

“Tetsu-to-Hagané”

Vol. 53, No. 7, June, 1967

Contents

1	Effect of Porosity-Treatment on the Reduction of Iron Ore Pellets. (On the reduction of iron ore pellets—I).....	703
2	Effect of Porosity-Treatment on the Strength of Iron Ore Pellets. (On the reduction of iron ore pellets—II).....	705
4	Study on the Hematite Bonding Mechanism in Firing of Pellet.....	708
6	Study on the Strengthening Mechanism of the Slag-Bonded Pellet.....	710
7	The Crushing Strength in Heating of Limonite Pellets. (On the utilization of limonite from Shiretoko in Hokkaido—I).....	713
9	Effect of the Particle Sizes on the Properties of Pre-reduced Pellets. (Studies on the production of pre-reduced iron ore pellets—II).....	716
19	Selective Chlorination of Iron Ores Containing Chromium and Nickel by Fluidizing Roaster.....	719
21	The High Temperature Equilibrium of Titanium Dioxide and Carbon. (Study on the activity of TiO_2 in blast furnace slags—I).....	722
23	Pore-Size Distribution in Reduced Iron Ore with Hydrogen.....	724
32	The Effect of C. I. Turning Boring on the Properties of Sintered Ore.....	727
35	On the Formation of Calcium Ferrite. (Fundamental studies on self-fluxing sinter—I).....	729
40	A Study on the Reducing Degradation of Iron Ores.....	732
42	Effect of Some Factors on the Decrepitation on Iron Ores (Studies on the thermal properties of Iron Ores—I).....	735
44	Reduction kinetics of Calcium Ferrites with Hydrogen.....	738
47	Kinetics of Thermal Decomposition of Lime Stone.....	740
48	On the Reduction of the Ore That Coexists with Solid Carbon by H_2+CO+N_2 Mixed Gas.....	743
74	Mathematical Model of Nitrogen Absorption at Tapping from LD Converter.....	746
77	On the Reaction between Liquid Steel and Refractory under Vacuum. (Fundamental study on refractory bricks for ingot-making—II).....	748
78	Some Problems on the Application of the Oxygen Concentration Cells to the Fe-Si-O System. (A study on the rapid determination of oxygen content dissolved in molten steel by EMF measurements—III).....	752
80	Mass Spectrometric Study on the Desulfurization of Some Iron Alloys by Vacuum Melting.....	754
81	A Preliminary Study on Gas Phase Reaction in Consumable Electrode Vacuum Arc Melting and Sintering of Metal Powder. (Studies on application of an omegatron to metallurgical research—I).....	757
82	Quantitative Determination of Partial Pressures with an Omegatron. (Studies on application of an omegatron to metallurgical research—II).....	759
83	Study on the Rate of Silica Reduction by Carbon from Slag to Metal.....	761
84	Decarburization Rate of Molten Low-Carbon Fe-C Alloy by O_2-N_2 Gas Mixture. (Kinetics of the oxidation of molten iron alloys—II).....	764
85	Decarburization from Molten Steel by Oxygen.....	766
89	Effect of Alloying Elements on Interfacial Tension between Molten Steel and Slag. (Fundamental study on interfacial phenomena in iron and steel-making processes—IV).....	769
90	Deoxidation with Silicon in Liquid Iron Alloys.....	772
91	Determination of Creep Rate of Iron and Steel at Temperatures above 1100°C to the Melting point.	774
92	The Removal of Silicon during the Decarburization of Molten Iron with H_2O-Ar Mixtures.....	777
99	Activity of Silicon in Liquid Iron and the Effect of Carbon on the Activity of Silicon.....	779

100	Activity of Sulphur in Liquid Iron.....	783
107	On the Deoxidation with Calcium-Silicide in Liquid Iron. (Study on the behaviour of complex deoxidizers—I).....	787
109	Behaviour of Deoxidation Products in Si or Mn Deoxidation. (Study on behaviour of deoxidation products in iron and steel—II).....	790
112	The Effect of Nickel on the Oxide Inclusion Formed in Cr-Ni Steels.....	793
127	The Behaviour of Gas Flow around the Fire Point of LD Converter.....	794
129	B. O. F. Lining Bricks Used of Mag-Dolo Clinker.....	797
133	Influence of Combustion Control upon the Atmosphere of Open Hearth Furnace.....	800
138	On a Method of Electro-Magnetic Stirring. (Study on the refining by electro-magnetic stirring—I).....	802
142	On the Tundish Nozzle Brick for Continuous Casting.....	805
143	Comparison of Nb-Carbide to Ferro-Nb as a Adding Reagent in Nb-Added Steels.....	807
145	On the Desulphurization of Crude Fe-Ni in the 8t Low Frequency Induction Furnace.....	810
161	On the Blow-Holes of Al-Si Killed Ingots Containing Nitrogen and the Pressweld Ability of the Blowholes by Hot Rolling Practice.	812
162	On the Statistical Considerations for Creep-Rupture Data.	815
171	The Effect of C on the Properties of 19Cr-7Ni-9Mn Heat Resisting Steels. (Study on Mn-Cr-Ni modified heat resisting steels—II).....	818
172	On the High Temperature Strength of 25Cr-20Ni Stainless Steels.....	820
174	The Effect of C and N on Rupture Strength of 28Cr-15Ni Heat Resisting Cast Steel.....	823
178	Influence of Heat Treatment on Machinability of 21-4N Steel.	827
183	Factors Affecting on the Stress-Strain Curve of Steel Sheet. (Studies on the stress-strain curve of steel sheet—I).....	829
184	Stress-Strain Curve Fitting of Steel Sheet. (Studies on the stress-strain curve of steel sheet—II)	831
190	Hot Workability of 13% Cr Stainless Steel.....	834
192	Analysis of Rolling Schedule for Stretch Reducer.....	837
193	On the Surface Treatment of Steel Tubes.....	840
201	Drawing Properties at the Critical Pressure. (On the carbon steel wire drawing by super high pressure forced lubrication—II).....	843
202	On the Manufacturing of Square Cross-Sectioned Tapered Wire with Roller Die. (On the manufacturing of tapered wires—I).....	846
205	Determination of Reduction Degree by Fast Neutron Activation Analysis.	849
208	Quantitative Analysis of High Nickel Cast Iron. (Studies on Quantovac analysis—IV).....	851
210	The X-Ray Fluorescence Analysis of Low Alloy Steel with the Fluroprint Spectrometer.....	854
212	Photometric Determination of Zirconium in Stainless Steel with Arsenazo III.	857
214	The Properties of Mn-Cr Case Hardening Steels.....	859
222	On Manufacturing Procedure and Mechanical Properties of Inconel Clad Steel Plate.....	863
225	Historical Analysis of Today's Material Competition.....	865
226	About Decade of "Tatara".....	867
227	Behavior of Oxide Inclusions in Steel during Hot Rolling.	870
229	Various Inclusions and Fatigue of Steel. (Fundamental research on relationship between fatigue properties of steel and inclusions—II)...	873
230	Effect of Non-Metallic Inclusion on the Fatigue Life of Bearing Steel.....	876
239	Normalized High Strength Steel. (On the factors which affect mechanical properties of low alloy steels—II).....	880
240	The Influence of Heat Treatment on the Strength of Nb Treated Steel.....	882
241	The Precipitates in Nb Treated Steel.....	885
244	Effect of Ti on Ni-Al Age Hardening Steels.....	887
245	Study on Aging Behaviour of Maraging Steel Containing Chromium.	890
246	Strengthening Mechanism and an Unique Feature of Martensitic Transformation of Ausformed Steels.....	893
247	Aspects on the Method of Revealing the Austenite Grain Size in Steels.....	895

248	Effect of Chemical Composition on the Tendency of Grain Refining. (Studies on austenitic grain—III).....	897
249	On the Heat-Treatment Characteristics of Ni-Mo-V Steel. (Fundamental study of large forging—III).....	900
250	On the Heat-Treatment Characteristics of Ni-Cr-Mo-V Steel. (Fundamental study of large forging—IV).....	904
258	On the Low Carbon Steel Sheets with Coarse Grains Only in Core Zone.....	906
259	On the Relation between Recrystallization Behaviour and Formability of Low Carbon Steel Sheets....	909
260	Effects of High Pressure on Some Iron-Carbon Alloys. (Effect of high pressure on the properties of steel—I).....	912
265	Effect of Nitrogen in Steels on Stress Relaxation of High Carbon Steel Wires.....	915
267	On the Tempering Behaviour of 3Cr-3Mo and 3Cr-3Mo-3Co Steels. (Study on hot-working tool steel—IX).....	917
269	Characteristics of 12% Chromium Type Tool Steels for Cold Work under Bending and Torsional Stresses. (Study on the toughness of tool steels—III).....	920
273	Study on Charpy Impact Value of 9% Ni Steel Weld Metal at Low Temperature.....	922
276	Effect of Carbon Content on Grindability of 13Cr Stainless Steel for Cutleries.....	924
277	Effect of Heat Treatment on Grindability of 13Cr Stainless Steel for Cutleries.....	927
280	Effect of the Cold Works and Heat Treatments on the Mechanical Properties of 18-8 Stainless Steel Wires.	930
281	On the Fe-Cr-Al Heating Element by the Electroslag Melting Process.....	933
284	Effect of Ingot Size and Forging Ratio on the Structure and Various Properties of High Speed Steels....	935
	On the Heat-Treatment of High-Speed Steel for Press Tools.....	938

Discussion	941,	Abstracts.....	965,	Notices to Members	N69,
Proceeding of the Institute.....					N84
