

Contents

Fundamentals of High Temperature Processes

- Nitride Capacity of the Molten CaO-SiO₂-Al₂O₃ System Containing TiO₂ or ZrO₂ and Equilibrated with Molten Si/M. SASABE, S. YAMASHITA, S. SHIOMI, T. TAMURA, H. HOSOKAWA and K. SANO727

Ironmaking

- Reduction Behavior of the Mixture of Iron Ore and Carbonaceous Material at High Temperatures T. YAMAMOTO, Y. SAWA and K. TAKEDA734

Casting and Solidification

- Effect of Wettability of Immersion Nozzle on Mold Powder Entrapment around Immersion Nozzle in Continuous Casting Mold/J. YOSHIDA, M. IGUCHI and S. YOKOYA741

Chemical and Physical Analysis

- Statistics of Extremes Analysis of Nonmetallic Inclusions Based on 3D Inspection S. ZHOU, Y. MURAKAMI, Y. FUKUSHIMA and S. BERETTA748

- Development of Determination of Trace Oxygen in Steel after Removing Surface Oxide K. ITO and M. KOIKE756

Mechanical Properties

- Properties of Ultra Low Carbon Steel Produced by Repetitive Shear Deformation of Side Extrusion A. AZUSHIMA, K. AOKI and T. INOUE762

ISIJ International, Vol.41 (2001), No.12, Synopses and TitlesA33
