

Contents

Fundamentals of High Temperature Processes

- Improvement of Mathematical Model of Blast Furnace and Its Application in Practical Operation (Review)
H NOGAMI211
- Indirect and Direct Reaction Rates and Acceleration Effect in Wustite–Coal Char Composite Pellet
 Heated at Elevated Temperature/*F MENG, M HIURA and Y. IGUCHI*229

Ironmaking

- Relationship between the Assimilation Properties of Fine Ores and the Strength of Sinter
J OKAZAKI, Y HOSOTANI and M NAKANO237
- Analysis of No. 3 Blast Furnace Operation of TangGang Works at China Based on Rist Diagram
 (Technical Report)/*J Z CHANG, Y SASAKI, H AYUKAWA and K ISHII*309

Steelmaking

- Characteristics of Gas Flow in Laval Nozzle with Sub-hole for RH Multi-function Treatment
T HIRAOKA, K OHNUKI, H FUJII, K FUKUDA and Y. HOSHIJIMA244
- RH Treatment by Laval Nozzle Lance with Sub-hole
T. HIRAOKA, K. OHNUKI, H. FUJII, K. FUKUDA and Y. HOSHIJIMA252
- Desulfurization with RH Multi Function Burner Lance
T. HIRAOKA, K. OHNUKI, H. FUJII, K. FUKUDA and Y. HOSHIJIMA258

Casting and Solidification

- Numerical Prediction of Solidification Structure Taking Account of Molten Steel Flow
H HARADA, K MIYAZAWA, T MATSUMIYA, T. MOROHOSHI and H ESAKA265

Chemical and Physical Analysis

- Determination of Copper in Steels by Inductively Coupled Plasma Atomic Emission Spectrometry with
 Gas-phase Sample Introduction Technique (Technical Report)/*A MATSUMOTO, T. KOBATA and T. NAKAHARA*315

Forming Processing and Thermomechanical Treatment

- Recent Progress in Analytical Models for the Simultaneous Optimization of Deformed Geometry and
 Microstructure (Review)/*J YANAGIMOTO and J LIU*221
- Effect of Strain on Microstructures and Mechanical Properties of ARB Processed and Annealed Ultra-low
 Carbon IF Steel/*N KAMIKAWA, N TSUJI and Y SAITO*273
- Characteristics of Steel Plates Rolled with Shear Deformation
H. NAKAJIMA, T. YAMASHITA, T. INOUE, S. TORIZUKA, T. HANAMURA and K. NAGAI281

Transformations and Microstructures

- A New Etching Method of Deformation-induced Martensite in Type 304 Stainless Steel Hot Rolled Plate
H HAYAKAWA and M NAGUMO289

Mechanical Properties

- Ferrite Grain Refinement of Ti-added Low Carbon Steel through Dynamic Recrystallization in Austenite
 Region/*E YASUHARA, K SETO and K. SAKATA*297

Physical Properties

- Chemical Composition Dependence of Magnetostrictive Properties of Fe–Pd Alloy Films
H YABE and Y NISHI303
