

Contents

Fundamentals of High Temperature Processes

- Flow in a Bath with an Immersion Cylinder under Mechanical Agitation Condition
Y. TAKAHASHI and M. IGUCHI461

Ironmaking

- Control of Biomass Composition for Optimum Injection in Blast Furnace to Mitigate CO₂ Emission
in Ironmaking Process
S. UEDA, R. INOUE and T. ARIYAMA468
- Quantitative Effect of Micro-particles in Iron Ore on the Optimum Granulation Moisture
S. KAWACHI and S. KASAMA475

Steelmaking

- Desiliconization and Decarburization of Molten Pig Iron by Injection of Weakly Oxidizing Gas
T. TAKENAKA, T. AIHARA, M. KAWAKAMI and T. KOJIMA483

Casting and Solidification

- Refinement of As-cast Austenite Grain in Carbon Steel by Addition of Titanium
M. SASAKI, K. MATSUURA, K. OHSASA and M. OHNO491
- Silicon Crystal Pulling from the Melt of Si-45mass%Ni Alloy
T. KOYAMA, M. IKEDA, Y. SHIBUTA and T. SUZUKI496
- Kinetics of Crystallization of Mold Flux for Middle Carbon Steel by Isothermal Heat Treatment
H. MIZUNO, H. ESAKA, K. SHINOZUKA and M. TAMURA502
- Generation Mechanism of Unevenness of Ultra Low Carbon Steel at Initial Stage of Solidification
H. MIZUKAMI and A. YAMANAKA507

Chemical and Physical Analysis

- Application of Laser Ablation–Laser Induced Fluorescence Spectroscopy to Analysis of Steel
—Detection of Low Phosphorus in Steel—
H. KONDO and N. HAMADA517
- Modeling of Hydrogen Thermal Desorption Profile of Pure Iron and Eutectoid Steel
K. EBIHARA, T. SUZUDO, H. KABURAKI, K. TAKAI and S. TAKEBAYASHI522
- In-situ* Observation on the Explosion Process of Inclusions in Spark OES Analysis Using High Speed
Camera
K. MIZUKAMI, M. SUGIYAMA and M. TSUJI532

Welding and Joining

- High Quality–High Speed Friction Stir Welding of 304 Austenitic Stainless Steel
T. ISHIKAWA, H. FUJII, K. GENCHI, S. IWAKI, S. MATSUOKA and K. NOGI539

Surface Treatment and Corrosion

- Effect of Environmental Cation Species on Corrosion near Shear Cut Edge of 55%Al–Zn Alloy
Coated Steel Sheet
M. MATSUMOTO, N. OKADA, K. NISHIHARA, M. KIMOTO and T. KUDO545

Mechanical Properties

- Precipitation Hardening and Mechanical Properties in Cu Added Martensitic Ultra-high Strength Steels
Y. NAGATAKI, K. SATO and Y. HOSOYA553

Social and Environmental Engineering

- Development of a Dynamic Substance Flow Model of Zinc in Japan
H. TABAYASHI, I. DAIGO, Y. MATSUNO and Y. ADACHI562
- Continuation of Bioavailability as an Iron Fertilizer of a Steelmaking Slag for Two *Thalassiosira* Species
K. SUGIE and A. TANIGUCHI569
