

Contents

Special Issue on “Bolted Connections and High Strength Bolts”

High Strength Bolted Connections in Steel Structures (Review) A. TANAKA	587
A New Design for Bridge Joints Using High Strength Bolts (Review) K. SHITO and N. SUZUKI	593
Bolt Steels Used for Steel Structures (Review) Y. NAMIMURA	600
Delayed Fracture of Bolts (Review) F. NAKASATO	606
Evaluation Method of Delayed Fracture Property and Overcoming Techniques of Delayed Fracture of High Strength Steels (Review)/T. TARUI and S. YAMASAKI	612

Fundamentals of High Temperature Processes

Development of Non-contact Electromagnetic Sensor for the Meniscus Velocity Measurement of Molten Metal Flow/M. IGUCHI, K. HANAZAKI and Y. TERAUCHI	629
Development of the Recycling Process of Automobile Shredder Residue by Coal-tar Based Oil Bath Treatment/I. UENO, M. ASANUMA, H. HIROHA, T. OKADA, T. ARIYAMA and K. WAKIMOTO	635
Interaction between Water–Air Bubbling Jet and Side Wall of Vessel (Note) M. IGUCHI and K. SASAKI	699

Chemical and Physical Analysis

Inclusion Inspection Method in Ultra-sonic Fatigue Test Y. FURUYA, S. MATSUOKA and T. ABE	643
Analysis of Chemical Reaction in the Voids of Cokes Using NMR Gas Imaging K. SAITO, K. KUNITOMO, K. FUKUDA, K. KATOH and I. KOMAKI	651
Direct Analysis of Trap Elements in Steel by Radio-frequency Glow Discharge Optical Emission Spectrometry Associated with Bias-current Introduction —The Application to Quantitative Determination of Tin— (Technical Report) K. WAGATSUMA	694

Surface Treatment and Corrosion

Microbially Influenced Corrosion and Biodeterioration of Structural Metals (Review) Y. KIKUCHI and K. R. SREEKUMARI	620
Microbiologically Influenced Corrosion of SUS304L and SUS316L Welds Caused by Aerobic and Anaerobic Bacteria in Groundwater (I) —Laboratory Simulation Studies and Corrosion Behavior— Y. KIKUCHI, M. OZAWA, K. TOHMOTO, H. ONISHI, T. SAKANE and T. ANZAI	658
Microbiologically Influenced Corrosion of SUS304L and SUS316L Welds Caused by Aerobic and Anaerobic Bacteria in Groundwater (II) —A Role of Aerobic and Anaerobic Bacteria— Y. KIKUCHI, M. OZAWA, K. TOHMOTO, H. ONISHI, T. SAKANE and T. ANZAI	664
Effect of Alloy Elements on Localized Corrosion Characteristics of Nitrogen-bearing Stainless Steels and Evaluation of Crevice Corrosion in Seawater Environment/M. SAGARA, H. UNO, Y. KATADA and T. KODAMA	672

Transformations and Microstructures

Effect of B on Microstructural Change during Creep Deformation in High Cr Ferritic Heat Resistant Steel/T. AZUMA, K. MIKI, Y. TANAKA and T. ISHIGURO	678
Precipitation Behavior of TaC in Austenite of Ferritic Heat Resisting Steel with High Chromium Contents K. SHINOZUKA, M. TAMURA and H. ESAKA	686
