Special Issue on Development of Cokemaking Technology

Foreword	Research and Development of Coke Process Engineering / T. MIURA	345
Review	Evaluation of Coal Chemical Structure / M. SAKAWA	347
	Toward the 21st Century: Viewpoints of the Japanese Cokemaking Technology / K. NISHIOKA	353
Coal Structure		
Paper	Quantitative Evaluation of Hydrogen Transfer Related to the Appearance of Coal Plasticity	
	<i>M. NOMURA, S. MURATA, K. KIDENA and T. CHIKADA</i>	361
	Mixed Solvent Extraction Yield and Structural Changes of Heat-Treated Coals and Their Relation to Coal Fluidity	
	<i>T. TAKANOHASHI, T. YOSHIDA, M. INO, K. KATOH and K. FUKADA</i>	366
Coal Pretreatment		
	Thermoplastic Behavior of Coal Particles during Rapid Heating prior to Carbonization	
	<i>Y. OHTSUKA, Z. WU, A. TOMITA and S. ITAGAKI</i>	372
	Effects of Preheating Condition of Coal on Produced Coke Properties	
	<i>T. KOJIMA, A. NAGUMO, K. MIURA, T. ARAMAKI, T. ARIMA, Y. YAMASHITA and A. INABA</i>	378
Carbonization Phenomena		
	Characteristics of Gas Evolution during Coal Carbonization	
	<i>K. MATSUOKA, H. KAWAI, T. KUMAGAI and T. CHIBA</i>	383
	Effects of Heating Rate and Coal Type on Gas Evolution during Coal Pyrolysis	
	<i>T. TAKARADA, N. GOTO, K. MORISHITA, K. HAYASHI, H. KATAHIRA and H. TAKAHASHI</i>	388
	Mechanism of Moisture Transfer across the Oven Width at Early Stage of Carbonization	
	<i>H. KUNIMASA, T. CHIKATA, K. NISHIOKA and K. INOUE</i>	393
	Effect of the Load of Mechanical Pressure during the Pyrolysis on the Enhancement of Caking Properties of Slightly Coking Coal / K. MIURA, H. NAKAGAWA, D. TSUTSUMI, T. FUJISAWA and K. NIWA	399
	Modeling of Dilatation Behavior of Packed Bed of Coal during Carbonization	
	<i>H. AOKI, K. GOTO, M. UEKI, T. MIURA, K. FUKUDA and S. ITAGAKI</i>	404
	Estimation of Dilatation of Coal Blend / T. ARIMA, S. NOMURA and K. FUKUDA	409
	Thermal Stress and Deformation of Coke Layer during Carbonization	
	<i>S. ITAGAKI, I. SHIMOYAMA, K. FUKADA, S. HASEBE and N. SUZUKI</i>	414
Coke Quality		
	Microtexture Change of Semi-Cokes and Its Mechanical Strength Development During the Carbonization	
	<i>K. SAKANISHI, S. ISHIDA, I. MOCHIDA, T. KAMIJO, J. KIGUCHI and M. HONMA</i>	419
	Direct Heating Conditions of Coke Pushed out at Lower Temperature	
	<i>Y. MAENO, H. HARAGUCHI and H. SATO</i>	425
	Estimation of the Pore Partition Strength of Metallurgical Coke	
	<i>M. NISHIMURA, K. MATSUDAIRA and S. ASADA</i>	431
New Cokemaking Process		
	Quality and Productivity of Coke Carbonized by Experimental Oven Constructed Chamber Wall Made of High Thermal Conductivity Material / A. KASAI, H. IWAKIRI and T. KAMIJO	436
	Effects of Formcoke Shape on Gas Permeability and Internal Thermal Stress	
	<i>I. KOMAKI, K. IKEDA, K. KATO, M. ICHIDA and H. MORIDERA</i>	442
By-product		
	The Application of Biological Denitrification Method for Cokeoven Wastewater Treatment	
	<i>S. SOGAME, M. AKIYAMA, T. HONDA and T. HASEGAWA</i>	447
	Analysis of Oxidation Reforming of Formed Coke Tar and Its Application to Briquetting Binder Production for Formed Coke Process / K. HANAOKA, K. IGAWA and S. TAGUCHI	453
ISIJ International, Vol.37 (1996), No.5, Synopses and Titles		A17
