

Contents

Fundamentals of High Temperature Processes

- Viscosity of Ternary $\text{CaO-SiO}_2\text{-M}_x(\text{F}, \text{O})_y$ and $\text{CaO-Al}_2\text{O}_3\text{-Fe}_2\text{O}_3$ Melts
T. YASUKOUCHI, K. NAKASHIMA and K. MORI571

Ironmaking

- Coke Degradation Mechanism in Raceway of Blast Furnace and Less Degradation Properties
K. YAMAGUCHI and T. UNO578

Casting and Solidification

- Peritectic Transformation and Austenite Grain Formation for Hyper-peritectic Carbon Steel
T. MARUYAMA, K. MATSUURA, M. KUDOH and Y. ITOH585
- Tensile Strength of Chromium Steel during and after Solidification
H. MIZUKAMI, A. YAMANAKA and T. WATANABE592

Instrumentation, Control and System Engineering

- Examination of Effective Factor on Curling and Curling Control in Plate Rolling
K. OHE, T. UEDA, T. TANI and M. SUDOU599

Forming Processing and Thermomechanical Treatment

- Mechanical Properties of Spring Wire Drawn and Tempered at Lower Bainite Region
M. AYADA, K. INOUE, N. TSUJI and Y. SAITO605

Transformations and Microstructures

- Effect of Acid Solve Al, N and Normalizing Condition on Graphite Precipitation in B Added High Carbon Sheet Steel/*K. FUKUI, N. MIZUI and M. ARAI*613
- Ferrite Grain Size Refinement by Heavy Deformation during Accelerated Cooling in Low-carbon Steel
Y. ADACHI, T. TOMIDA and S. HINOTANI620
- Doughnut-like Cementite Formed on the {110} Surface of an Fe-3%Si Single Crystal under High Temperature Carburizing/*Y. INOKUTI*628
- Mechanism of Strong Formation of {111} Recrystallization Texture of Cold Rolled IF Steel Sheet with {111} Hot Band Texture/*K. OKUDA, K. SAKATA, K. ELOOT, O. FURUKIMI and T. OBARA*633
