

Contents

Chemical and Physical Analysis

Structures and Reactions at Metal/Electrolyte Interfaces at the Atomic Level (Review)

K. ITAYA and J. INUKAI679

Ironmaking

Micro-structural Analysis of Coke Using the Overlaying Mesh Finite Element Method

Y. ASAKUMA, M. SOEJIMA, T. YAMAMOTO, H. AOKI, T. MIURA and S. ITAGAKI685

Casting and Solidification

Proposal of Independent Two Phase Growth during Solidification in Austenitic Stainless Steels

H. INOUE and T. KOSEKI692

The Effects of Inclusions in Steel on MnS Precipitation in Fe-Si Alloys

H. HASEGAWA, K. NAKAJIMA and S. MIZOGUCHI700

Transformations and Microstructures

Effect of Oxide Composition on Solidification Structure of Ti Added Ferritic Stainless Steel

H. FUJIMURA, S. TSUGE, Y. KOMIZO and T. NISHIZAWA707

Mechanical Properties

Impact Properties of S45C under Tensile Loading

T. YAMAGUCHI, Y. KOBAYASHI, I. NAGASAKA and T. TAKASAN713

Characteristics of Luders Deformation and Their Computer Simulation Based on a Work-softening Model

R. ONODERA, I. MORITA, R. KAMIKIHARA and M. ARAMAKI719

ISIJ International, Vol.41 (2001), No.11, Synopses and TitlesA30
