

Contents

Fundamentals of High Temperature Processes

- Formation Rate of Iron Carbide in a Pellet under Pressurized H₂-CO Gas Mixtures
Containing Traces of H₂S/S. HAYASHI, T. YASUDA and Y. IGUCHI285

Ironmaking

- Development of High Precision Burden Distribution Control Technology with Wide Flexibility
at Blast Furnace/T. NOUCHI, K. TAKEDA and H. ITAYA293
- Estimation of Metal Flow in the Hearth and the Hearth Brick Protection Mechanism
in Chiba No. 6 Blast Furnace/S. WATAKABE, K. TAKEDA, Y. SAWA and T. KAWAI301
- Effects of the Magnetic Field Exerted on the Plate Type Feeder on the Void Fraction in the Sintering Bed
and Sinter Productivity/N. OYAMA, K. IGAWA, K. NUSHIRO, M. IDA and N. FUJII309

Casting and Solidification

- Formation Mechanism of a White Spot Defect on the Tin Plate Steel Produced by Continuous Cast Slab
A. KUSANO, N. SATO and M. OKIMORI315
- Development of Mold Powder for High Grade Sheet Steel
A. KUSANO, R. NISHIHARA, Y. MINAGAWA and M. SATO323

Forming Processing and Thermomechanical Treatment

- Development of Thermal Profile Control and High Accurate Mill Setting Technology in Plate Rolling
K. OHE, Y. MORIMOTO, S. SHIMADA and D. MIYOSHI329

Welding and Joining

- Effects of Metallurgical Properties on Fatigue Limit of Arc-welded Sheet Steel
M. UCHIHARA, M. KURITA and T. TAKA336

Transformations and Microstructures

- Precipitation Behavior and 2-step Aging of 17-4PH Stainless Steel
H. KIMURA343
- Dynamic Recrystallization in 18% Cr Ferritic Steel
H. YAGI, N. TSUJI and Y. SAITO349

Physical Properties

- Grain Boundary Energy and Structure of α -Fe(110) Symmetric Tilt Boundary
H. NAKASHIMA and M. TAKEUCHI357
