

Contents

Fundamentals of High Temperature Processes

- Desilicization Rate of Molten High Carbon Iron by Slags Containing FeO**
E. SHIBATA, T. SATO and K. MORI639
- Wettability Effect on the Flow Pattern of Air-water Two-phase Flows in a Vertical Circular Pipe**
Y. TERAUCHI, M. IGUCHI, H. KOSAKA, S. YOKOYA and S. HARA645
- Effect of the Carbon Content on Reduction and Melting Behavior of Carbon Composite Iron Ore Pellet**
T. MATSUMURA, Y. TAKENAKA and M. SHIMIZU652

Steelmaking

- Heat and Mass Transfer Analysis of Scrap Melting in Steel Bath**
M. KAWAKAMI, K. TAKATANI and L. C. BRABIE658

Chemical and Physical Analysis

- Optimization of Measuring Condition for the Determination of Carbon and Nitrogen in Steel by Glow Discharge Mass Spectrometry**
S. ITOH, H. YAMAGUCHI, T. YOSHIOKA, T. KIMURA and T. KOBAYASHI666

Forming Processing and Thermomechanical Treatment

- Development of Controlled Tapered Rolling Method for Manufacturing Tapered Leaf Spring**
M. AYADA, T. SATO, Y. SAKAI, M. KAWAKUBO, H. UTSUNOMIYA and Y. SAITO671
- Influence of Rolling Parameters on Satellite-mill Rolling Characteristics of U- and H-shaped Wires**
H. UTSUNOMIYA, Y. SAITO, H. MATSUZAWA and T. KAWAMOTO678

Surface Treatment and Corrosion

- Effect of Electroless Nickel Plating on Reaction between Silicon-containing Steels and Molten Zinc**
Y. WAKAMATSU, K. UEMOTO, M. YAMANE and F. NOGUCHI684

Transformations and Microstructures

- Effect of Steel Composition on Ultra Grain Refinement by Heavy Deformation during Accelerated Cooling**
Y. ADACHI, T. TOMIDA and S. HINOTANI691
- Effect of Cu Addition on Phase Transformation and Microstructure in 9 mass% Cr Martensitic Steels**
Y. FUTAMURA, T. TSUCHIYAMA and S. TAKAKI697

New Materials and Processes

- Particle Size of Atomized Alloy Powder Prepared by Using a Confined-type Atomizing Nozzle**
T. FUKUDA and K. ASABE703
