

“ Tetsu-to-Hagané ”

Vol. 53, No. 11, Sept., 1967

Contents

Study on the Hematite Bonding Mechanism of Magnetite Pellet in Firing	1155
Strength of Limonite Pellet from a Compression Press	1157
On the Hot Measuring Strength of Harada's Briquette during Reduction.....	1160
The Measurements of the Intraparticle Gaseous Diffusivity of the Iron-oxide Pellets	1163
On the Properties of the Reduced Pellets Produced from Converter Dust. (Studies on the reduction of converter dust pellets—II).....	1166
Reduction in Transport of Fine Pyrite Cinder by Hydrogen Gas. (Reduction of fine iron ores in gas-conveyed systems—I)	1168
Mathematical Model of Sintering Bed	1171
On the Mineral Composition and the Formation Mechanism of Scaffolding at the Blast Furnace Shaft.....	1173
On the Carbon Deposited in Altered Refractories of Blast Furnace	1176
The Analysis for the Rate of the Thermal Decomposition of Limestone	1179
On the Re-oxidation of the Reduced Iron Oxide and Iron Ores	1181
Analysis Concerning the Situations in Blast Furnace under Arbitrary Operating Conditions	1184
On the Rate of Dephosphorization of Liquid Iron by Solid Lime	1188
On the Growth of Inclusions during the Deoxidation with Calcium-Silicide. (Study on the behaviour of complex deoxidizers—II).....	1191
Decarburization of Molten Iron with CO ₂ -Ar Gas Mixtures.....	1193
Hydrogen Behavior among Gas, Slag, and Metal Phases during Refining Period of the Basic Open Hearth Furnace.....	1196
Nonmetallic Inclusions in 20t Heavy Steel Ingots Made by Basic Electric Arc Furnace and Acid Open Hearth Furnace as Well as Those in 20t Steel Ingot Made by Vacuum Casting. (Study on specifications of heavy steel forgings made by basic electric arc furnace and acid open hearth furnace as well as investigation on vacuum casting—III)	1199
Some Views of Freezing Rate and Internal Structure of 20t Carbon Steel Ingot. (Study on specifications of heavy steel forgings made by basic electric arc furnace and acid open hearth furnace as well as investigations on vacuum casting—IV)	1202
On the End Point Temperature and Carbon Control with Dropping Thermocouple and Carbon Detector in the Molten Bath of L. D. Converter during Blowing	1205
On the Relationship between the Cooling Rate during Solidification and Dendrite Arm Spacing of a 4 ton Commercial Ingot	1207
Effect of Refining and Casting Conditions on the Ultra-Sonic Defect of Heavy Steel Plates. (On the mechanism of large inclusion formed in killed steel—I)	1210
On the Structural Non-uniformity in the Lower Portion of Killed Steel Ingot Made by Bottom Pouring	1213
Calculation of the Feeder Head for Steel Ingot.....	1216
Strain Rate Dependence of Flow Stress in Steels Measured by High Speed Hot Torsion Tests	1218
On the Hot Tube Pushing of Ehrhardt Process	1223
The Variation Analysis of Tube Wall Thickness on Mannesmann Piercer.....	1225
On the Limit for Cold Drawing. (Studies on the cold working of steel tubes—IV)	1228
The Influence of the Thermal History on the Hardenability of Steel.....	1231
On the Manufacturing Processes of Tapered Wires. (On the manufacturing of tapered wires—II)	1234
Study of Drawability of the Hard Steel Wire Rods.....	1237

Study on Cold Work Tool Steel Using Thermal Shock Equipment.	
(On the hardened steel rolls of cold strip mills—I).....	1239
The Creep Rupture Properties of High Tensile Strength Structural Steels	1242
Creep Rupture Behaviour and Hardness Characteristics of a 2 ¹ / ₄ % Cr-1% Mo Steel.....	1245
On Extrapolation Method of Creep-Rupture Data	1248
Effect of Nb, V, W, Y, Ti and Cu on High Temperature Strength of 9Cr-1Mo Steel.	
(Study of medium Cr heat-resisting steel—II)	1251
Effect of Si on High Temperature Strength of Low Carbon Steels Containing N and Al	1254
On the High Temperature Strength of 25Cr-12Ni Stainless Steels	1257
Effect of Al and N on High Temperature Strength of SUS 32	1259
The Welding of 17Cr-10Ni-1.5Mo-Cu-Nb-V Type Austenitic Steels.	
(Study on austenitic heat resisting steels—VI)	1263
Manufacture of Superheater Tubes and Its Properties of 17Cr-10Ni-1.5Mo-Cu-Nb-V Steel.	
(Study on austenitic heat resisting steels—VII)	1265
Effect of Ni on the Properties of 21Cr-12Mn-N Type Heat Resisting Steels for Exhaust Values	1268
The Effect of Mo on the Properties of SAE 51440C	1270
On the Effect of Nb and Mo Additions to Cr Bearing Steels on Room Temperature Properties.	
(On the effect of Nb and Mo additions to Cr bearing steels—I)	1273
On the Effect of Nb and Mo Additions to Cr Bearing Steels on High Temperature Properties.	
(On the effect of Nb and Mo additions to Cr bearing steels—II)	1276
On Corrosion and Sand Abrasion of Stainless and Heat Resisting Steels at High Temperature.....	1278
Estimation of the Continuous Cooling Transformation Diagram by the Chemical Compositions	1280
On Heat-Treatment Behaviour and Mechanical Properties of Manganese-bearing Maraging Steels	1282
Effects of Small Amounts of Chromium and Molybdenum on Behaviours of Carbon and Nitrogen in Carbonitrided Case of Steel	1285
Effect of Ti, Cu and W Addition on the Properties of 10Ni-5Mo-9Co Type Maraging Steel	1288
Study on the Precipitation Hardening Type Die Steels	1291
Effect of Ausforming on the Carbide Precipitation of Fe-Mo-C Alloy	1294
Effect of Martensite and Bainite Structures on Impact Properties in a Ni-Cr-Mo Steel	1296
Effect of Heat Treatments on the Austenitic Grain Size of Steels	1299
On the Nitrided Case of Rapid Nitriding Steel.....	1302
Rolling Fatigue Characteristics of Carburized or Carbonitrided 1% Cr Steel at Elevated Temperatures	1305
Rolling Contact Fatigue Strength of the Materials with Defects on their Surface.	
(On the damages due to rolling contact of back up roll materials—V).....	1308
Effect of Carbon Content and Heat Treatment on the Machinability of Carbon Steels	1311
Effect of Microstructure on the Specific Wear of Carbon Steel for Cutleries.....	1313
Effect of Ni on the Properties of 0.6C-5Cr-1.2Mo Tool Steel for Shear Blade.....	1316
Effect of Carbon Content on Grindability of 17Cr Stainless for Cutleries.....	1318
Effect of δ -Ferrite on Piercing of 13%Cr Stainless Seamless Tube.....	1321
Effect of Carbon Content and Heat-Treatment on the Specific Wear of Stainless Steel for Cutleries	1323
Study on the High-Cr Steels for Hard Facing of Exhaust Valve	1326
The Influence of Some Alloying Elements on the Properties of 9% Ni Steel	1329
Effect of Temperature on Fracture Toughness Determined by Static Bending Test of Nitrided Notch Specimens and Relation with Standard V Charpy Impact Transition Temperature of Ni-Mo-V Steel. (Studies on brittle fracture initiation of steels—II).....	1331
Effect of Boron on the Properties of 21-4N Steel.....	1334
On the Mechanical Properties of 21-12N Steel	1336
Strength of Screw Thread of Bolts under Simple Tension.	
(On the tensile strength of bolts—I)	1339
On the Measurement of Modulus in Torsion of High Carbon Steel Wire by Torsion Tester.....	1342
The Properties of High Tensile Strength Steel Pipes, HS2 and HS6, for High Pressure Service.....	1344
Embrittlement of Several Steels in High Temperature and High Pressure Ammonia.....	1347
On the Fluctuation of Gas Utilization Ratio in Blast Furnace.	

(Investigation of the characteristics of blast furnace by continuous top gas analysis—I)	1350
On the Determination of Trace Calcium in Steels	1353
Fluorescent X-Ray Methods for Determination of Coating Materials on Steel.....	1356
Spectrographic Solution Method for Determination of Acid Soluble Aluminum in Steels.....	1359
On the Detection and the Method of Chemical Separation of the Phosphate Contained in Ferrophosphor...	1361
Comparative Study on Determination of Oxide Inclusion in Steel by Iodine-Alcohol Bromine-Ester and Inorganic Acid Procedure.	
(Study on chemical analysis of nonmetallic-inclusion in iron and steel—I)	1363
Spectrophotometric Determination of Microamount of Boron in Steel by Solvent Extraction Method	1367
On the Comparison between Acceptance of Modern Iron-Making Technology in Germany and that in Japan at Meiji-Ishin	1369

Discussion	1373
