

Contents

Fundamentals of High Temperature Processes

Characteristics of Hollow Cathode Arc as a Welding Heat Source—Measurement of Electron Density
by IR Method of Plasma Diagnostics—

S. SHOBAKO and T. OHJI575

Casting and Solidification

Outlet Flow Angle Design of Swirling Flow Submerged Entry Nozzle for Wide Slab Casting

Y. TSUKAGUCHI, O. NAKAMURA, S. YOKOYA and S. TAKAGI581

Chemical and Physical Analysis

Determination of Trace Boron in Iron and Steel by Adsorptive Stripping Voltammetry with Beryllon III

T. TANAKA, K. NISHU, H. NABEKAWA and H. HAYASHI589

Simultaneous Determination of Trace Tramp Elements (Zn, Pb and Bi) in Steel by Anodic Stripping
Voltammetry

T. TANAKA, Y. MASUMOTO, Y. NOGUCHI and H. HAYASHI595

Forming Processing and Thermomechanical Treatment

Dynamic Recrystallization Behavior in Martensite in 18Ni, 17Ni-0.2C and SM490 Steels

Y. Z. BAO, Y. ADACHI, Y. TOOMINE, T. SUZUKI, P. G. XU and Y. TOMOTA602

Transformations and Microstructures

Three-dimensional Observation of Ferrite Plate in Low Carbon Steel Weld

M. ENOMOTO, Y. INAGAWA, K. WU, S. NANBA and T. MURAKAMI609

Effect of Microstructure on Elongation in Cold-rolled High Carbon Steel Sheets

T. FUJITA, N. KARIYA, N. NAKAMURA and Y. HOSOYA616

ISIJ International, Vol.45 (2005), No.7, Synopses and TitlesA22
