

Contents

Fundamentals of High Temperature Processes

- The Effect of Pressure in the Atmosphere on Desulfurization of Hot Metal and Reaction Mechanism with Magnesium/S. HOSOHARA, Y. KATO, H. NAKATO and K. SORIMACHI129

Casting and Solidification

- Overview of Near-net-shape Continuous Casting for Steel Sheet (Review)
T. WATANABE107

Surface Treatment and Corrosion

- Reaction between Iron and Solid Zinc through Thin Fe-Al Alloy Layer
Y. WAKAMATSU, D. TOMITA, Y. KAJI, M. YAMANE and F. NOGUCHI136

Transformations and Microstructures

- Influence of Thermal History on Surface Hot-shortness of Cu-Sn Bearing Steel
M. HATANO, K. KUNISHIGE and Y. KOMIZO142

- Relationship between Thickness of Pancake Austenite and Thickness of Grain Boundary Ferrite
S. TORIZUKA and K. NAGAI148

- Effects of Cold Rolling Reduction on Secondary Recrystallization of Fe-3%Si Alloy
T. SHIMAZU, S. ARAI, T. SAKAI and H. TSUBAKINO155

Mechanical Properties

- Development and Production of 10Cr1.5MoVNb Steel for Gas Turbine Compressor Disk (Technical Report)
Y. KADOYA, R. MAGOSHI, Y. OKAMOTO and K. NAKATA163

Physical Properties

- Fundamental Properties of Cementite and Their Present Understanding (Review)
M. UMEMOTO and K. TSUCHIYA117
