Contents

Special Issue on "Recent Advances in Chemical Analysis of Iron and Steel"

Metallic and Tramp Elements

- Determination of Some Trace Elements in Steels by High Power Nitrogen Microwave Induced Plasma Atomic Emission Spectrometry Coupled with Hydride Generation Technique (Review)
A. MATSUMOTO and T. NAKAHARA881
- Comparison of ICP Atomic Emission Intensities on Axial and Radial Views, and Determination of Trace Amounts of As, Sb and Sn in Iron and Steel
T. ITAGAKI, K. TAKADA, K. WAGATSUMA and K. ABIKO890
- Analysis of the Trace Amount of Metallic Elements in Iron and Steels Using the Microwave Decomposition by ICP-AES and ICP-MS/K. HANADA, Y. KAJIMA, K. FUJIMOTO, M. SHIMURA and S. SATOH895
- Determination of Trace Tramp Elements and Other Trace Elements in Pure Iron Standard Materials by Instrumental Neutron Activation Analysis/Y. OKADA and S. HIRAI900
- Simultaneous Determination of Trace Copper, Lead, Cadmium and Zinc in Iron and Steel by Stripping Analysis/T. TANAKA, T. KASHIHARA, A. TAGUCHI and H. KONDO906
- Determination of Zinc in Iron and Steel by Reversed-phase High-performance Liquid Chromatography with $\alpha, \beta, \gamma, \delta$ -tetrakis(4-carboxyphenyl)porphine as a Precolumn Derivatizing Agent
N. UEHARA, K. NOMOTO and T. SHIMIZU914
- Spectrophotometric Determination of Antimony in Steels by Flow Injection Analysis Using a Teflon Tube Concentration Method/K. WATANABE, T. OSAWA and M. ITAGAKI920
- Determination of Arsenic in Steel by Metal Furnace-AAS and Flow Injection Analysis Based on Method with On-line Iodide Trace Extraction System/A. SAKURAGAWA, T. TANIAI and A. UZAWA927
- Determination of Zinc in Steel Samples by Atomic Absorption Spectrometry Using Flow System Removing Iron(III)/H. ASANO, H. ITABASHI and H. KAWAMOTO935
- Sensitive Determination of Molybdenum in Steel by Flow Injection-On-line Ion-exchange Preconcentration-ICP-Atomic Emission Spectrometry/T. SEKI, K. OGUMA and Y. ISHIBASHI939
- A Novel FI System for Chemical Analysis of Stainless Steels for Nickel Determination without Complicated Procedures and a Great Deal of Skill/T. YAMANE, Y. TSUCHIYA, Y. TANAKA and K. FUJIMOTO943
- Flow Chemiluminescent Determination of Chromium in Stainless Steel
K. MUTO, K. OHNO, J.-M. LIN and M. YAMADA948
- Determination of Bismuth in Steels by High Power Nitrogen Microwave Induced Plasma Atomic Emission Spectrometry Coupled with Hydride Generation Technique (Technical Report)
A. MATSUMOTO, T. SHIOZAKI and T. NAKAHARA953
- Determination of Trace Elements in High Purity Iron by Solid Phase Extraction Using Bonded Silica/ICP-MS (Technical Report)/S. HASEGAWA, K. IDE, T. KOBAYASHI, K. SATO, S. IGARASHI and K. NAITO958
- Determination of Tramp Elements in Iron and Steel by Glow Discharge Mass Spectrometry (Technical Report)/S. ITOH, H. YAMAGUCHI, I. HAMANO, T. HOB0 and T. KOBAYASHI962
- Evaluation of Chemical Compositions as to Pure Iron and Pure Aluminum (Technical Report)
Y. ISHIBASHI, S. HIRAI and K. KAKITA967

Nonmetallic Elements

Spectrophotometry of Boron in Steels with Curcumin by Flow Injection Analysis <i>K. WATANABE, A. SHISHIDO and M. ITAGAKI</i>	973
Characteristics of Liquid Core Waveguide Cell Made of Low-refractive-index Polymer and Its Application to the Spectrophotometric Determination of Sulfur in a Steel Sample <i>K. TSUNODA, T. UMEMURA, T. WATANABE, H. TAKIGUCHI, H. ASANO, H. ITABASHI, Y. ISHIBASHI and S. SATO</i>	979
New Device of High Sensitive and Simplified Detection System for Sulfur by Means of Mist-Gas Phase Chemiluminescent Reaction Associated with Skill-free Technology in Steel Analysis <i>N. OMI, M. ISHII, Y. KATO and M. YAMADA</i>	982
Development of Determination of Trace Oxygen in Steel Using Molten Tin after Removing Surface Oxide under the Closed System <i>H. UCHIHARA, A. BANDO, M. IKEDA and T. NAKAHARA</i>	988
Development of Continuous Monitoring System for Gas Generation Behavior during Coking Reaction <i>M. NISHIFUJI, Y. FUJIOKA and K. SAITO</i>	994

Inclusion

Rapid Evaluation of Inclusion in Steel by Use of Cold Crucible Levitation Melting <i>H. KONDO, T. TOH, R. UEMORI, T. SUZUKI, K. CHIBA, H. YAMAMURA, M. WAKOH and E. TAKEUCHI</i>	1000
