)	Yō ITŌ, et alius.	2142
167	Extraordinary Behaviors of the Extruded Steel Tubes Near the Leading End. (Results of ring-test of 18-8 stainless tubes— I)	Hiroshi TAKIGUCHI, et alius.	2144
168	On the Cold Drawing of Mild Steel Tubes. (Studies on the cold work of steel tubes— I)	Takeshi ASANO et alii.	2146
169	Hot Strip Mill Work Roll Temperature during Rolling.	Eisuke NIYAMA, et alii.	2149
170	On the Influence of Contact Mechanism to Inner Deformation of Materials in Rolling.	Dr. Samon YANAGIMOTO ...	2152
171	Model Test on the Mechanism of the Residual Deflection of Built-up Type Back-up Rolls.	Kiyoshi HORI ...	2154
172	The Structure and Removal of Scale on Wire Rod.	Michitaka FUJITA, et alius.	2156
173	Transformation of Wüstite.	Fumio MATSUNO, et alii.	2158
174	Simple Measuring Method of R-Value.	Isao MIZUKI, et alii.	2161
175	On the Titanium Sulfide in Cast Iron Containing Titanium.	Takao YAMAZAKI, et alii.	2163
176	Bending Fatigue Strength of Cast Steel and Rough Estimation of its Pitting Limit.	Kōichi KUDŌ, et alii.	2166
177	Spot Welding of Hot Dip Galvanized Steel Sheet (Paintite).	Kiyoshi YOSHIDA, et alius.	2168
178	On the Copper Print Process for Steel.	Seiichi YAMAZAKI, et alii.	2171
179	Spectrophotometric Determination of Boron in Steel with Barium Chloranilate.	Dr. Shigeo WAKAMATSU.	2173
180	Determination of Oxide Inclusions in 1%C-1.5%Cr Bearing Steel.	Michio WAKAMATSU, et alii.	2176
181	Quick Determination of Oxygen in Steel by Fast Neutron Activation.	Kazuteru SHIMURA, et alii.	2178
182	Some Observations on Austenitic Grain. (Studies on austenitic grain— I)	Ryōsuke HONMA ...	2181
183	Effect of Heating Rate and Pre-treatment on Austenitic Grain Size. (Studies on austenitic grain— II)	Ryōsuke HONMA ...	2183
184	Effect of Small Amount of Chromium and Molybdenum on Diffusion of Nitrogen in Carbonitrided Case.	Hyōjirō KURABE ...	2186
185	Study on Stress Corrosion Cracking by Means of Internal Friction Measurement of Austenitic Stainless Steels.	Dr. Shigenori HORI, et alius.	2189
186	A Study on the Alkali Attack. (Study on the corrosion of boiler tube— I)	Tadashi ENDŌ, et alii.	2192
187	On the Corrosion of Stainless Steel Tubes in Practical Instruments by High Temperature Gases Containing Co and H ₂	Toshihiko SAKAI, et alii.	2194
188	On the Aging of Electrolytic Galvanized Steel Sheets Surface.	Takeshi NISHIMURA ...	2197
