

"Tetsu-to-Hagané"

Vol.81 No.10, October, 1995

Contents

Commentary	Fabrications and Thermoelectric Properties of Semiconducting Iron Disilicides / I. A. NISHIDA	N454
	Ductilization of Structural Intermetallic Alloys by Microstructural Control / Y. MISHIMA	943
	Recent Progress in Corrosion Life Prediction of Steel Structures / T. SHIBATA	951
Paper	Evaporation Rate of Copper in High Carbon Iron Melt under Reduced Pressure	
	X. CHEN, N. ITO, K. NAKASHIMA and K. MORI	959
	Influence of Reaction between Immersion Nozzle Refractory and Molten Steel on Occurrence of Blisters	
	K. SASAI and Y. MIZUKAMI	965
	Mathematical Model Analysis on the Growth of Initially Solidified Shell	
	T. MIZOGUCHI, S. OGIBAYASHI and T. KAJITANI	971
	Individual Analysis of Nonmetallic Inclusions in Steel by Using the Gallium Focused Ion Beam Secondary Ion Mass Spectrometry / B. TOMIYASU, A. INAMI, M. ABE and Y. NIHEI	977
	Effects of Crystallinity on Formability and Corrosion Resistance of the Polypropylene Laminated Steel Sheets by Melt-extrusion Method / R. WAKE, K. TAKANO and R. YOSHIHARA	983
	Corrosion, Friction and Wear Properties of Various Materials in Molten Zinc	
	M. NAKAGAWA, J. SAKAI, T. OHKOUCI and H. OHKOSHI	989
	Growth Behavior of Alloy Layer in Hot-dip Zn-5~30 mass% Al Coating	
	Y. UCHIDA and K. YAMAKAWA	995
	Effects of Ti and La on High Temperature Oxidation Behavior of 20Cr-5Al Steel	
	N. HIRAMATSU and Y. UEMATSU	1001
	Improvement of the Descalability of Annealed SUS304 Steel by Using the Vertical Type Direct Fired Heating Furnace / S. KIYA, Y. HAYASHI, T. KOJIMA and Y. HYUGAJI	1007
	Influences of Ni and Ru on Corrosion Resistance of Ti-0.5%Ni-0.05%Ru (Grade13)	
	K. TAKI and H. SAKUYAMA	1013
	Inclusion Rating by Statistics of Extreme for Electron Beam Remelted Super Clean Bearing Steel and Its Application to Fatigue Strength Prediction	
	T. TORIYAMA, Y. MURAKAMI, T. YAMASHITA, K. TSUBOTA and K. FURUMURA	1019
	Hydrogen Occlusion Behavior during Delayed Fracture in Cold Drawn Steel Wire and Heat Treated Steel Bar for Prestressed Concrete / K. TAKAI, J. SEKI and Y. HOMMA	1025
