

Contents

Special Issue on "Application and Control of Molten Steel Flow"

Fundamentals on Bubble-Droplet Behaviour and Mass Transfer

Behavior of a Single Bubble Colliding with a Flat Plate of Poor Wettability

N. SONOYAMA, M. IGUCHI, Y. SASAKI and K. ISHII203

Turbulent Flow and Gas-Liquid Mass Transfer in Gas-injected System

S. TANIGUCHI, Y. MATSUKURA and A. KIKUCHI210

Metal Droplet Holdup in the Thick Slag Layer Subjected to Bottom Gas Injection

S. TAKASHIMA and M. IGUCHI217

Application and Control of Molten Steel Flow in Ladle and Tundish

Circulation Characteristics of RH Degassing Vessel Water Model with Multi-legs

F. OBATA, R. WAKA, K. UEHARA, K. ITO and Y. KAWATA225

Effect of Tundish Shape on Inclusion Outflow Ratio

T. NAKAOKA, T. MIYAKE, T. MIMURA and H. TAI231

Cleaning Molten Steel with the Centrifugal Flow Tundish

Y. MIKI, H. SHIBATA, N. BESSHO, Y. KISHIMOTO, K. SORIMACHI and A. HIROTA239

Fundamentals on Molten Steel Flow in CC Mold

Deflection of Steel Dendrite Growing in the Fluid Flow Driven by Electromagnetic Stirrer

H. ESAKA, T. TOH, H. HARADA, E. TAKEUCHI and K. FUJISAKI247

Model Experiment Using Succinonitrile on the Formation of Equiaxed Grains Caused

by Forced Convection/H. ESAKA and M. TAMURA252

Model Experiment of Swirl Effect in Bottomless Immersion Nozzle on Molten Steel Flow in Slab CC Mold

S. YOKOYA, S. TAKAGI, M. IGUCHI, K. MARUKAWA and S. HARA259

Application and Control of Molten Steel Flow in CC Mold

Measurement of Meniscus Flow Velocity in High Speed Continuous Casting Mold

H. MIZUKAMI, M. HANAO, S. HIRAKI, M. KAWAMOTO, T. WATANABE, A. HAYASHI and M. IGUCHI265

Steel Flow Control with Travelling Magnetic Field for Slab Continuous Caster Mold

J. KUBOTA, N. KUBO, M. SUZUKI, T. ISHII, R. NISHIMACHI and N. ARAMAKI271

New Sequential Casting of Different Grade of Steel with a Level DC Magnetic Field

H. HARADA, E. TAKEUCHI, M. ZEZE and T. ISHII278
