

# "Tetsu-to-Hagané"

Vol. 51, No. 12, Nov., 1965

## Contents

### Foreword

- A Thought of Substantial Development in Japan Iron and Steel Industry. .... *Toshirō ŌNAKA*...2201

### Technical Papers

- On Degradation of Sinter during Chemical Reduction. .... *K. KODAMA, A. SHIGEMI, K. ONO and T. HORIO*...2203
- A Consideration on Decarburization in the Oxygen Converter of Unburned Gas Recovery System. (Kinetic study of decarburization in molten steel—VI) ..... *T. FUJII and T. ARAKI*...2213
- On the Behaviors of the Precipitated Sulfide Inclusions in Solid Steel. .... *K. MATSUBARA*...2220

### Review

- The Physical Metallurgy of Sigma Phase in Cr-Ni-Fe Stainless Steels. .... *David W. McDOWELL*...2233

### Report of Joint Research Society,

### The Iron and Steel Institute of Japan

- Effects of Nickel and Chromium as the Tramp Elements on Low Carbon Steels. .... *Yukio MATSUSHITA and Nobutaka YAMAMOTO*...2241

---

Abstracts.....2281, Contents of the Recent Articles Published in Japan and Overseas.....2287, Patent Section.....2289, Miscellaneous:—News .....2290, Proceedings of the Institute.....2291, Notices to Members.....N91
