Special Issue on "Recent Developments in Analytical Technology and Methodology"

Preface to the Special Issue "Recent Developments in Analytical Technology and Methodology" (Preface)	
S. HIRAI	71
Chemical Analysis of Iron and Steels Using Flow Injection Analysis (FIA) System (Review)	
Y. SUZUKI and T. YAMANE	72
Determination of Trace Lead in Iron and Steel by Electrothermal Atomic Absorption Spectrometry after Coprecipitation with Yttrium Phosphate	
S. KAGAYA, K. KAKEHASHI and K. HASEGAWA	80
Separation of Trace Metals from an Iron Matrix with Emulsion Globules for Inductively Coupled Plasma-Mass Spectrometry	
H. MATSUMIYA and M. HIRAIDE	85
Determination of Trace Metals in Steel by Combining Anion Exchange Separation with ICP-AES	
K. IGARASHI and K. OGUMA	89
Determination of Trace Amounts of Bismuth in Iron and Steel by Pre-column Derivatization Reversed-phase High-performance Liquid Chromatography with Ethylenediaminetetraacetate	
T. MURAMOTO, Y. YUKISHITA, T. SHIMIZU and N. UEHARA	94
Rapid Determination of Phosphorus in Steel by Electrolytic Gas Introduction—ICP-AES Method	
M. AIMOTO, H. KONDO and A. ONO	100
Quantitative Analysis of Ca-rich Oxide Inclusions in Steel by Galvanostatic Electrolysis	
A. CHINO, S. KINOSHIRO and T. ONO	105
Determination of Trace Elements in Certified Iron and Steel Standard Materials by Instrumental Neutron Activation Analysis	
Y. OKADA and S. HIRAI	111
Helium Microwave Plasma Atomic Emission Spectrometry at Atmospheric Pressure for Nonmetal Element Analysis	
T. OKAMOTO and Y. OKAMOTO	116
Emission Characteristics of Okamoto-cavity Microwave-induced Plasma Using Nitrogen-Argon Mixed Plasma Gas	
G. KANEHISA, K. WAGATSUMA and Y. OKAMOTO	121
Determination of Oxygen in Magnesium by Glow Discharge Mass Spectrometry	
E. KIKUTA, H. ASANO and T. KIKUCHI	128
Chemical State Analysis of Fine Particles using XAFS	
S. MATSUMOTO, H. ISHII, T. TANABE and J. KAWAI	132
In-situ Observation of Microstructure Formation Process of Weld Metals by Time-resolved X-ray Diffraction	
M. YONEMURA, T. OSUKI, H. TERASAKI, Y. KOMIZO, M. SATO and H. TOYOKAWA	138
Quantitative Composition Analysis of Spherical Cementite by Three-dimensional Atom Probe	
J. TAKAHASHI, K. KAWAKAMI, M. SUGIYAMA and T. TARUI	145

The Application of Infrared Spectrophotometry to Analysis of Dehydration Processes of Inorganic Hydroxides and Evaluation of Monolithic Refractories Y. FUJIOKA, K. KANEHASHI, K. SAITO, Y. SAITO and K. GOTO	150
In-situ Surface Observation of Zn and Zn-5%Al Alloy in Aqueous Solution by Polarization Modified Infrared Reflection Absorption Spectrometry K. NISHIHARA, M. MATSUMOTO, M. KIMOTO, T. KUDO and H. UCHIDA	156
Visualization of Fine Precipitates TiN in Low-alloy Steel by Using Energy-filtered Transmission Electron Microscopy Y. IKEMATSU, G. SHIGESATO, M. SUGIYAMA and D. SHINDO	163
Application of Low-voltage Scanning Electron Microscopy to the Characterization of Steel Surface K. SATO, M. NAGOSHI and T. KAWANO	169
Structural Analysis and Grouping of Inorganic Matter in Coal by ²⁷Al NMR MQMAS Measurement Y. TOBU, K. KANEHASHI, M. HATAKEYAMA and K. SAITO	176
Determination of Trace Carbon and Sulfur in Small Amounts of Iron and Steel by Use of a Tubular Furnace-combustion Infrared Absorption Analyzer (Technical Report) M. KATO and S. HIRAI	182
Consideration of Highly-efficiency Ionization Using Helium Glow Discharge Ion Source (Technical Report) S. ITOH, N. OGURO and T. KOBAYASHI	187
Effect of the Matrix Element on the Determination of Tramp Elements in Iron and Steel by ICP-OES: The Usefulness of the Matrix Removal (Technical Report) K. TAKADA, T. ASHINO, T. SYOJI, T. ITAGAKI (SATO) and K. WAGATSUMA	190
Monitoring of Generated Gas from Plastics during Pyrolysis in Hydrogen Atmosphere by FT-IR (Technical Report) M. NISHIFUJI, Y. FUJIOKA, K. SAITO, N. HAYASHI and T. TANAKA	195
