

Contents

Fundamentals of High Temperature Processes

- Magnetic Separation of Inclusions in Molten Metal Using a High Magnetic Field
N. WAKI, K. SASSA and S. ASAI363
- Composition Analysis of Calcium Ferrite in Iron Ore Sinters by EPMA Scanning Method
Z. Q. WANG, Y. SASAKI, Y. KASHIWAYA and K. ISHII370

Ironmaking

- Synthesis of Iron Carbide from Hematite Pellets with H₂-CH₄ Gas Mixture
M. EGASHIRA, T. MAEDA, K. NISHIOKA and H. NAKAGAWA375

Forming Processing and Thermomechanical Treatment

- Mechanism of Uneven Thermal Distribution Formation during Water Cooling at Low Temperature
for a Moving Plate/*N. SHOJI, M. HARIKI, Y. HARAGUCHI and M. MORITA*381

Surface Treatment and Corrosion

- Blast Erosion Properties of Erosion-resistant Thermally Sprayed Coating
K. SONOYA388
- Relationship between Surface Structure of Silicon Containing Steel and Adhesion
of Hot Dip Galvanized Coating/*Y. TSUCHIYA, S. HASHIMOTO, Y. ISHIBASHI, J. INAGAKI and Y. FUKUDA*396

Mechanical Properties

- Effect of Microstructure on Low-cycle Fatigue Property of Structural Steels
under Large Plastic Deformation/*N. ISHIKAWA, M. KURIHARA and M. TOYODA*402
- Ductile Crack Propagation Characteristics and Mechanism of Structural Steel under High Strain Rate
H. FURUYA, R. UEMORI, S. AIHARA, Y. TOMITA and Y. HAGIWARA409
- Wear and Shelling Behavior in Pearlitic and Bainitic Rail Steels with Various Tensile Strengths
H. YOKOYAMA, S. MITAO, J. SAKAI and S. YAMAMOTO417

Social and Environmental Engineering

- A Macro Model for Steel Usage Pattern in Japan Using the Population Balance Model
K. KAKUDATE, M. KAWAMURA, Y. ADACHI and T. SUZUKI425
