

# "Tetsu-to-Hagané"

Vol.80 No.5, May, 1994

## Contents

|                                 |  |             |
|---------------------------------|--|-------------|
| <b>Lecture</b>                  | <b>Introduction to Solidification of Metals (I)/K. GUNJI</b> .....   | <b>N208</b> |
| <b>Review</b>                   | <b>New Development of Materials · Structures—Intelligent Materials · Structures—/K. EGAWA</b> .....  | <b>N222</b> |
| <b>Commentary</b>               | <b>Control of Microstructure of Iron-Base Heat Resisting Materials for New Energy Processes</b><br>S. OHTA .....   | <b>N227</b> |
|                                 | <b>Recent Development of Case Hardening Technology and Materials/K. NAMIKI</b> .....   | <b>N233</b> |
| <b>Paper</b>                    | <b>Equilibrium between Yttrium and Oxygen in Liquid Iron and Nickel/F. ISHII and S. BAN-YA</b> .....   | <b>359</b>  |
|                                 | <b>Continuous Measurements of Bubble Characteristics in a Molten Iron Bath with Ar Gas Bubbling</b><br>M. IGUCHI, H. KAWABATA, Z. MORITA, K. NAKAJIMA and Y. ITO .....                                   | <b>365</b>  |
|                                 | <b>Stability Analysis for Confining Molten Metal Puddle by Electromagnetic Force in Twin Roll Process</b><br>S. FURUHASHI and S. ASAI .....  | <b>371</b>  |
|                                 | <b>Model Experiment for Confining Vertical Free Surface of Molten Metal by Electromagnetic Force</b><br>S. FURUHASHI and S. ASAI .....   | <b>377</b>  |
|                                 | <b>Estimation of Interfacial Tensions between Phases in the Molten Iron-Slag-Inclusion (Alumina) System</b><br>K. NAKAJIMA .....   | <b>383</b>  |
|                                 | <b>Elimination of Non-metallic Inclusions Using Electromagnetic Force</b><br>J. PARK, A. MORIHIRA, K. SASSA and S. ASAI .....  | <b>389</b>  |
|                                 | <b>Rate of Reaction between Alumina Graphite Immersion Nozzle and Low Carbon Steel</b><br>K. SASAI and Y. MIZUKAMI .....   | <b>395</b>  |
|                                 | <b>Effects of Strain Rate and Temperature on Ductility of Interstitial Free Steel Sheet</b><br>S. TSUYAMA, H. TSUNODA and Y. HOSOYA .....  | <b>401</b>  |
|                                 | <b>Influence of Microstructures in Heat-Affected Zone of Steels on the Mechanical Properties during Post-Weld Heat Treatment/M. NAKAMURA, K. TAGASHIRA, H. HORIE, E. KAJIWARA and H. KAWASHIMA</b> ..... | <b>406</b>  |
|                                 | <b>Influence of Stress and Strain on the Creep Damage of a 2.25Cr-1Mo Steel</b><br>T. ENDO, K. TAI and F. MASUYAMA .....   | <b>412</b>  |
|                                 | <b>Refinement of Boride by Rapid Solidification in Boronated Stainless Steel</b><br>T. WADA, S. YAMAMOTO, H. KUTSUMI and Y. KOBAYASHI .....  | <b>418</b>  |
|                                 | <b>Tensile Ductility at Room Temperature in Thermo-mechanically Treated <math>\gamma + \alpha_2</math> Type Titanium Aluminides</b><br>M. HOSOMI, T. MAEDA and M. OKADA .....                            | <b>424</b>  |
| <b>Technical Article</b>        |  | <b>T81</b>  |
| <b>ISIJ Information Network</b> |  | <b>N205</b> |
