Special Issue on “Advancement for Sustainability and Resource Flexibility of the Ironmaking Processes”

Preface to the Special Issue on “Advancement for Sustainability and Resource Flexibility of the Ironmaking Processes” (Preface)	693
<i>T. ARIYAMA</i>	
Technological Progresses and Researches on Blast Furnace Ironmaking in The New Century (Review)	694
<i>M. SHIMIZU and M. NAITO</i>	
Examination of Resolidification and Carbonization Mechanism of Coking and Non- or Slightly-caking Coals during Coke Production (Review)	703
<i>K. MIURA and K. KATO</i>	
Sintering-1	
· Iron Ore Property and Granule Design of Raw Materials	
Classification of Iron Ore Particle and Relationship between Those Mineral Characteristics and Sintering Properties	713
<i>J. OKAZAKI, M. NAKANO and G. SAITOH</i>	
Effect of Adding Moisture and Wettability on Granulation of Iron Ore	721
<i>T. MAEDA, C. FUKUMOTO, T. MATSUMURA, K. NISHIOKA and M. SHIMIZU</i>	
Influence of the Nuclei Particle Properties on Granulability of Marra Mamba Iron Ore by High Speed Agitating Mixer	728
<i>T. MATSUMURA, K. MIYAGAWA and Y. YAMAGATA</i>	
Influence of Polymer Dispersant on the Granulation of Raw Materials for Sintering Process	735
<i>T. OKADA, J. OKAZAKI, M. NAKANO, K. KONO and S. MIURA</i>	
Numerical Simulation Model for Granulation Kinetics of Iron Ores Based on Discrete Element Method	742
<i>J. KANO, E. KASAI, F. SAITO and T. KAWAGUCHI</i>	
Sintering-2	
· Melt Properties and Its Control	
Effect of Al_2O_3 and MgO Additions on Liquidus for the $CaO-SiO_2-FeO_x$ System at 1573K	748
<i>H. KIMURA, T. OGAWA, M. KAKIKI, A. MATSUMOTO, T. HAMANO and F. TSUKIHASHI</i>	
Experimental Evaluation of Chemical Composition and Viscosity of Melts Formed during Iron Ore Sintering	755
<i>S. MACHIDA, K. NUSHIRO, K. ICHIKAWA, H. NODA and H. SAKAI</i>	
Properties of Core Ore Required for Sinter Mixture under Large Amounts Usage of Limonitic Ores	763
<i>T. OTOMO, Y. TAKASAKI and T. KAWAGUCHI</i>	
Development of a 3 Dimensional Mathematical Simulation Model for Iron Ore Sintering Process	769
<i>T. KAWAGUCHI and H. YAMAOKA</i>	
Sintering-3	
· Control of Sintering Process by Designing Bed Structure	
The Sintering Behavior of Raw Material Bed Placing Large Particles	779
<i>T. KAWAGUCHI, C. KAMIJO and M. MATSUMURA</i>	
Design of Bed Structure Aiming the Control of Void Structure Formed in the Sinter Cake	788
<i>E. KASAI, S. KOMAROV, K. NUSHIRO and M. NAKANO</i>	
Effect of Insertion of Burning Down Materials on Sinter Cake Property and Permeability	794
<i>K. ICHIKAWA, S. MACHIDA, K. NUSHIRO, H. SATO and K. TAKEDA</i>	
Sintering-4	
· Carbothermic Reduction and Partial Reduction Sintering	
The Preparation and Reduction Behavior of Carbon Composite Iron Oxide Pellets Using Semi-coal-char	802
<i>H. KONISHI, T. USUI and K. AZUMA</i>	
Carbothermic Reduction of the Composite Pellet of Iron Ore and Coal in the Packed Bed with Air Flow	809
<i>T. OTOMO, Y. TAKASAKI, A. SHIBAYAMA, T. KAWAGUCHI and E. KASAI</i>	

Development of Production Process for Pre-reduced Agglomerates and Evaluation of Its Quality <i>H. SATO, S. MACHIDA, K. NUSHIRO, K. ICHIKAWA, M. SATO, T. ARIYAMA and K. TAKEDA</i>	815
Influence of Ore and Coal Brand on the Reduction of the Carbon Composite Iron Ore Sheet <i>C. KAMIJO, M. HOSHI, T. KAWAGUCHI and Y. KAMEI</i>	825
Cokemaking-1	
· Coke Properties	
Effect of Inert Size on Coke Strength <i>Y. KUBOTA, S. NOMURA, T. ARIMA and K. KATO</i>	833
Effects of Gasification and Smelting Reduction on Coke Degradation <i>T. NATSUL, K. SUNAHARA and Y. UJISAWA</i>	841
Cokemaking-2	
· Advanced Cokemaking	
Some Fundamental Aspects of Highly Reactive Iron Coke Production <i>S. NOMURA, H. TERASHIMA, E. SATO and M. NAITO</i>	849
Development of New Cokemaking Process by Blending of Coal Particles Coated by Caking Coal <i>H. FUJIMOTO, K. FUKADA, T. ANYASHIKI and I. SHIMOYAMA</i>	857
Blast Furnace-1	
· Fundamental Phenomena and Improvement of Operation	
Effects of Mineral Matrix on Softening Property and Reducibility at Dolomite Sinter <i>M. MATSUMURA, M. HOSHI and T. KAWAGUCHI</i>	865
Effect of High Al ₂ O ₃ Slag on the Blast Furnace Operations <i>K. SUNAHARA, K. NAKANO, M. HOSHI, T. INADA, S. KOMATSU and T. YAMAMOTO</i>	875
Characteristics of Liquid Hold-ups in a Soaked and Unsoaked Fixed Bed <i>H. KAWABATA, Z. LIU, F. FUJITA and T. USUI</i>	885
Influence of Channeling Factor on Liquid Hold-ups in an Initially Unsoaked Bed <i>H. KAWABATA, K. SHINMYOU, T. HARADA and T. USUI</i>	893
Development of High Ratio Coke Mixed Charging Technique to the Blast Furnace <i>S. WATAKABE, K. TAKEDA, H. NISHIMURA, S. GOTO, N. NISHIMURA, T. UCHIDA and M. KIGUCHI</i>	901
Blast Furnace-2	
· Measurement and Control Technology	
Development of a Visual Information Technique of Nonstationary Fluctuations in a Blast Furnace Process <i>S. MATSUZAKI, M. ITOU, M. NAITO, M. ISOBE and K. KAKIUCHI</i>	911
Analyses on Blast Furnace Raceway Formation by Micro Wave Reflection Gunned through Tuyere <i>Y. MATSUI, Y. YAMAGUCHI, M. SAWAYAMA, S. KITANO, N. NAGAI and T. IMAI</i>	919
Stabilization of Tapping Hole Length by Controlling Blast Furnace Raceway Depth <i>Y. MATSUI, R. TADAI, K. ITO, T. MATSUO, N. NAGAI and T. IMAI</i>	926
Analyses on Dynamic Solid Flow in Blast Furnace Lower Part by Deadman Shape and Raceway Depth Measurement <i>Y. MATSUI, M. TANAKA, M. SAWAYAMA, S. KITANO, T. IMAI and A. GOTO</i>	932
Blast Furnace-3	
· Mathematical Analysis	
Mechanical Analyses on Stability of Particle Flows Near Raceway of Blast Furnace <i>K. NAKANO and H. YAMAOKA</i>	939
Numerical Analysis on Behavior of Unburned Char and Fine Coke in Blast Furnace <i>H. NOGAMI, S. PINTOWANTORO and J. YAGI</i>	948
Stress Field and Solid Flow Analysis of Coke Packed Bed in Blast Furnace Based on DEM <i>T. NOUCHI, T. SATO, M. SATO and K. TAKEDA</i>	955
Effects of Operation Condition and Casting Strategy on Drainage Efficiency of the Blast Furnace Hearth <i>T. NOUCHI, M. SATO and K. TAKEDA</i>	961
A Three-dimensional Mathematical Modelling of Drainage Behavior in Blast Furnace Hearth <i>K. NISHIOKA, T. MAEDA and M. SHIMIZU</i>	967
Effect of Various In-furnace Conditions on Blast Furnace Hearth Drainage <i>K. NISHIOKA, T. MAEDA and M. SHIMIZU</i>	976
Effect of FeO in Dripping Slag on Blast Furnace Hearth Drainage <i>K. NISHIOKA, T. MAEDA and M. SHIMIZU</i>	986
Blast Furnace-4	
· Low Reducing Agent Operation	
Two Dimensional Cold Model Study on Unstable Solid Descending Motion and Control in Blast Furnace Operation with Low Reducing Agents Rate <i>H. TAKAHASHI, H. KAWAI, M. KOBAYASHI and T. FUKUI</i>	996
Control of Peripheral Gas Flow and Design of Burden Quality for Low Reducing Agent Rate Operation of Blast Furnace <i>T. SATO, M. SATO, K. TAKEDA and T. ARIYAMA</i>	1006
Subjects for Achievement of Blast Furnace Operation with Low Reducing Agent Rate <i>Y. UJISAWA, K. NAKANO, Y. MATSUKURA, K. SUNAHARA, S. KOMATSU and T. YAMAMOTO</i>	1015
New Ironmaking Process	
HBI Production through Coal-based Direct Reduction and Its Application in Blast Furnace <i>H. TANAKA and T. HARADA</i>	1022
ISIJ International, Vol.46 (2006), No.12, Synopses and Titles	A40
Instructions for Authors	A44
Tetsu-to-Hagané Index	A50
