

Contents

Fundamentals of High Temperature Processes

State of the Art in Integrated Thermodynamic Databases (Review)

T. MATSUMIYA and A. KIYOSE 51

Ironmaking

Behavior of Trace Chlorine in Sintering Bed and Its Effect on Dioxins Concentration in Exhaust Gas of Iron Ore Sintering/*T. KAWAGUCHI, M. MATSUMURA, Y. HOSOTANI and E. KASAI* 59

Welding and Joining

Application of the Direct Resistance Heating for Stainless Steel/Aluminum Clad Manufacturing Process

K. HAMADA, K. ISAKA, D. DOI, Y. YONEMITSU and S. IWASAKI 66

Surface Treatment and Corrosion

Improvement of Pitting Corrosion Resistance of Spring Steels for Automobile by Alloying and Chemical

Passivation Treatment/*T. FUKUZUMI and T. MISAWA* 73

Hydrogen Embrittlement and Corrosion Fatigue Caused by Pitting Corrosion of Spring Steels for Automobile with Improved Pitting Corrosion Resistance by Alloying Elements and Chemical Passivation Treatment

T. FUKUZUMI, S. KOMAZAKI and T. MISAWA 81

Mechanical Properties

Prediction of Forming Limit Diagram (FLD) and Effect of Work Hardening Property on FLD of Sheet Metals

L. GU, A. TANAKA, K. TANAKA and K. NAKAJIMA 88

Effect of Mo and W on Creep Characteristics of Precipitation Hardened Carbon Free Martensitic Alloys

S. MUNEKI, M. IGARASHI and F. ABE 95

New Materials and Processes

Observation of Morphologies in Ti Films after Deformations of Ti-coated (011)[100] Si-steel Single

Crystals/*Y. INOKUTI* 101

ISIJ International, Vol.42 (2002), No.2, Synopses and Titles A4
