

Contents

Fundamentals of High Temperature Processes

Mass Transfer Influenced by Wave Motions Appearing on Gas-Liquid Interface Exposed to Turbulent

Flow/T. KUMAGAI, M. IGUCHI, T. UEMURA and N. YONEHARA180

Ironmaking

Evaluation of Matrix of Coke Strength by Nano-indentation Method

M. MIHASHI, M. SOEJIMA, Y. ASAKUMA, T. YAMAMOTO, H. AOKI, T. MIURA, K. KATO and S. ITAGAKI188

Steelmaking

Effects of Pressure, Sulfur and Oxygen on the Rate of Decarburization from Liquid Steel

S. MUKAWA and Y. MIZUKAMI195

Chemical and Physical Analysis

Advance in the Excitation Source in Glow Discharge Optical Emission Spectrometry (Review)

K. WAGATSUMA169

Surface Treatment and Corrosion

Development of a New Technology for Controlling NO_x Gas Generation on Pickling of Stainless Steel and

Titanium Metal by Nitric-hydrofluoric Acid/S. KIYA, H. KITA, T. SHIMOMURA, M. OHTO and H. WATANABE202

In situ Measurement of Dissolved Ion Concentration inside an Artificial Crevice by X-ray Fluorescence

Micro-probe Technique/M. KANEKO and H. S. ISAACS210

Transformations and Microstructures

Coherent Laves Phase Finely Precipitated in Heat Resisting High-W and 10% Cr Ferritic Steels

Y. MURATA, K. TAKAMI, M. KAMIYA, M. MORINAGA, R. HASHIZUME, K. MIKI, T. AZUMA and T. ISHIGURO214

Physical Properties

Magnetic Properties of Fe-Cr-C and Fe-Cr-C-Ni Alloys

S. YOKOYAMA and T. INUI222

ISIJ International, Vol.42 (2002), No.4, Synopses and TitlesA9
