

"Tetsu-to-Hagané"

Vol.92 No.6 June, 2006

Contents

Fundamentals of High Temperature Processes

- Confinement of Molten Metal Using Magnetic Field
Y. HIRONO, K. SASSA and S. ASAI357
- Electromagnetic Stirring of Liquid Metal by Simultaneous Imposition of Rotating and
Traveling Magnetic Fields
S. TANIGUCHI, K. UENO, S. SHIMAZAKI, M. OKUBO, T. ANDO and H. KASAHARA364

Casting and Solidification

- Effects of Alloying Elements on Solidification Structures in Cr-Mn-Ni Austenitic Stainless Steels
T. OSHIMA, A. KIMURA, T. HAMADA, Y. HABARA and K. KURODA372

Chemical and Physical Analysis

- Effective Ionization for Analysis of Oxygen in Steel by Helium Glow Discharge Mass Spectrometry
(Technical Report)
S. ITOH, N. OGURO and T. KOBAYASHI406

Surface Treatment and Corrosion

- Effects of Surface Oxides on the Phosphatability of the High Strength Cold Rolled Steels
M. NOMURA, I. HASHIMOTO, S. KOZUMA, M. KAMURA and Y. OMIYA378

Physical Properties

- Analysis of Carbide Precipitation with Alloy Element during Aging of Low Carbon Steel by Modeling
H. TANIGUCHI and R. OKAMOTO385

Social and Environmental Engineering

- Effect of Catalyst of Iron Oxide-Carbon on Methane Hydrate Formation under Weak Stirring Condition
M. TAKAHATA, Y. KASHIWAYA, M. OUCHI and K. ISHII393
- Estimation of Quality Change in Domestic Steel Production Affected by Steel Scrap Exports
D. FUJIMAKI, Y. IGARASHI, I. DAIGO, Y. MATSUNO and Y. ADACHI401

ISIJ International, Vol.46 (2006), No.6, Synopses and TitlesA18
