

## Contents

---

### Fundamentals of High Temperature Processes

#### Rate of Isothermal Reduction of MgO with Al

*J. YANG, M. KUWABARA, T. SAWADA and M. SANO* .....201

#### Prediction of Occurrence Region of Swirling Liquid Jet in Transient Period (Note)

*D. IGUCHI, T. OHMI and M. IGUCHI* .....262

### Steelmaking

#### Formation Mechanism of Inclusions Containing MgO·Al<sub>2</sub>O<sub>3</sub> Spinel in Type 304 Stainless Steel

*Y. EHARA, S. YOKOYAMA and M. KAWAKAMI* .....208

### Surface Treatment and Corrosion

#### Trial to Evaluate Wettability of Liquid Zn with Steel Sheets Containing Si and Mn

*S. SHIMADA, Y. TAKADA, J. LEE and T. TANAKA* .....215

#### Estimation of Nitrogen Concentration Distribution for Carbonitrided SUJ2 Steel

*C. OHKI* .....220

### Transformations and Microstructures

#### Production of Fe-C Alloys through Reduction and Sintering of Cementite Powders in

##### Hydrogen Gas Atmosphere

*K. NAKASHIMA, N. OUCHIDA, M. EGASHIRA, T. TSUCHIYAMA and S. TAKAKI* .....228

#### Effects of Aluminum on Delayed Fracture Properties of Ultra High-strength Low Alloy

##### TRIP-aided Steels

*T. HOJO, K. SUGIMOTO, Y. MUKAI and S. IKEDA* .....234

#### Effect of Aging on Microstructures and Mechanical Properties of High Nitrogen Austenitic

##### Stainless Steel

*T. NAKAZAWA, S. HOSHINO, K. YAMAGUCHI and Y. KATADA* .....240

#### Fatigue Crack Growth Behavior and Hydrogen Penetration Properties in Austenitic Stainless

##### Steels Exposed to High-pressure Hydrogen Gas Environments

*Y. MINE, C. NARAZAKI, T. KANEZAKI, S. MATSUOKA and Y. MURAKAMI* .....247

### Social and Environmental Engineering

#### Grinding Sludge Recycling to Reduce Environmental Load (Investigation of Relation between Machine

##### Characteristic and Grinding Sludge Briquetting Condition) (Technical Report)

*K. NAKAMURA and S. HAYASHI* .....257
