Special Issue on “Further Progress toward Innovative Design of Metallurgical Reactor for Mixing/Separation”

Further Progress toward Innovative Design of Metallurgical Reactor for Mixing/Separation (Preface)	
S. YOKOYA	295
Evaluation Method of Mixing Characteristics in Chemical Reactors (Technical Report)	
Y. SASAKI, M. IGUCHI and S. YOKOYA	296
Novel Mixing and Separation Method through Vortex Stirrer	
S. YOKOYA, S. TAKAGI, K. SASAKI and M. IGUCHI	301
Effect of Funnel Angle and Wettability on Swirling Flow of Liquid in the Funnel	
H. ONO-NAKAZATO, T. TANAKA, A. OKAMOTO, M. AONO, T. USUI, S. YOKOYA and S. HARA	306
Separation of Inclusion through Swirl Flow in Immersion Nozzle Using Water Model Experiment	
N. SONOYAMA, M. IGUCHI, S. TAKAGI and S. YOKOYA	312
Relaxation of Uneven Velocity through Swirl Blade in Immersion Nozzle	
S. YOKOYA, S. TAKAGI, Y. KUDOU, Y. SASAKI and M. IGUCHI	317
Effect of Hot Metal Temperature and Rotation Speed on the Rate of Desulfurization Rate by Mechanical Stirring Process	
N. KIKUCHI, S. NABESHIMA, S. TAKEUCHI, T. YAMAUCHI, Y. KITANO and S. OGURA	322
Effect of Baffles on the Mixing of Liquid and Particles in a Mechanically Stirred Vessel	
S. KUROYANAGI, N. YAMAMOTO, A. IBA, H. HORII, K. ITO and N. KIKUCHI	329
Effect of Immersion Cylinder on the Dispersion of Low Density Particles by Mechanical Agitation	
T. SUKAWA and M. IGUCHI	334
Behavior of Stratified Two Liquid Layers Contained in a Baffled Vessel Suddenly Set in Rotation	
T. SUGIMOTO and M. IGUCHI	339
Conditions for the Generation of Swirl Motion of a Gas-Liquid Two-phase Jet in a Cylindrical Vessel	
M. SHITARA, M. IGUCHI, T. TAMAMORI, J. YOSHIDA and D. IGUCHI	345
The Characteristics of Swirl Motion in a Cylindrical Vessel Induced by a Gas-Liquid Two-phase Jet (Technical Report)	
M. SHITARA, M. IGUCHI, T. TAMAMORI and K. TAKANO	351
Transient Characteristics of Swirling Liquid Jet in a Cylindrical Bath	
D. IGUCHI, J. YOSHIDA and M. IGUCHI	357
Effect of Top Slag on the Swirl Motion of Cylindrical Bath Agitated by Bottom Blowing Liquid Jet	
D. IGUCHI, J. YOSHIDA and M. IGUCHI	363
Water Model Experiment on Mixing Time in a Cylindrical Bath Agitated by Swirling Molten Steel Jet	
J. YOSHIDA, D. IGUCHI and M. IGUCHI	371
The Swirl Motion of Vertical Bubbling Jet in a Spherical Vessel at Low Weber Numbers	
Y. KOSAKA and M. IGUCHI	379
Mixing Time in a Spherical Vessel Agitated by Bottom Gas Injection	
Y. KOSAKA and M. IGUCHI	387
Effect of Lorentz Force on Instability of the Interface between Two Liquid Layers	
T. KOZUKA, M. KOJIMA and M. KAWAHARA	394
Effect of Oxide Additives on Desulfurization Efficiency of Hot Metal by CaO-based Powders	
I. SHIMODA, T. SATO, T. NAKASUGA, K. NAKASHIMA and K. MORI	401

Effect of Flux Composition on the Rate of Desulfurization of Hot Metal by CaO–Al₂O₃ Flux (Technical Report)/S. MUKAWA	408
Mechanism of Simultaneous Decarburization and Nitrogen Removal by Blasting Iron Ore Powder on to Molten Steel Surface /M. KAWAKAMI, M. INOUE, J. S. KIM, T. TAKENAKA and S. YOKOYAMA	414
Possibility of Several Steelmaking Reactions by the Injection of H₂ into Molten Steel M. KAWAKAMI, T. MAEDA, T. TAKENAKA and S. YOKOYAMA	422
Penetration Behavior of Molten Metal into Porous Oxides (Review) T. MATSUSHITA and K. MUKAI	429
Behavior of Gas Curtain Formed at the Boundary between Container Wall and Liquid by Injection Gas (Technical Report)/K. MUKAI, L. LI and T. MATSUSHITA	439
Electrochemical Sensor for Liquid Alloys using Solid Electrolyte (Review) I. KATAYAMA	445
