Paper	Effect of Thermal Resistance in a Sphere on Apparent Convective Heat Transfer Coefficient	
	<i>K. SATO, T. MURAYAMA and Y. ONO</i>	459
	Thermodynamics of Ni-Ca-O and Ni-Ta-Ca-O Melts in Equilibrium with Solid CaO	
	<i>F. ISHII, M. HINO and H. ITOH</i>	465
	In-Situ Observation of Grain-Boundary Migration in Fe-3wt%Si Bicrystals by Synchrotron X-Radiation Topography	
	<i>K. ICHIKAWA, T. UEDA, S. TSUREKAWA, Y. YOSHITOMI, Y. MATSUO, K. KAWASAKI, H. NAKASHIMA and H. YOSHINAGA</i>	471
	Analysis of Heat Transfer in Porous Solid Using Image Data Characterization	
	<i>K. NISHIOKA, T. MURAYAMA and Y. ONO</i>	475
	New Prediction Model of Fluidity of Blended Coal Based on Viscous Behavior of Suspension	
	<i>T. MATSUI, K. IGAWA and K. SORIMACHI</i>	480
	Gas Flow Calculation with a Turbulence Model in a Packed Bed	
	<i>K. TAKEDA and F.C. LOCKWOOD</i>	486
	Stochastic Model of Flow and Dispersion of Fine Particles in a Packed Bed	
	<i>K. TAKEDA and F.C. LOCKWOOD</i>	492
	Inclusion Separation from Molten Steel in Tundish with Rotating Electromagnetic Field	
	<i>Y. MIKI, H. KITAOKA, N. BESSHO, T. SAKURAYA, S. OGURA and M. KUGA</i>	498
	Thermal Diffusivities of Continuous Casting Mold Fluxes for Steel in the Glassy and Crystalline States	
	<i>H. SHIBATA, T. EMI, Y. WASEDA, K. KONDO, H. OHTA and K. NAKAJIMA</i>	504
	TLP Bonding of Hastelloy X with Ion Plating Filler	
	<i>T. TOYODA, T. HYODO and T. ENDO</i>	509
	The Effect of Nitrogen Content on Creep Rupture Strength of Low Carbon Type 316 Austenitic Stainless Steel	
	<i>H. UCHIDA and M. FUJIWARA</i>	514
	Metallurgical Factors Affecting the Fluting Resistance of Continuous Annealed Tinplate	
	<i>K. MARUOKA</i>	520
	Effects of Alloying Elements on the Creep Rupture Time of High Cr Ferritic Steel Weldments	
	<i>Y. TSUCHIDA, Y. TSUDA and Y. TOKUNAGA</i>	526
	Strengthening Mechanisms of Ti and Nb Bearing Steel Plates Produced by Thermomechanical Control Process	
	<i>T. HATOMURA, Y. KATAOKA, K. AMANO, Y. NAKANO and C. SHIGA</i>	532
	Effect of Microstructure on Creep Fatigue Properties for Type 316 Austenitic Stainless Steels	
	<i>N. FUJITA, T. NAKAZAWA, H. KOMATSU, H. KAGUCHI, H. KANEKO and H. UEDA</i>	538
	Technology for Producing Semi-solid Metal by Shearing and Cooling Roll Method	
	<i>T. SHINDE, H. MURAKAMI, K. HIRONAKA, M. UCHIMURA, M. HIRAI and A. NANBA</i>	544
	ISIJ International, Vol.36 (1996), No.6, Synopses and Titles	A21
