

Contents

Fundamentals of High Temperature Processes

- Structures of Molten Silicate and Aluminosilicate Slags (Review)
Y. SASAKI and K. ISHII419
- Relationship between Morphology of Nonmetallic Inclusion in Solidified Steel Evaluated by Fractal
Dimension Analysis and Oxygen Concentration of Its Molten State
S. YAMASHITA, T. OGURA, S. ISHIMURA and M. SASABE444
- Interaction between Two Water-Air Bubbling Jets (Note)
K. SASAKI and M. IGUCHI476

Ironmaking

- Present Status of the Development of Smelting Reduction Technologies (Review)
T. KITAGAWA430

Steelmaking

- Influence of Slag Composition and Stirring Energy by Top Blowing on the Decarburization Rate of Stainless
Steel in Combined Blowing Converter/N. KIKUCHI, K. YAMAGUCHI, Y. KISHIMOTO, S. TAKEUCHI and H. NISHIKAWA450

Forming Processing and Thermomechanical Treatment

- Development of a Simulator for Degradation Behavior of Emulsion-type Coolant for Cold Rolling
S. FUKUMOTO, K. MATSUMOTO and K. GOTO458

Transformations and Microstructures

- Improvement of Toughness and Strength on Large Scaled SCS24 Stainless Cast Steel
H. ITOH and K. KUBO464

Social and Environmental Engineering

- Environmental Impact Analysis of ULSAB Cars and Aluminum-body Cars Using a Population Balance
Model/K. KAKUDATE, M. YAMASHITA, Y. ADACHI and T. SUZUKI470
