

抄録.....	531	日本鉄鋼協会記事.....	N43
コラム：“ですね症候群”.....	521	次号目次案内.....	N44
編集後記.....	534	Trans. ISIJ 掲載記事概要.....	N44
会告.....	N35	鉄鋼標準試料委員会ニュース.....	N47

「鉄と鋼」投稿規程は毎年 12 月号巻末に掲載いたしております。

“Tetsu-to-Hagané” Vol. 72 No. 3, March, 1986

Contents

Technical Review

Report of Symposium on “Physical Chemistry and Process Engineering of Steelmaking Reactions”	K. MORI... 347
--	----------------

Commentaries

Defect Chemistry of Iron Oxides and Its Relevance to the Reduction of Iron Ores in Blast Furnace	M. IWASE and E. ICHISE... 353
Present and Future of the Research on High Purity Iron.....	H. KIMURA... 361
Recent Status of Cold Plasma Utilization	A. KANZAWA... 368
Current and Future in Diffusion Welding.....	O. OHASHI... 373

Technical Papers and Technical Reports

Mathematical Modelling for Process of Direct Reduction of Iron Ore by Rotary Kiln	X. XIAO, M. KUWABARA and I. MUCHI... 380
Analysis of Retardation Phenomenon in Iron Ore Reduction by Three-Interface Model with Solid-State Diffusion Step	K. KOBAYASHI and T. SÔMA... 388
Reduction Kinetics of Synthetic Chromite Pellet with Hydrogen	H. G. KATAYAMA... 396
Flow Characteristics of Gas and Fine Particles in Packed Bed	H. YAMAOKA... 403
Effects of Various Factors on the Local Corrosion of Blast Furnace Trough Material at the Slag-Metal Interface	J. YOSHITOMI, T. HARADA, K. HIRAGUSHI and K. MUKAI... 411
Rate of Nitrogen Desorption from Molten Iron by Ar Gas Injection	M. TAKAHASHI, H. MATSUDA, M. SANO and K. MORI... 419
Effect of Densities of Gas and Liquid on Behavior of Injected Gas in the Initial Jet Formation Zone.....	Y. OZAWA and K. MORI... 426
The Development of Technology for Decarburization of Pre-refined Hot Metal in BOF	Y. NAKAMURA, K. UMEZAWA, A. MINAMI, H. MATSUNAGA and S. YAMAMOTO... 434
Relationship between Characteristics of Hollow Shells and Plug Shapes in Press Roll Piercing.....	A. OHNUKI, T. KAWANAMI and K. NAKAJIMA... 442
Surface Behavior and Temperature of Plug in Piercing of Seamless Steel Pipe	A. OHNUKI, S. HAMAIZU, T. KAWANAMI and K. NAKAJIMA... 450
Effect of Combined Addition of Niobium and Boron on Thermomechanically
