

Contents

Fundamentals of High Temperature Processes

- Initiation Time of Vortex and its Arrival Time to Impeller under Mechanical Agitation
S. SATO, T. OHMI and M. IGUCHI469

- Effect of Slag on Swirling Liquid Jet in Transient Period
D. IGUCHI, T. OHMI and M. IGUCHI475

Ironmaking

- The Characteristics of Catalyst-coated Highly Reactive Coke
S. NOMURA, H. KITAGUCHI, K. YAMAGUCHI and M. NAITO481

Chemical and Physical Analysis

- Analytical Performance of Argon Spark Discharge Plasma under Reduced Pressures
S. NAKAMURA and K. WAGATSUMA490

Forming Processing and Thermomechanical Treatment

- Adhesion between Paint and Steel Sheet in Paint-coated Steel Sheet System and Interaction at
Interface between Paint and Chromate-coated Steel Sheet
N. INAGAKI495

Surface Treatment and Corrosion

- Effect of Polyethylene Glycol on the Morphology of Zn Electrodeposited on Steel Sheet
H. NAKANO, S. OUE, T. MIKI, S. KOBAYASHI and H. FUKUSHIMA501

Mechanical Properties

- Improvement of Corrosion Resistance, Toughness and Weldability of SUS329J4L for
Large Thick Plate Applied for Canister of Spent Fuel Storage
H. ITOH, T. SHIGE, S. MOURI, K. MATSUNAGA, K. MURAKAMI, H. KAJIMURA, S. TSUGE and T. MATSUDA507

- Yield Stress Anisotropy by Straining and Baking of Bake-hardenable Steel
S. YONEMURA, S. HIWATASHI, A. UENISHI and M. USUDA516

- Fatigue Properties of Plasma Nitrided Ultrafine Ferrite-Cementite Steels
H. HIRUKAWA, Y. FURUYA, S. MATSUOKA, S. TORIZUKA and H. KUWAHARA523

New Materials and Processes

- Grinding Sludge Recycling to Reduce Environmental Load
(Technical Improvement of Separation for Further Environmental Load Reduction) (Technical Report)
K. NAKAMURA and S. HAYASHI530

- Grinding Sludge Recycling to Reduce Environmental Load
(Analysis of Disturbing Factor for Briquetting of Grinding Sludge) (Technical Report)
K. NAKAMURA and S. HAYASHI535
