Special Issue on "Advances of Chemical Analysis and Physical Characterization"

| | | Instrumental Analysis |
|------------------|--|----------------------------|
| Paper | Rapid Analysis of Steelmaking Slag by Energy-dispersive X-ray Fluorescence Spectrometry <i>H. NAGASHIMA, S. SATO, M. OKANO, T. MOCHIZUKI, Y. YOSHIOKA and M. TANO</i> | 85 |
| Technical Report | Determination of Trace Elements in High Purity Iron as a Certified Standard Material by Instrumental Neutron Activation Analysis/ <i>S. SUZUKI, Y. OKADA and S. HIRAI</i> | 91 |
| | | Wet Chemical Analysis |
| Paper | Sensitive Determination of Arsenic and Selenium in Steels by High Power Nitrogen Microwave Induced Plasma Atomic Emission Spectrometry Coupled with Hydride Generation Technique <i>T. NAKAHARA, Y. LI, H. TAKEUCHI and M. FUTAMURA</i> | 97 |
| | Multi-elemental Determination of Trace Amounts Impurities in Iron Ores by Atomic Absorption Spectrometry using Iron Excluding Method by means of 4-methyl 2-pentanone Extraction <i>Y. ISHIBASHI, T. MISUMI and K. ISOBE</i> | 102 |
| | Determination of Zinc Compounds in the Recovered Dusts from the Electric Furnace Dusts <i>K. FUJIMOTO, M. SHIMURA and K. YOSHIOKA</i> | 108 |
| | Determination of Trace Amounts of Boron in Steel and Silicon by Anion Exchange Chromatography/ICP Mass Spectrometry/ <i>K. FUJIMOTO, M. SHIMURA and K. YOSHIOKA</i> | 114 |
| | Determination of Traces of Metals in Steel by Ion-exchange Separation and Atomic Spectrometry <i>K. OGUMA, K. KATO, Y. KURASHIMA, T. SEKI, A. ONO and Y. ISHIBASHI</i> | 119 |
| | Determination of Trace Elements in Acidic Solution of Iron and Steels by Graphite Furnace Atomic Absorption Spectrometry/ <i>T. KOBAYASHI, S. HASEGAWA and T. YOSHIOKA</i> | 124 |
| | Determination of Arsenic in Iron and Steel by Differential Pulse Anodic Stripping Voltammetry at a Rotating Gold-Film Electrode/ <i>T. TANAKA, T. SATO and T. ISHIYAMA</i> | 129 |
| Technical Report | Spectrophotometric Determination of Trace Amounts of Silicon in Niobium and Tantalum Metals after Fluoride Separation/ <i>T. IMAKITA, K. ONAWA and T. NAKAHARA</i> | 135 |
| | | Surface Analysis |
| Paper | Influence of Sample Treatment Methods on the Determination of Trace Oxygen in Iron and Steel <i>H. YASUHARA, M. SHIMURA and K. YOSHIOKA</i> | 138 |
| | Thickness Evaluation of Thin Multilayered Scale by Glow Discharge Spectroscopy Associated with Raman Spectroscopy/ <i>Y. FURUNUSHI and M. MASUDA</i> | 143 |
| | Evaluation of Spatial Resolution and Light Elements Analysis of Precipitates in Steel by AES <i>N. MAKIISHI, A. YAMAMOTO and K. YOSHIOKA</i> | 149 |
| | | Analysis of Precipitates |
| Paper | Separation and Determination of TiC in in-situ TiC Particle Reinforced Fe ₃ Al Based Alloys <i>M. ISHIKURO, S.-H. KO, K. TAKADA and S. HANADA</i> | 155 |
| | The Measurement of the Particle Size Distribution of Oxides in High Carbon Si-Mn Killed Steel <i>H. YASUHARA, M. SHIMURA and S. NABESHIMA</i> | 160 |
| | | Analysis of Microstructure |
| Paper | Magnesium K X-Ray Emission Spectra of Mg, MgO and Olivine [(Mg, Fe) ₂ (SiO ₄)] by EPMA and XRF <i>J. KAWAI, H. TAKAHASHI, K. HAYASHI, S. OKAZAKI and Y. AWAKURA</i> | 164 |

| | | |
|-------|--|-----------|
| | <i>In Situ</i> Observation Technique of High-temperature Reactions Using a New Image-plate System at Synchrotron Radiation/M. KIMURA, M. IMAFUKU, M. KUROSAKI, S. FUJII and Y. MORIMOTO | 169 |
| | Observation of Distribution Images of Light Elements in Metals by the Charged Particle Activation- autoradiography Using Imaging Plate/M. TANIGUCHI, N. GENNAI and T. IMAKITA | 174 |
| | <i>In-situ</i> X-ray Diffraction Analysis of Electrodeposition of Zinc Layers by Using Synchrotron Radiation M. IMAFUKU, M. KUROSAKI and K. KAWASAKI | 180 |
| | Development of Fast Texture Mapping System with Energy Dispersive X-ray Diffraction Method M. IMAFUKU | 184 |
| | Analysis of Organic Compounds | |
| Paper | A Characterization Method of Skeletal Structure for Polycyclic Aromatic Hydrocarbons by Molecular Ion Mass Spectrum/Y. FUJIOKA | 189 |
| | The Structural Analysis of the Rapid Heating Treated Coal Using Solid State NMR Methods K. SAITO, M. HATAKEYAMA, M. MATSUURA, K. KATO and I. KOMAKI | 195 |
| <hr/> | | |
| | ISIJ International, Vol.39 (1999), No.2, Synopses and Titles | A3 |
| <hr/> | | |
