

Contents

Fundamentals of High Temperature Processes

- Effects of Oxygen Pressure, Al_2O_3 and MgO on the Liquidus Surface of FeO_x-SiO_2-CaO System (Review)
A. YAZAWA431

Casting and Solidification

- Interfacial Motion between Nonconductive Fluid and Liquid Metal Caused
by a Quasi-sinusoidal Magnetic Field/Z. SU, K. IWAI and S. ASAI441
- Evaluation of Basic Parameters in a Mold Oscillationless Electromagnetic Casting
Y. ZHOU, K. SASSA and S. ASAI446

Forming Processing and Thermomechanical Treatment

- User-friendly 3D FEM Simulation System for Bar and Wire Rod Rolling Processes
J. YANAGIMOTO, M. KIUCHI, H. MIYAZAWA and M. ASAKAWA452

Transformations and Microstructures

- Controlling Factors of Pearlite Transformation Rate of 0.4 mass% C Steels
T. YAMASHITA, T. NARUTANI and Y. SAITO458
- Effects of Mo-C dipole on the Development of {111} Recrystallization Texture
in Mo Added Low Carbon Steels/K. TAGASHIRA, T. MUTSUJI and T. ENDO466
- Effects of the Pre-transformation Microstructures on the Grain Refining
of Medium-carbon 5Cr-Mo-V Steels/Y. MUKAIDA, T. SHIBATA, S. ONO and T. ISHIGURO472
- Effect of Large-strain Warm Deformation Prior to Austenitization on γ Grain Size in 0.3%C-9%Ni Steel
T. YOKOTA, T. SHIRAGA, K. SATO and M. NIHKURA479
- Microstructure and Tempering Behavior of Rapidly Solidified Layer of W-type High Speed Steels Formed
by Laser Surface Melting/Y. SEKI and Y. ASHIDA485

Mechanical Properties

- Effects of Microstructure and Simulated Body Environment on Fatigue Crack Propagation Behavior
of Ti-5Al-2.5Fe for Biomedical Use/M. NIINOMI, A. SAGA, L. WANG and K. FUKUNAGA492
