### Special Issue on “Coking Mechanism of Non- or Slightly-caking Coals and Mechanical Properties of Coke”

|   |     |
|---|-----|
| <b>Preface to the Special Issue “Coking Mechanism of Non- or Slightly-caking Coals and Mechanical Properties of Coke” (Preface)</b>                       |     |
| <i>K. MIURA</i> .....   | 105 |
| <b>Control of the Size Degradation Behavior of Coke (Review)</b>  |     |
| <i>T. ARIMA</i> .....   | 106 |
| <b>Desirable Coke Properties for Blast Furnace in Future (Review)</b>   |     |
| <i>T. ARIYAMA, M. SATO, T. SATO, S. WATAKABE and R. MURAI</i> .....   | 114 |
| <b>Analysis of Coking Mechanism Assisted by Carbon Science</b>  |     |
| <b>High Temperature EPR Study on the Thermoplastic and Re-solidification Phenomenon of Coal upon Heating/H. KUMAGAI, I. SHIMOYAMA and Y. HARADA</b> ..... | 122 |
| <b>Evaluation of Blending Effect Based on the Structural Analysis of Semicoke</b>   |     |
| <i>K. KIDENA, K. MATSUMOTO, M. NOMURA and K. SAITO</i> .....  | 127 |
| <b>Mechanism of Thermoplasticity for Coal Blends Containing Low-quality Coals</b>   |     |
| <i>T. TAKANOHASHI, T. SHISHIDO, K. MASAKI, K. FUKADA and A. DOBASHI</i> .....   | 132 |
| <b>Analysis of Carbon Structure in Cokes at Molecular Level</b>   |     |
| <i>H. ORIKASA, H. NISHIHARA, Q.-H. YANG, K. MATSUOKA, T. KYOTANI, A. SHARMA, K. MATSUI, H. FUJIMOTO, K. FUKADA and K. KATO</i> .....                      | 137 |
| <b>Examination of the Carbonization Behavior of Coals by Using Raman Spectroscopy and Kinetic Analysis of Hydrogen Formation</b>                          |     |
| <i>H. NAKAGAWA, R. ASHIDA, K. KUMATA, K. MIURA, K. MATSUDAIRA and K. MIYAGAWA</i> .....   | 145 |
| <b>Investigation of Micro Carbon Structure of Coke and Semi-coke Using Hand-picking Method</b>  |     |
| <i>K. MORISHITA, D. ANRAKU, T. TACHIHARA, H. MURAKAMI, T. YAMAMOTO and T. TAKARADA</i> .....  | 152 |
| <b>Differences in the Coking and Non-coking Coals from the Standpoint of Carbon Structure</b>   |     |
| <i>J. OZAKI, Y. UOZUMI, A. OYA, K. SAITO and S. AIZAWA</i> .....  | 157 |
| <b>New Approaches to Coke Strength Evaluation</b>   |     |
| <b>Failure Strength of Metallurgical Coke—An Approach from Materials Mechanics—</b>   |     |
| <i>M. SAKAI, R. NISHIMURA, M. NISHIMURA and K. FUKUDA</i> .....   | 164 |
| <b>Evaluation of Mechanical Property in Matrix of Metallurgical Coke by Nano-indentation Method</b>   |     |
| <i>T. OGATA, K. UEOKA, Y. MOROZUMI, H. AOKI, T. MIURA, K. UEBO and K. FUKUDA</i> .....  | 171 |
| <b>Strength Evaluation of Coke Structure by Hardness Test</b>   |     |
| <i>K. UEBO, S. AIZAWA and S. YOSHIDA</i> .....  | 177 |
| <b>Evaluation of Coke Strength Considering Pore Shapes by Using a Homogenization Method</b>   |     |
| <i>K. UEOKA, T. OGATA, Y. MOROZUMI, H. AOKI, T. MIURA, K. UEBO and K. FUKUDA</i> .....  | 184 |
| <b>Visualization and Modeling of Coke Pore Formation Mechanism</b>  |     |
| <i>K. SAKANISHI, K. HANAOKA, K. FUKATA and S. AIZAWA</i> .....  | 191 |
| <b>Analysis of Coal Swelling Behavior during Carbonization</b>  |     |
| <i>Y. TAKIZAWA, T. KIMURA, K. HIGUCHI, Y. MOROZUMI, H. AOKI, T. MIURA, K. UEBO and K. FUKUDA</i> .....  | 198 |
| <b>Effect of Coke Pore Structure on Coke Tensile Strength before/after CO<sub>2</sub> Reaction and Surface-breakage Strength</b>                          |     |
| <i>T. YAMAMOTO, K. HANAOKA, S. SAKAMOTO, I. SHIMOYAMA, K. IGAWA and K. TAKEDA</i> .....   | 206 |

**Exploration of New Cokemaking Technology**

**Thermoplastic Performance of the Solvent Extracted Ashless Coal and Its Applicability for**

**Coke Material**/N. OKUYAMA, T. SHIGEHISA, Y. NISHIBATA, K. MATSUDAIRA and M. NISHIMURA .....213

**Improvement in Blast Furnace Reaction Efficiency through the Use of Highly Reactive**

**Calcium Rich Coke**/S. NOMURA, H. AYUKAWA, H. KITAGUCHI, T. TAHARA, S. MATSUZAKI,

M. NAITO, S. KOIZUMI, Y. OGATA, T. NAKAYAMA and T. ABE .....223
