

The 73rd I. S. I. J. Meeting, April, 1967

CONTENTS

| Lect. | T i t l e | |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 1 | Study on the Microscopic Analysis of Blast Furnace Dust | 183 |
| 2 | Investigation of Green Pellets Strength (Fundamental study of pelletizing process— I) | 186 |
| 3 | Effects of Damp Grinding on Pelletizing of Fine Ores..... | 188 |
| *4 | The Effect of Addition Agents on Dehydration of Green Iron Ore Pellets | S 1 |
| *5 | Study on the Hematite Bonding Mechanism of Magnetite Pellet in Firing..... | S 2 |
| *6 | Strength of Limonite Pellet from a Compression Press | S 3 |
| 7 | On the Installation of Pelletizing Plant (On the installation and operation of pelletizing plant in Kobe Works (Nadahama)— I) | 191 |
| 8 | On the Operation and Quality of Pellets at Pelletizing Plant (On the installation and operation of pelletizing plant in Kobe Works (Nadahama)— II) | 194 |
| *9 | On the Hot Measuring Strength of Harada's Briquette during Reduction..... | S 4 |
| *10 | The Measurements of the Intraparticle Gaseous Diffusivity of the Iron-oxide Pellets | S 5 |
| 11 | On the Fixed Bed Reduction of Converter Dust Pellets with Solid Reductants (Studies on the reduction of converter dust pellets— I)..... | 197 |
| *12 | On the Properties of the Reduced Pellets Produced from Converter Dust (Studies on the reduction of converter dust pellets— II)..... | S 6 |
| 13 | On the Relation between Reducing Condition and Physical Properties of Pre-reduced Iron Ore Pellets (The basic study of pre-reduced iron ore pellets— I) | 199 |
| 14 | On Estimation Methods for Oxidization of Metallized Pellets | 202 |
| 15 | The Direct Reduction of Fine Iron Ores in a Self-agglomerating Fluidized Bed | 204 |
| *16 | Reduction in Transport of Fine Pyrite Cinder by Hydrogen Gas (Reduction of fine iron ores in gas-conveyed systems— I)..... | S 7 |
| 17 | Study on the Properties of Calcium Ferrites in the CaO-FeO-Fe ₂ O ₃ Ternary System (Study on the properties of self-fluxing sinter— II) | 207 |
| 18 | The Study of Binary System of CaO-Wustite..... | 210 |
| 19 | Effect of Finely Crushed Dolomite Brick on Sintering with a Small Apparatus..... | 212 |
| *20 | Mathematical Model of Sintering Bed | S 8 |
| 21 | Possibility of Sinter Quality and Productivity Control through Blending Control of Sinter Feed (Study on the sinter feed control— I) | 214 |
| 22 | Pre-drying of Coal for Manufacturing Blast Furnace Coke | 217 |
| 23 | On Segregation Roasting of Nickel Ores by Small Rotating Furnace..... | 219 |
| 24 | On the Extraction of Chromium and Aluminium from Lateritic Iron Ore (Study on the sodium roasting of lateritic iron ore— I) | 221 |
| 25 | Recoveries of Chromium, Aluminium and Sodium from Leached Liquor (Study on the sodium roasting of lateritic iron ore— II)..... | 225 |
| 26 | The Fifth Remodelling Program of Hirohata No. 1 Blast Furnace and Subsequent Operations | 229 |
| 27 | Improvement of Productivity at Turumi No. 1 Blast Furnace | 231 |
| 28 | Blast Furnace Experimental Operation with P-C Coke | 235 |
| *29 | The Effects of Blast Furnace Scaffolding on the Shaft Gas Distributions | S 9 |
| *30 | On the Mineral Composition and the Formation Mechanism of Scaffolding at the Blast Furnace Shaft | S 10 |

To be held on April 5~7, 1967 at The University of Tokyo

* The offset printed abstract of this paper is found in Tetsu-to-Hagané, 53 (1967) No. 5

| | | |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 31 | On the Mechanism of Scaffold Formation in Blast Furnace and Its Prevention | 239 |
| *32 | On the Carbon Deposited in Altered Refractories of Blast Furnace | S 11 |
| 33 | Investigation on After Use Properties of Higashida No. 6 Blast Furnace Hearth Linings, 5th Campaign (Study on wearing mechanism of blast furnace linings—VII) | 241 |
| 34 | On the Blast Furnace Runners | 244 |
| *35 | Study on the Behaviour of Carbon and Nitrogen in Carbon-saturated Fe-Ti Melts..... | S 12 |
| *36 | Change of Oxygen Pressure in Reduction Processes by Solid Carbon (Study on reduction kinetics of iron oxides— I) | S 13 |
| *37 | Measurement of Polarization Potential of CO Evolution during SiO ₂ Reduction (Electrochemical study on the slag-metal reactions— I)..... | S 14 |
| *38 | On the Mechanism of the Decrepitation of Iron Ores (Studies on the thermal properties of iron ores— I) | S 15 |
| *39 | The Analysis for the Rate of the Thermal Decomposition of Limestone | S 16 |
| *40 | Degradation of Iron Ores and Sinters during Iron Temperature Reduction..... | S 17 |
| 41 | A Study on the Measurement of the Behaviour of Ore Burdens to the Melt Down in the Blast Furnace | 248 |
| *42 | The Effect of Size on the Reduction Rate for Iron Ores (The study of the iron ore reduction— I) | S 18 |
| *43 | On the Re-Oxidation of the Reduced Iron Oxides and Powdered Iron Ores | S 19 |
| 44 | High Accuracy Measurement and Control of Blast Volume | 251 |
| 45 | The Results of Actual Application of Pulsated Blast to Blast Furnace (Studies on blast furnace operations with pulsated blast— I) | 254 |
| 46 | The Transfer of Pulse through Blast Furnace Stack (Studies on blast furnace operation with pulsated blast— II) | 257 |
| 47 | Study on the Change of Characteristics of Descending Materials in Blast Furnace | 260 |
| 48 | The Change of Characteristics of Coke in the Blast Furnace | 261 |
| 49 | Application of Coke Consuming Velocity to Blast Furnace Operation Control..... | 263 |
| *50 | Analysis of Conditions in Blast Furnace under Arbitrary Operations | S 20 |
| 51 | On the High Efficient Tuyeres (The study of high efficient blast furnace operation method— I) | 264 |
| 52 | The Blast Furnace Operation with Changing Coke Base | 267 |
| 53 | Desulphurizing Pig Iron by the 40 t Reversible Shaking Ladle..... | 271 |
| 54 | Sulphur Balance on the Basic Open Hearth Furnace | 273 |
| 55 | On the X-ray Diffraction of Phosphor-compounds and Ferro-Magnetic Minerals in the Converter Slag | 276 |
| *56 | On the Effects of Lance Nozzle on B.O.F. Process | S 21 |
| 57 | Replacement of OHF's with the Vessel Exchangeable LD Converter | 279 |
| 58 | Temperature Measurement in BOF during Blow | 281 |
| 59 | 2/3 Operation of LD Converters in Chiba Works..... | 283 |
| *60 | Remodelling of Tobata No. 2 LD Plant and Its Operation | S 22 |
| *61 | Activity Coefficient of Carbon in Liquid Iron (For the direct measurement of carbon content in liquid iron— I) | S 23 |
| *62 | Kinetic Study on the Al-Si Complex-deoxidation | S 24 |
| *63 | On the Rate of Dephosphorization of Liquid Iron with Solid Lime | S 25 |
| *64 | A Study on the Rate of Dissolution of Carbon into Liquid Fe-C Alloy | S 26 |
| *65 | On the Growth of Inclusions during the Deoxidation with Calcium-Silicade (Study on the behaviour of complex deoxidizers— I)..... | S 27 |
| *66 | Decarburization of Moltén Iron with CO ₂ -Ar Gas Mixtures..... | S 28 |
| *67 | Application of Potentiostatic Isolation to Stainless Steel (Study on potentiostatic electrolysis— I) | S 29 |
| *68 | Relationship between Tetragonality of Spinel and the Degree of Reductions (Study on formation mechanism of chromite with tetragonal structure— I) | S 30 |
| 69 | On the Relationship between Rate of Nitrogen Absorption and Surface Tension of Liquid Iron Containing Surface Active Agents | |

| | | |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| | (Studies on the rate of absorption of nitrogen in liquid iron— V) | 286 |
| 70 | On A.C. Electroslag Remelting of Bearing Steel SUJ-2 (Studies on electroslag remelting—ESR-3)..... | 288 |
| 71 | Electric Arc Behaviour in Steelmaking Arc Furnaces | 291 |
| *72 | Effect of Electro Magnetic Stirring on the Deoxidation and Desulphurization (Study on the refining by electro-magnetic-stirring— II) | S 31 |
| *73 | Effect of Electromagnetic-Stirring on the Homogenization of Ferro-Alloy Adding in Molten Steel (Study on the refining by electro-magnetic-stirring— III) | S 32 |
| *74 | On the FeSi Amount for Reducing of Chromium Oxide (Some consideration of stainless steel melting practice— I) | S 33 |
| 75 | On the Behaviour of Nitrogen during the Production of Low Carbon Rimmed Steel | 294 |
| *76 | Nonmetallic Inclusions of 20 t Heavy Steel Ingot Made by Basic Electric Arc Furnace and Acid Open Hearth Furnace as Well as Those of 20 t Steel Ingot Made by Vacuum Casting (Study on specifications of heavy steel forgings made by basic electric arc furnace and acid open hearth furnace as well as investigation on vacuum casting— II) | S 34 |
| *77 | Some Views of Freezing Rate and Internal Structure of 20 t Carbon Steel Ingot (Study on specifications of heavy steel forgings made by basic electric arc furnace and acid open hearth furnace as well as investigations on vacuum casting— IV)..... | S 35 |
| 78 | Basic Equation for the Analysis of R-H Circulating Flow Degassing Process (Theoretical analysis of R-H circulating flow degassing process— I)..... | 297 |
| 79 | Degassing by a Bubble (Theoretical analysis of R-H circulating flow degassing process— II)..... | 300 |
| 80 | Measurement of Circulating Rate of Molten Steel in R-H Degassing Process..... | 302 |
| *81 | Continuous Casting of Nut-size Ferromanganese and Silicon-manganese by Metal Mould | S 36 |
| 82 | On the Scrap Melting Ratio in LD Converter | 304 |
| 83 | On the Blowing in Basic Oxygen Converter with Scrap Containing Chromium (Study on the blowing in basic oxygen converter— III) | 307 |
| *84 | On the End Point Temperature and C Control with Dropping Thermocouple and Carbon Detector in the Molten Bath of L D Converter during Blowing | S 37 |
| 85 | Influences of Blowing with Atomized Water in Oxygen Jets on LD Operations | 310 |
| 86 | Slag in Basic Oxygen Converter during Blowing (Slag-metal reaction in basic oxygen converter— I) | 312 |
| *87 | Dephosphorization and Desulfurization in Basic Oxygen Converter (Slagmetal reaction in basic oxygen converter— II) | S 38 |
| 88 | On the Behaviour of the Oxygen (Physical chemistry of the LD steelmaking process— I) | 314 |
| 89 | On the Phosphorus Reaction (Physical chemistry of the LD steelmaking process— II)..... | 317 |
| 90 | Relation between Hot Metal Ratio and Oxygen Efficiency | 319 |
| 91 | On the Activity of Iron Oxide (The equilibrium between the slag unsaturated with silica and molten iron— I) | 321 |
| 92 | Study on the Interaction between Aluminum and Oxygen in Liquid Iron | 323 |
| 93 | Decomposition Voltage Measurements of Molten Slags (Research on the molten slag refining— X)..... | 326 |
| 94 | Propriety of Viscosity Measurements of Molten Slags with Graphite Apparatus..... | 328 |
| 95 | Oxygen Solubility in Molten High Chromium Iron Alloy | 331 |
| 96 | Effects of Temperature and Initial Contents of Cadmium on the Rate of Reaction between Pb-Cd Alloy and Salt (Model studies of slag-metal reactions— II) | 334 |
| 97 | On the Rising Velocity and the Coagulability of Al ₂ O ₃ Particles in Static Iron Bath (Study of deoxidation— III) | 336 |
| 98 | Distribution Coefficient of Solute Elements in Carbon Steel | 339 |
| *99 | Deoxidation Products of Titan and Vanadium (Study on the behaviour of titan and vanadium— I)..... | S 39 |

| | | |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| *100 | On the Measurement of Temperature during Solidification and the Macrostructure of 4 t Commercial Ingot (Study on solidification of 4 t commercial steel ingot— I) | S 40 |
| 101 | On Growth of Oxide Inclusions 3 t Si-Mn Deoxidized Sand Steel Ingot during Solidification Process (Studies on relation between mechanism of formation of inverse segregation and formation of oxide inclusions in large steel ingots— V) | 342 |
| 102 | On Behaviour of Al ₂ O ₃ in 3 t Al Deoxidized Sand Steel Ingot during Solidification Process (Studies on relation between mechanism of formation of inverse segregation and formation of oxide inclusions in large steel ingots— VI) | 345 |
| *103 | Effect of Refining and Casting Conditions on the Ultrasonic Defect of Heavy Steel Plates (On the mechanism of large inclusion formed in killed steel— I) | S 41 |
| 104 | On the Nonmetallic Inclusion in Quenched Ingot (Study on the nonmetallic inclusion in 18-8 stainless steel— I) | 347 |
| 105 | Changes of the Nonmetallic Inclusion by Heating (Study on the nonmetallic Inclusion in 18-8 stainless steel— II) | 350 |
| 106 | Changes of the Nonmetallic Inclusion by Forging and Rolling (Study on the nonmetallic inclusion in 18-8 stainless steel— III) | 352 |
| 107 | Relation between the Nonmetallic Inclusion and the Composition of Steel (Study on the nonmetallic inclusion in 18-8 stainless steel— IV) | 355 |
| 108 | Behaviour of Inclusions in Steels Deoxidized with Si-Mn and Al (Deformation of nonmetallic inclusions in steel during rolling— V) | S 42 |
| *109 | Consideration on Sand Marks of Carbon Steel | S 43 |
| 110 | Some consideration on Improvement of Internal and Surface Defects of Killed Steel | 357 |
| 111 | Tracing of Defects in Steel Plates by Ultrasonic Method | 359 |
| *112 | On the Structural Nonuniformity in the Lower Portion of Killed Steel Ingot Made by Bottom Pouring | S 44 |
| *113 | Calculation the Feeder Heads for Steel Ingot | S 45 |
| *114 | The Behaviour of Large Inclusions in Rimming Steel Ingots..... | S 46 |
| 115 | Some Origins of Nonmetallic Inclusion in Pouring LD Rimming Steel (Tracer application of RI to steel works— VII) | 362 |
| 116 | On Distribution of Nonmetallic Inclusions in Large Rimming Steel Ingot (Study on nonmetallic inclusions in rimming steel ingot— I) | 365 |
| 117 | On Chemical Composition and Structures of Nonmetallic Inclusions in Rimming Steel Ingot (Study on nonmetallic inclusions in rimming steel ingot— II) | 368 |
| 118 | On Mechanism of Formation of Nonmetallic Inclusions in Rimming Steel Ingot (Study on nonmetallic inclusions in rimming steel ingot— III) | 371 |
| 119 | Preliminary Examinations for Ultrasonic Detection of Sand Marks in Steel (Studies on the sand marks in rimmed steel slabs— I) | 374 |
| 120 | On the Distribution of Sand Marks and Ultrasonic Defects in Rimmed Steel Slabs (Studies on the sand marks in rimmed steel slabs— II) | 376 |
| 121 | On the Air Oxidation of Low Carbon Rimmed Steel during the Rimming Action..... | 380 |
| 122 | Reaction during the Solidification of Rimming Steel (Study of the solidification of rimming steel— I)..... | 382 |
| 123 | Theoretical Study of Rimming Action and Position of Blowholes (Study of the solidification of rimming steel— II)..... | 385 |
| 124 | On the Length of Honeycomb Blowhole Zone in Semikilled Steel Ingot (Study on solidification structures of semikilled steel ingot— VI) | 388 |
| 125 | On Expansion of Top Surface of Semikilled Steel Ingot (Study on solidification structures of semikilled steel ingot— VII) | 391 |
| 126 | On the Solution of Oxygen into Solid Iron during Heat-treatment (Study on isolation of inclusion in iron and steel— III) | 394 |

| | | |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 127 | Growth of Silica and Silicate Inclusions in Pasty-state Steel (Studies on the growth of nonmetallic inclusions in pasty-state steel— I)..... | 397 |
| 128 | Measurement of Size Frequency Distribution of Nonmetallic Inclusions..... | 400 |
| 129 | Temperature Drop of Molten Steel Due to Ladle Brick..... | 402 |
| 130 | Effect of Heating Conditions of Soaking Pit on the Surface of Ingot (Effect of heating conditions on the surface of ingot and slab— I) | 429 |
| 131 | On the Ingot Temperature in Soaking Pit (Study on heating of ingot in soaking pit— I)..... | 432 |
| 132 | Study of Manufacturing Die Block by Direct Forging on the Molten Steel under High Pressure | 434 |
| *133 | Strain Rate Dependence of Flow Stress in Steels Measured by High Speed Hot Torsion Tests | S 47 |
| *134 | Effects of Aluminum Nitride on the High-temperature Ductility of Carburizing Steel | S 48 |
| *135 | Impact Extrusion of Steel under Isothermal Transformation | S 49 |
| 136 | Application for Butt Welded Pipe On the Warmworking of Butt Welded Steel Pipes | 436 |
| *137 | The Weldability of High Frequency Induction Weld Tube | S 50 |
| *138 | The Distribution of the Lubricant on the Inside Wall of the Tube When Rolled with a Plug Mill | S 51 |
| *139 | On Hot Tube Pushing of Ehrhardt Process..... | S 52 |
| *140 | The Variation Analysis of Tube Wall Thickness on Mannesmann Piercer..... | S 53 |
| *141 | On the Rolling Force in Diamond Pass of a Continuous Billet Mill | S 54 |
| 142 | On the Work Roll Crown of Plate Mill 4Hi Finisher..... | 438 |
| 143 | Computer Control of Plate Mill..... | 441 |
| *144 | Effect of the Heat Treated Structure on the Mechanical Properties and Cold Workability of High Carbon Steels..... | S 55 |
| 145 | Improvement on Workability of Wire Rod by DH Vacuum Degassing..... | 444 |
| *146 | The Influence of Chemical Composition and Drawing Process of Wires on the Cold Headability of Austenitic Stainless Steels | S 56 |
| *147 | On the Limit for Drawing (Studies on the cold working of steel tubes—Ⅳ) | S 57 |
| 149 | Manufacture of Milder Steel Sheet by Continuous Annealing Process (Study on over aging treatment of low carbon steel sheet— I) | 447 |
| 150 | Manufacture of Drawing Quality Steel Sheet by High Temperature Annealing Process (Study on over aging treatment of low carbon steel sheet— II) | 450 |
| 151 | On the Yield Point Phenomena of as Annealed and Temper Rolled Steel Sheet | 453 |
| *152 | Yielding Behaviours and Press Formabilities of Steel Sheets | S 58 |
| *153 | Press Formabilities of Stretcher-strain Steel Sheets | S 59 |
| *154 | Size and Shape Effects on Pure Punch-stretchability of Steel Sheets..... | S 60 |
| *155 | Size and Shape Effects on Combined Punch-stretchability of Steel Sheets | S 61 |
| 156 | Forming Limits under Balanced Biaxial Stretching of Steel Sheets | 455 |
| *157 | A Study of Scribed Circle Test Method in Sheet Metal Forming | S 62 |
| *158 | On the Nitrided Layer of Rapid Nitriding Steel | S 63 |
| 159 | On the Mechanical Properties and Heat-treating Behaviour of Vanadium Bearing Rapid Nitriding Steel (Study of rapid nitriding steel— III) | 459 |
| *160 | Study on the High C High Cr Steels for Hard Facing | S 64 |
| *161 | Study on the Precipitation Hardening Type Die Steels | S 65 |
| 162 | The Effects of Steam Temperature and Velocity on Corrosion (Corrosion of main materials in geothermal steam— II)..... | 462 |
| *163 | On Corrosion and Sand Abrasion of Stainless and Heat Resisting Steels at High Temperature | S 66 |
| *164 | Effect of Carbon Content on the Huey Test of Low Carbon Austenitic Stainless Steel | S 67 |

| | | |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 165 | Effect of Surface Roughness (Study of pitting corrosion for stainless steel—IV)..... | 464 |
| *166 | Statistical Analyses of Creep Rupture Data of 2·25%Cr-1%Mo, 1%Cr-1%Mo-0·25%V, 18%Cr-10%Ni-Ti, and 16%Cr-13%Ni-3%Mo Steels..... | S 68 |
| *167 | Analyses by Larson-Miller Method of Creep Rupture Data of 2·25%Cr-1%Mo, 1%Cr-1%Mo-0·25%V, 18%Cr-10%Ni-Ti, and 16%Cr-13%Ni-3%Mo Steels | S 69 |
| *168 | Creep Rupture Properties of 2·25%Cr-1%Mo Steel..... | S 70 |
| *169 | On Extrapolation Method of Creep-rupture Data | S 71 |
| 170 | Characteristics of High Strength Boiler Tube (HCS) | 467 |
| 171 | Utilization of High Strength Boiler Tube (HCS)..... | 470 |
| *172 | Creep Rupture Strength and Internal Friction of Low Carbon Steel for Boiler Tube..... | S 72 |
| 173 | Nitride Precipitation in Silicon-killed Steel during Isothermal Heating and its Influence on Creep Strength..... | 472 |
| *174 | The Creep Rupture Properties of High Tensile Structural Steels..... | S 73 |
| 175 | Creep Rupture Properties of Welded Composite of 70 kg/mm ² High-strength Pressure-vessel Steel (ZH super steel)..... | 475 |
| *176 | Effect of Nb, V, W, Y, Ti and Cu on High Temperature Strength of 9Cr1Mo Steel (Study of medium Cr heat-resisting steel—II) | S 74 |
| *177 | The Effect of δ Ferrite on Piercing of 13% Cr Stainless Steel | S 75 |
| *178 | Effects of Some Alloying Elements on Mechanical Properties of 12Cr Base Steel | S 76 |
| *179 | The Relation between the Heat Treatment and the Creep Rupture Properties in Austenitic Stainless Steel Tube | S 77 |
| *180 | Effect of Al and N on High Temperature Strength of AISI 316..... | S 78 |
| 181 | The Effect of Cu, Nb, V and B on the Creep Rupture Strength of 17Cr-10Ni-2Mo Steels (Study on austenitic heat resisting steels—V)..... | 477 |
| *182 | The Welding of 17Cr-10Ni-1·5Mo-Cu-Nb-V Type Austenitic Steels (Study on austenitic heat resisting steels—VI) | S 79 |
| *183 | Manufacture of Superheater Tubes and Its Properties of 17Cr-10Ni-1·5Mo-Cu-Nb-V Steels (Study on austenitic heat resisting steels—VII)..... | S 80 |
| 184 | Effect of Aging Structure and Precipitate on the High Temperature Properties of 18Cr-12Ni-0·2C Austenitic Heat Resisting Steels (Study on austenitic heat resisting steels—VIII) | 480 |
| 185 | Effects of Heat Treatment on the High Temperature Properties of High Manganese Heat Resisting 10M6N Type Alloys..... | 483 |
| *186 | On the High Temperature Strength of 25Cr-12Ni Stainless Steels | S 81 |
| *187 | Effect of Heat Treatment and Cold Work on Creep Properties of 20Cr-25Ni-Nb for Atomic Reactor | S 82 |
| *188 | The Effect of Ni on the Properties of 21Cr-12Mn-N Type Heat Resisting Steel for Exhaust Values | S 83 |
| *189 | On the Technological Achievements and Its Meanings on the History of Iron and Steel Making in Japan by Dr-Eng K. Noro, the First President of I.S.I.J. | S 84 |
| *190 | On the Acceptance of Modern Iron-making Technology at Meiji-Ishin in Japan..... | S 85 |
| *191 | The Historical Analysis of Japanese Iron-making Technology at 1910~1945 | S 86 |
| 193 | On the Growth of Iron Whiskers by the Gas Reduction of Iron Halide (Study on the iron whisker production—I) | 487 |
| *194 | Diffusion of Sulphur in α -Iron..... | S 87 |
| *195 | Effect of Heat Treatments on the Austenitic Grain Size..... | S 88 |

| | | |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 196 | Effect of Heating Temperature on the Austenite Grain Size of Steel (Study on grain size of steel—IV)..... | 489 |
| 197 | Effect of Duplex Grain on Properties of Steel (Study on grain size of steel—V)..... | 492 |
| *199 | On the Measurement of Modulus in Torsion (G) of High Carbon Steel Wire by Torsion Tester | S 89 |
| 200 | The Investigation on Deterioration of Steels by Stress Relieve Annealing..... | 494 |
| 201 | Stress Relief of Forged Hardened Steel Rolls in Temper | 497 |
| *202 | On Hardenabilities of High Carbon Cr-Mo Steels and Cr-Mo Cast Irons Made from High Purity Iron Sand Pig (Properties of several kinds of iron and steels made from high purity iron sand pig—V)..... | S 90 |
| 204 | On the Quality of Carbon Steel Forgings from Billet by LD Converter and Continuous Casting Process (On the quality of steel from continuously cast billet—IV)..... | 500 |
| *205 | Effect of Carbon Content on the Machinability of Carbon Steel..... | S 91 |
| *206 | On the Machinability and Elevated Temperature Plasticity of Low Carbon Steels Containing Freecutting Elements | S 92 |
| | (Study on machinability and minor alloy elements steel—IV) | S 92 |
| *207 | Effects of Ni on the Properties of 0.6C-5Cr-Mo Steel for Shear Blades | S 93 |
| *208 | Effect of Microstructure on the Specific Wear of Carbon Steel for Cutleries | S 94 |
| *209 | Effect of Carbon Content and Heat-treatment on the Specific Wear of Stainless Steel for Cutleries | S 95 |
| *210 | Effect of Carbon Content on the Grindability of 17Cr Stainless Steel for Cutleries | S 96 |
| 211 | On the Properties of Various Stainless Steels for Cutleries..... | 503 |
| *212 | The Influence of Some Alloying Elements on the Properties of 9%Ni Steel..... | S 97 |
| 213 | Relation between Heat Treatment Conditions and Temper Austenite (Study on characteristics of 9%Ni steel— I) | 505 |
| 214 | Instability of Temper Austenite Holding in Liquid Nitrogen (Study on characteristics of 9%Ni steel— II) | 508 |
| 215 | On Driving Resistance at Sheet Pileing Grip..... | 510 |
| *216 | On the Fatigue Properties of Several Spring Steels | S 98 |
| *217 | The Effect of Various Inclusions on Fatigue Properties of Carbonized Steels (Fundamental research on the relationship between fatigue properties of steel and inclusions— III) | S 99 |
| *218 | Rolling Fatigue Characteristics of Carburized or Carbonitrided 1%Cr Steel at Elevated Temperature | S 100 |
| 219 | Effect of Surface Roughness on the Fatigue Strength of Steels (On the fatigue strength of tool steels— I) | 512 |
| *220 | Rolling Contact Strength of the Materials with the Defects on the Surface (On the damages due to rolling contact of back-up roll materials— V) | S 101 |
| 221 | Effect of Hardness Distribution and Heatinput on Fatigue Strength in Butt Welded Joint (Studies on fatigue strength of welded joint in high tensile strength steels— I) | 515 |
| 222 | Fatigue Properties of Notched Weldments in High Tensile Strength Steels (Studies on fatigue strength of welded joint in high tensile strength steels— II) | 518 |
| 223 | The Effect of Thermal History in the Low Temperature Range on Mechanical Properties of Ti-Bearing Constructional Steel | 520 |
| 224 | The Effect of Thermal History in the High Temperature Range on the Mechanical Properties of Ti-Bearing Constructional Steel | 522 |
| *225 | The Effect of Tempering on Delayed Failure Characteristics of Low Carbon High Strength Steels..... | S 102 |
| *226 | The Properties of High Tensile Strength Steel Pipes, HS2 and HS6, for High Pressure Service..... | S 103 |

| | | |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| *227 | Effect of Martensitic and Bainitic Structures on Mechanical Properties in a Ni-Cr-Mo Steel | S 104 |
| 228 | The Effect of Low Temperature Transformation Products on the Mechanical Properties of Low Alloy Steels with Ferrite-Pearlite Structures | 525 |
| *229 | Effect of Ausforming on the Precipitation of Fe-Mo-C Steel | S 105 |
| *230 | On the Age Hardening Process of Fe-5%Ni-2%Al Alloy | S 106 |
| *231 | On Heat-treatment Behaviour and Mechanical Properties of Manganese-bearing Maraging Steels..... | S 107 |
| *232 | Effect of Alloying Elements on the Properties of 10Ni-5Mo-9Co Type Maraging Steel | S 108 |
| 233 | Effect of Ti and Be on 18% Ni Maraging Steels | 528 |
| 234 | Effect of Crucible Materials on the Quench-aging of Vacuum-melted Low Carbon Steel..... | 531 |
| *235 | Some Aspects Regarding to Strain Aging of Steels | S 109 |
| 236 | Kinetics of Secondary Recrystallization of Silicon Iron | 533 |
| *237 | Estimation of the Continuous Cooling Transformation Curve by the Chemical Compositions | S 110 |
| *238 | On the Hardening of 3Ni-3Mo Steel | S 111 |
| 239 | Co-Ordinated Effects of Ti on the Characteristics of B-Treated Steel | 536 |
| *240 | Strength of Screw Thread of Bolts under Simple Tension (On the tensile strength of bolts— I) | S 112 |
| *241 | The Observation of Brittle Crack on Impact Tension Specimens of Low Carbon Steels | S 113 |
| 242 | Study on the Quenching Effect in Several Media, Nishihara's Wear and the Heat-resistance Test of Spring Materials Made of 5% Cr-Mo-V Steels, 9% W-Cr-V Steel, Si-Mn Steel and Mn-Cr Steel (Study on the spring materials—XII) | 539 |
| *243 | Phenomenological Theory on Irradiation Effect of Iron and Steel | S 114 |
| *244 | The Effect of Heat Treatment Metallurgical Properties of Nuclear Reactor Pressure Vessel Steel | S 115 |
| 245 | On the Mechanical Properties of ASTM A-302B Heavy Steel-plates by Submerged Arc Welding | 541 |
| 246 | Effect of Normalizing Cooling Rate on the Strength and Notch Toughness of A-302B Steel (Heat treatment and mechanical properties of heavy section ASTM A-302B steel— I) | 543 |
| 247 | Measurement of Fracture Toughness in the Static Notched Bend Tests (Studies on brittle fracture initiation of steels— I) | 546 |
| *248 | Effect of Temperature on Fracture Toughness and Relation with V Charpy Impact Transition Temperature of Ni-Mo-V Steel (Study on the brittle fracture initiation of steel — II) | S 116 |
| 249 | Determination of Oxygen Content in Molten Steel by EMF Measurement (On the alumina solid electrolyte— I) | 549 |
| *250 | Fluorescent X-Ray Methods for Determination of Coating Materials on Steel | S 117 |
| *251 | Solution Spectrographic Analysis of Acid Soluble Aluminum in Steels | S 118 |
| *252 | Determination of Magnesium, Zinc and Lead in Iron and Steel by Steel by Atomic Absorption Spectrophotometry..... | S 119 |
| *253 | On the Detective and Separative Method of Phosphate in Ferrophosphor..... | S 120 |
| 254 | On the Determination of CaO and MgO in Oxide Inclusions in Steel (Mineral chemical studies on the source of oxide inclusions in steel— I)..... | 551 |
| *255 | Comparative Study on Determination of Oxide Inclusion in Steel by Iodine-alcohol, Bromine-ester and Inorganic Acid Procedures (Study on chemical analysis of nonmetallic-inclusion in iron and steel— I) | S 121 |
| *256 | Spectrophotometric Determination of Microamount of Boron in Steel by Solvent Extraction Method..... | S 122 |
| 257 | Analytical Method on the Constitution of Boron Contained in Steel | 553 |
| 258 | Spectrophotometric Determination of Microamounts on Nitrogen in Steel with Bispyrazolone Reagent (Determination of microamounts of nitrogen in steel— I) | 554 |

Contents of Panel Discussion

Chairman *Tsuguji* SANBONGI

| | | |
|-------|---------------------------------------------------------------------------------------|-----|
| PD. 1 | Considerations on the Decrepitation Relating to the Origin of Iron Ore Formation..... | 406 |
| PD. 2 | Test Methods on Thermal Properties of Iron Ores | 409 |
| PD. 3 | A Study on Properties of Iron Ores at the Elevated Temperature..... | 410 |
| PD. 4 | On the Abnormal Behaviours of Blast Furnace Burdens | 413 |
| PD. 5 | Blast Furnace Operation with Decrepitative Ore | 416 |

Chairman *Kōkichi* SANO

| | | |
|-------|--------------------------------------------------------------------------------------------|-----|
| PD. 6 | Decarburization in Molten Steel with Oxygen and Ferric Oxide | 419 |
| PD. 7 | Some Consideration on Reaction Mechanism of Decarbonization in LD Converters..... | 422 |
| PD. 8 | Theoretical Analysis of Decarburization Reaction and Heat Transfer in LD Converter..... | 424 |

Chairman *Isao* GOKYŪ

| | | |
|--------|-------------------------------------------------------------------------------------------------------|-----|
| PD. 9 | The Effect of Carbon Content against γ Value-cold Reduction Relations in Steel Sheets | 559 |
| PD. 10 | A Study on the Axially Symmetrical Stretch Ability of Mild Steel Sheets | 561 |
| PD. 11 | The Effects of Mechanical Properties on the Formability of Stretch Flange of Steel Sheets | 563 |

Chairman *Seita* SAKUI

| | | |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| PD. 12 | Transmission Electron Microscopic Observation of Austenitic Stainless Steels during Creep..... | 567 |
| PD. 13 | Observations of Precipitates in 18-8 Series Stainless Steels after Creep Rupture Testing..... | 570 |
| PD. 14 | The Effect of Alloying Addition on the High Temperature Strength and Its Testing Temperature and Rupture Time Dependence in 18Cr-12Ni-0.2C Steels | 573 |

Chairman *Ryukiti* HASIGUTI

| | | |
|--------|--------------------------------------------------------------------------------------------------------------------------|-------|
| PD. 15 | On the Tempering and the Aging Process of Alloyed Ferrous Martensite | S 123 |
| PD. 16 | Internal Friction of Ferrous Martensite..... | S 127 |
| PD. 17 | Study of Martensite Structure and Its Change during Annealing by the Mössbauer Effect..... | S 131 |
| PD. 18 | Antiphase Domains and Dislocation Configurations in the Fe-13at%Si Alloy | S 134 |
| PD. 19 | The Influence of Selenium on the Ageing of Low Carbon Steel | S 138 |
| PD. 20 | Effects of Nitrogen on the Mechanical Properties of Iron Containing Oxygen..... | S 142 |
| PD. 21 | Plasticity of Iron and Low Carbon Steel..... | S 144 |
| PD. 22 | Dependence of the Dislocation Density on the Strain Rate in Iron..... | S 148 |
| PD. 23 | Dislocation Arrangement and Stress-strain Curves of Iron Single Crystals Deformed in Tension at Low Temperature | S 152 |
| PD. 24 | Carbon in Iron and Lattice Defects by Plastic Deformation | S 155 |
| PD. 25 | Plasticity and Lattice Defects of Pure Iron..... | S 158 |
