

"Tetsu-to-Hagané"

Vol.91 No.1 January, 2005

Contents

Special Issue on "Social Engineering of Iron and Steel Industry Technology, Culture and Recycling-Oriented Society"

Preface

Learn from the Past and Aim for a New Stage

Y TOMOTA ······ 1

Part-1. A History of Arts and Economical Conditions of Japanese Iron Sand Smelting

History of Iron and Steel Making Technology in Japan

—Mainly on the smelting of iron sand by Tataru— (Review)

M TATE ······ 2

The History of Ironware in Japan Revealed by the AMS-carbon 14 Age Method (Review)

S FUJIO ······ 11

Physical Chemistry of Tataru Process

Effect of Oxygen Potential on Cohesion of Pulverized Iron Oxide under a Reducing Atmosphere

S YAMASHITA, D FUJIWARA and M SASABE ······ 16

The Action of Titanous Oxide as Flux

M HABA ······ 23

Physical Chemistry of Iron Oxide Based Slags Containing Titanium Oxide

K ITO and K MATSUZAKI ······ 28

Phase Diagram of Fe_2SiO_4 - TiO_2 System

M SASABE, S YAMASHITA, S UTSUNO and M TATE ······ 33

Some Considerations of Decarbonizing Process at the "Ohkajiba" Furnace

Y KATO, Y NURI, K TSUBOTA, H MATSUNAGA and T YOKOI ······ 39

Evaluation and Characterization of Remained Material Relating Old Ironmaking Process

Classification of the Iron-making Processes for Excavated Slag by the Evaluation of Chemical Composition

M AMATATSU ······ 47

Distinguishable Procedure for Ancient Iron-making Slag by Using Major Elements

T MATSUMOTO ······ 55

Experimental Restoration of Tataru Furnace

Analysis of Temperature Distribution in Modified Tataru Furnace

J TANABE ······ 62

Effect of the Size for Small Tataru Steelmaking Furnace

E YAMASUE, H HAYASHI and K N ISHIHARA ······ 68

Analysis of the Products of Ancient and Medieval Low Shaft Furnaces in Japan

M SASAKI ······ 75

Influence of the Loading Ratio (Ironsand/Charcoal) on Productivity and Quality of the Products

by Tataru Ironmaking Process/Y KUBO, Y SATO, Y MURAKAWA and K KUBOTA ······ 83

Products of Tataru Process

Investigation of Oxide Film Grown over Japanese Nail Used at Bicchu-kokubun-ji Temple (Technical Report)

Y FURUNUSHI ······ 91

The Investigation of Establishing Time of Zuku-Oshi and Kera-Oshi with Data of Iron Image of

Buddha Making Age and Old Document "Kokon-Kajibiko"/T SUZUKI ······ 97

Metallurgical Research on Japanese Swords—Focusing on Swords for Practical Use— (Technical Report)

H HOSHI and M SASAKI ······ 103

Management of Tataara Process Industry	
Alloy Steel Manufacture at Naval Arsenal of Meiji Period and Tataara Ironproduct <i>T WATANABE</i>	108
Iron Prices in Ancient Japan and the International Comparison <i>H ARAI</i>	116
Development of Management of Tataara Iron Making at Oku-Izumo in Edo Era <i>H KATAYAMA, T KITAMURA and I TAKAHASHI</i>	122
Part-2. Steel Industry in Sustainable Society	
LCA Activities in Industry, Government and University	
Life Cycle Assessment for Assessing Open Cycle Recycling of Materials—Development of a New Tool “Strategic Integrated LCA Technology, SILT” that Integrates LCA with Population Balance Model and Pinch Technology (Review)/ <i>Y MATSUNO, I DAIGO and Y ADACHI</i>	127
Recycling of Steel Cans and LCA Study (Technical Report) <i>F TAKAI, M MORI, T ODA, N TAKAMATSU and G YOSHIDA</i>	135
Material Flow of Steel	
Origin of Steel Scrap Generated in Japan <i>S HAYASHI, W TAMAKI and Y TOMOTA</i>	141
Relationship between Scrap Mixing and Steel Products for Electric Furnace <i>S HAYASHI, W TAMAKI and Y TOMOTA</i>	147
Iron and Steel Scrap Flow Analysis in Japan <i>K NAKAJIMA, W TAMAKI, D FUJIMAKI and I DAIGO</i>	150
Estimation of the Amount of Iron and Steel Industrial-scrap Using I/O Table <i>K NAKAJIMA, K HALADA and S HAYASHI</i>	154
Development of Methodology for Analyzing the Average Number of Times of Use and the Average Residence Time of Iron Element in Society by Applying Markov Chain Model <i>I DAIGO, Y MATSUNO, K N ISHIHARA and Y ADACHI</i>	159
The Steel Scrap Statistics in Japan (Note) <i>S HAYASHI and W TAMAKI</i>	167
Environmental Evaluation for Recycling Technologies	
Development of a Dynamic Model for Assessing Environmental Impact Associated with Cyclic Use of Steel/ <i>I DAIGO, D FUJIMAKI, Y MATSUNO and Y ADACHI</i>	171
Assessing Environmental Impact Associated with Cyclic Use of Steels—Indirect Reduction Potential of Environmental Impacts by the Introduction of Easy Disassemble Design for Automobiles <i>I DAIGO, D FUJIMAKI, Y MATSUNO and Y ADACHI</i>	179
Life Cycle Inventory and Cost Analysis of Waste Plastics Utilization in the Steel Industry <i>M SHIMADA, K MIYAMOTO, M HIRAO and T NAKAMURA</i>	184
Environmental and Economic Analysis of Recycling System Using Gasification Plant for Flame Retardance Waste Plastics from Used Home Appliances and Automobile Shredder Residue <i>I DAIGO, T TERASAWA, Y MATSUNO, M YAMASHITA and Y ADACHI</i>	192
Material Flow of Fluorine in Steel and Chemical Industries <i>Y FUJIOKA, E SHIBATA, E KASAI and T NAKAMURA</i>	199
Development of Ecomaterials	
High Oxidation-resistance Coating for Steel by Using Aluminum and Titanium Powders <i>T SUZUKI, S TERADA and Y TOMOTA</i>	206
Surface Modification of Carbon Steel and Tool Steel by Auminizing with Powder Liquid Coating and Plasma Nitriding <i>K MURAKAMI, N NISHIDA, K OSAMURA, Y TOMOTA and T SUZUKI</i>	212
Improvement in the Oxidation of TiAl by Molten Salt Boronizing <i>H YOKOTA and T SUZUKI</i>	217
Application of Swirling Jet Technology to Environmental Issue	
Mixing Time of Cylindrical Bath Agitated by Swirl Motion of Gas-liquid Two-phase Jet and Sludge Treatment Using Ozone/ <i>M SHITARA, M IGUCHI and T TAMAMORI</i>	224
Effect of Off-centered Nozzle Position on Swirling Liquid Jet in a Cylindrical Bath <i>D IGUCHI and M IGUCHI</i>	230
Swirl Motion of Bubbling Jet in Highly Viscous Liquid Contained in a Cylindrical Vessel <i>T TAMAMORI, M IGUCHI and M SHITARA</i>	236
Discussion on the Occurrence of Swirl Motion of Bubbling Jet in Highly Viscous Bath (Note) <i>M IGUCHI, T TAMAMORI, M SHITARA and D IGUCHI</i>	241
