

"Tetsu-to-Hagané"

Vol.90 No.2 February, 2004

Contents

Fundamentals of High Temperature Processes

- Numerical Simulation on High-temperature Gasification and Melting Furnace for Solid Waste
X. LIANG, H. NOGAMI, J. YAGI, S. ISOZAKI and T. MATSUDAIRA79

Ironmaking

- The Current Status and Future of Iron Ore and Coal Resources for Japanese Steel Mills (Review)
K. NAGANO51

Chemical and Physical Analysis

- Analysis of Iron and Steels for Tramp Elements by Graphite Furnace AAS
T. KOBAYASHI, S. HASEGAWA, S. ITOH, K. IDE, H. YAMAGUCHI and K. YAMADA86
- Analysis of Polycyclic Aromatic Hydrocarbons by Negative Ion Chemical Ionization Mass Spectrometry
and its Application for Analysis of Coal Tar/*Y. FUJIOKA*92

Welding and Joining

- Microstructure Development and Control in Steel Welds (Review)
T. KOSEKI61

Transformations and Microstructures

- Strength and Structure of Heat Resisting Steels at High Temperatures (Review)
H. NAKASHIMA73
- High-temperature Nitridation Behavior of an Fe-38Ni-13Co-4.7Nb-1.5Ti-0.4Si Superalloy in a Flowing
Nitrogen Gas Atmosphere/*K. KUSABIRAKI and K. SHIRAI*98
- Hydrogen Absorption of High Nb Bearing Steel
T. OMURA, T. KUSHIDA, K. MIYATA and Y. KOMIZO106

-
- ISIJ International, Vol.44 (2004), No.2, Synopses and TitlesA5
-
